*The European database of suspected drug reaction reports is [EudraVigilance](#), which also tracks reports of injuries and deaths following the experimental COVID-19 “vaccines.”*

Here is what [EudraVigilance](#) states about their database:

This website was launched by the [European Medicines Agency](#) in 2012 to provide public access to reports of suspected side effects (also known as suspected adverse drug reactions). These reports are submitted electronically to [EudraVigilance](#) by national medicines regulatory authorities and by pharmaceutical companies that hold marketing authorisations (licences) for the medicines.

EudraVigilance is a system designed for collecting reports of suspected side effects. These reports are used for evaluating the benefits and risks of medicines during their development and monitoring their safety following their authorisation in the European Economic Area (EEA). EudraVigilance has been in use since December 2001.

This website was launched to comply with the [EudraVigilance Access Policy](#), which was developed to improve public health by supporting the monitoring of the safety of medicines and to increase transparency for stakeholders, including the general public.

The [Management Board of the European Medicines Agency](#) first approved the EudraVigilance Access Policy in December 2010. A revision was adopted by the Board in December 2015 based on the 2010 pharmacovigilance legislation. The policy aims to provide stakeholders such as national medicines regulatory authorities in the EEA, the European Commission, healthcare professionals, patients and consumers, as well as the pharmaceutical industry and research organisations, with access to reports on suspected side effects.

Transparency is a key guiding principle of the Agency, and is pivotal to building trust and confidence in the regulatory process. By increasing transparency, the Agency is better able to address the growing need among stakeholders, including the general public, for access to information. ([Source](#).)

Their report through May 22, 2021 lists 12,184 deaths and 1,196,190 injuries following injections of four experimental COVID-19 shots:

- [COVID-19 MRNA VACCINE MODERNA \(CX-024414\)](#)
- [COVID-19 MRNA VACCINE PFIZER-BIONTECH](#)
- [COVID-19 VACCINE ASTRAZENECA \(CHADOX1 NCOV-19\)](#)
- [COVID-19 VACCINE JANSSEN \(AD26.COV2.S\)](#)

A banner for EudraVigilance, the European database of suspected adverse drug reaction reports. It features the European Union flag logo on the left. The text reads: "EudraVigilance - European database of suspected adverse drug reaction reports". Below this, it states: "The European Medicines Agency publishes these data so that its stakeholders, including the general public, can access information that European regulatory authorities use to review the safety of a medicine or active substance. Transparency is a key guiding principle of the Agency." The main headline in large white text on a black background says: "COVID-19 Vaccine Adverse Drug Reactions 12,184 DEAD 1,196,190 Injuries Through May 22, 2021". Below the headline, it lists the four vaccine types: "COVID-19 MRNA VACCINE MODERNA (CX-024414)", "COVID-19 MRNA VACCINE PFIZER-BIONTECH", "COVID-19 VACCINE ASTRAZENECA (CHADOX1 NCOV-19)", and "COVID-19 VACCINE JANSSEN (AD26.COV2.S)". At the bottom, there are logos for the "EUROPEAN MEDICINES AGENCY" (with the tagline "SCIENCE MEDICINES HEALTH") and "EudraVigilance" with a small EU flag icon.

From the total of injuries recorded, there are 604,744 serious injuries which equals over 50%.

*"Seriousness provides information on the suspected undesirable effect; it can be classified as 'serious' if it corresponds to a medical occurrence that results in death, is life-threatening, requires inpatient hospitalisation, results in another medically important condition, or prolongation of existing hospitalisation, results in persistent or significant disability or incapacity, or is a congenital anomaly/birth defect."*

A *Health Impact News* subscriber in Europe ran the reports for each of the four COVID-19 shots we are including here. This subscriber has volunteered to do this, and it is a lot of work to tabulate each reaction with injuries and fatalities, since there is no place on the [EudraVigilance](#) system we have found that tabulates all the results.

Since we have started publishing this, others from Europe have also calculated the numbers

and confirmed the totals.[1]

Here is the summary data through May 22, 2021.

Total reactions for the experimental mRNA vaccine Tozinameran (code BNT162b2, Comirnaty) from BioNTech/ Pfizer: 5,961 deaths and 452,779 injuries to 22/05/2021

- 13,531 Blood and lymphatic system disorders incl. 59 deaths
- 9,828 Cardiac disorders incl. 735 deaths
- 71 Congenital, familial and genetic disorders incl. 4 deaths

## Notes

[1] These totals are estimates based on reports submitted to [EudraVigilance](#). Totals may be much higher based on percentage of adverse reactions that are reported. Some of these reports may also be reported to the individual country's adverse reaction databases, such as the U.S. VAERS database, and the UK Yellow Card system. The fatalities are grouped by symptoms, and some fatalities may have resulted from multiple symptoms.
