Update: [Team Lurie Children's](#) has offered to re-share our fundraiser and help spread the word on our Project Adam fundraiser!!

It's been 18 days since my life was forever changed. [My 16 year old son went into Sudden Cardiac Arrest at school and was saved by the heroic actions of the school nurse and the rest of the emergency response team.](#)

Grace McCubbin

March 1 at 7:48 PM · 🌐

The school nurse saved my sons life last Friday.

I'm still processing all of it, but Maddox is ok and we are at the children's hospital in Iowa city and he is getting the best possible care.

I just want to take a moment to recognize this nurse, her name is Amber, who went to work that day expecting a normal work day and instead performed CPR and administered shocks with a defibrillator to my sons chest and got his pulse and breathing back TWICE before the paramedics arrived. Thank you. Thank you thank you thank you.

I found out later at the hospital that Maddox experienced sudden cardiac arrest. He wasn't playing sports or doing anything strenuous he was literally sitting at his desk in class. He is not overweight, he has no health problems, there were no signs.

Sudden cardiac arrest. You've probably heard the words before but you probably don't think about it much. Maybe you associate it with athletes on playing fields or people with heart disease.

In actuality I have learned that sudden cardiac arrest is a serious public health crisis. 1000 people a day are effected by sudden cardiac arrest. Nearly half a million Americans die from SCA annually. SCA is actually the third leading cause of death for adolescents, number one for student athletes. It kills more people than breast cancer and car accidents. AND IT IS NOT NEW!!! it's been a known public health issue for over 30 years. project ADAM, which exists with the sole purpose of teaching schools how to recognize and respond to SCA and make sure they have AEDs, was launched in 1999 after a rash of teenagers in Wisconsin died of SCA without cause.

This isn't new, it's not preventable or predictable. Maddox had a clean ekg and echocardiogram. A cardiac mri revealed a minor birth defect called left ventricular noncompaction but this is such a mild issue that it's equally likely that it DIDNT cause the arrest as it did and his doctors really don't think it's the root of the issue. We might not ever know why it happened, many SCA survivors never know.

Here's what I do know and if this information helps someone somewhere then it's worth my time to type:

1) 90% of sudden cardiac arrests end in fatalities. 90%!!!!!! The fact that Maddox is alive with no brain damage is miraculous and a huge testament to the incredible response of the moline high school staff.

Was Maddox COVID-19 vaccinated?

16 year old Moline High School student Maddox McCubbin collapsed during study hall ([click here](#))

Was he COVID-19 vaccinated? The short answer is, yes. His mother is a fervent believer in the mainstream media, as well as mRNA pushing doctors and scientists. She also believes that COVID-19 vaccine injuries are "misinformation" and "Russian propaganda".

This is the level of brainwashing some parents are under:

Grace McCubbin

Mary Mack no that is not true, project Adam started in 1999. The Covid vaccine has nothing to do with it and I'm sure the thousands of parents who lost children to sudden cardiac arrest prior to Covid-19 are furious by your assumptions. By making these assertions you are preventing people from getting a life saving vaccine while also giving people the FALSE idea that this won't happen to them if they don't get the vaccine.

You're part of the problem please stop making damaging comments and do your research.

Grace McCubbin

Robin Hockensmith none of this is true and it's not articulate at all. It's obvious you can't tell the difference between real information and Russian propaganda. They don't even deny it you know. That they flooded American Facebook with misinformation and propaganda about Covid 19 specifically to create dissent. They have publicly admitted it, they don't even try to hide it anymore. And yet people like you are still believing and spreading it around. I should be angry but I'm just sad. Please please believe in science and trust actual scientists please you are actively killing people with your conspiracy crap.

Grace McCubbin

Robin Hockensmith I don't believe for one moment that you even have the cognitive capacity to do the type of research you would need to do to be able to have the information you claim. You're literally falling for Russian propaganda. You're Donald Trump's favorite kind of voter, the uneducated and easy to lie to.

ShesAll Right I don't watch videos to get information I READ scientific studies and I have never met a doctor who has ever agreed with any of this.

My Take...

This is an extremely important case because it proves that COVID-19 mRNA vaccine induced myocarditis can lead to a sudden cardiac arrest not just during exercise (seen when athletes collapse on the field), or during early morning hours (when there is a surge in stress hormones preparing your body to wake up).

COVID-19 vaccine induced myocarditis can strike AT ANY TIME.

This 16 year old boy flatlined. TWICE. He was extremely lucky that there was a nurse who shocked him with a defibrillator repeatedly and brought him back to life.

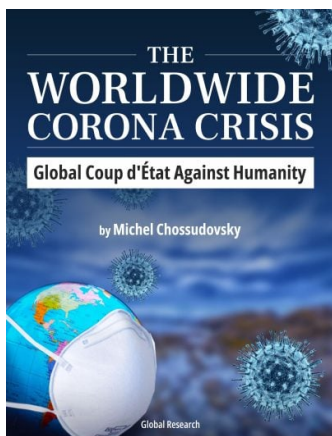

His mother's ignorance almost killed him.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
