Overall Canadian physician mortality in 2022 was 53% higher than 2019, however, as with all excess mortality data in highly COVID-19 vaccinated jurisdictions, this mortality is heavily skewed towards the younger age groups, with the youngest doctors – medical students or medical residents under age 30 dying at a 900% higher rate in 2022, compared to the 2019/2020 average.

2021 sudden and unexpected Canadian doctors' deaths:

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
