The European (EEA and non-EEA countries) database of suspected drug reaction reports is [EudraVigilance](#), verified by European Medicines Agency (EMA), and they are now reporting 32,649 fatalities, and 3,003,296 injuries, following COVID-19 injections.

This database maintained at EudraVigilance is only for countries in Europe who are part of the European Union (EU), which comprises 27 countries.

The total number of countries in Europe is much higher, almost twice as many, numbering around 50. (There are some differences of opinion as to which countries are technically part of Europe.)

So as high as these numbers are, they do NOT reflect all of Europe. The actual number in Europe who are reported dead or injured following COVID-19 shots would be much higher than what we are reporting here.

The EudraVigilance database (EEA and non-EEA countries) reports that through December 4, 2021 there are 32,649 deaths and 3,003,296 injuries reported following injections of four experimental COVID-19 shots:

- [COVID-19 MRNA VACCINE MODERNA \(CX-024414\)](#)
- [COVID-19 MRNA VACCINE PFIZER-BIONTECH](#)
- [COVID-19 VACCINE ASTRAZENECA \(CHADOX1 NCOV-19\)](#)
- [COVID-19 VACCINE JANSSEN \(AD26.COV2.S\)](#)

From the total of injuries recorded, almost half of them (1,409,643) are serious injuries.

“Seriousness provides information on the suspected undesirable effect; it can be classified as ‘serious’ if it corresponds to a medical occurrence that results in death, is life-threatening, requires inpatient hospitalisation, results in another medically important condition, or prolongation of existing hospitalisation, results in persistent or significant disability or incapacity, or is a congenital anomaly/birth defect.”

A *Health Impact News* subscriber in Europe ran the reports for each of the four COVID-19 shots we are including here. It is a lot of work to tabulate each reaction with injuries and

fatalities, since there is no place on the [EudraVigilance](#) system we have found that tabulates all the results.

A banner for EudraVigilance, the European database of suspected adverse drug reaction reports. It features the European Union flag logo on the left. The text reads: "EudraVigilance - European database of suspected adverse drug reaction reports". Below this, a paragraph states: "The European Medicines Agency publishes these data so that its stakeholders, including the general public, can access information that European regulatory authorities use to review the safety of a medicine or active substance. Transparency is a key guiding principle of the Agency." The main section of the banner has a black background with white text: "COVID-19 Vaccine Adverse Drug Reactions", "32,649 DEAD", "3,003,296 Injuries Through Dec 04, 2021". Below this, it lists the vaccine types: "COVID-19 MRNA VACCINE MODERNA (CX-024414)", "COVID-19 MRNA VACCINE PFIZER-BIONTECH", "COVID-19 VACCINE ASTRAZENECA (CHADOX1 NCOV-19)", and "COVID-19 VACCINE JANSSEN (AD26.COV2.S)". At the bottom, there are logos for the "EUROPEAN MEDICINES AGENCY" (with the tagline "SCIENCE MEDICINES HEALTH") and "EudraVigilance".

*These totals are estimates based on reports submitted to [EudraVigilance](#). Totals may be much higher based on percentage of adverse reactions that are reported. Some of these reports may also be reported to the individual country's adverse reaction databases, such as the U.S. VAERS database and the UK Yellow Card system. The fatalities are grouped by symptoms, and some fatalities may have resulted from multiple symptoms.
