*The European (EEA and non-EEA countries) database of suspected drug reaction reports is [EudraVigilance](#), verified by the European Medicines Agency (EMA), and they are now reporting 38,983 fatalities, and 3,530,362 injuries following injections of four experimental COVID-19 shots:*

- [COVID-19 MRNA VACCINE MODERNA \(CX-024414\)](#)
- [COVID-19 MRNA VACCINE PFIZER-BIONTECH](#)
- [COVID-19 VACCINE ASTRAZENECA \(CHADOX1 NCOV-19\)](#)
- [COVID-19 VACCINE JANSSEN \(AD26.COV2.S\)](#)

From the total of injuries recorded, almost half of them (1,672,872 ) are serious injuries.

“Seriousness provides information on the suspected undesirable effect; it can be classified as ‘serious’ if it corresponds to a medical occurrence that results in death, is life-threatening, requires inpatient hospitalisation, results in another medically important condition, or prolongation of existing hospitalisation, results in persistent or significant disability or incapacity, or is a congenital anomaly/birth defect.”

A *Health Impact News* subscriber in Europe ran the reports for each of the four COVID-19 shots we are including here. It is a lot of work to tabulate each reaction with injuries and fatalities, since there is no place on the [EudraVigilance](#) system we have found that tabulates all the results.

Since we have started publishing this, others from Europe have also calculated the numbers

and confirmed the totals.\*

Here is the summary data through January 29, 2022.

\*These totals are estimates based on reports submitted to [EudraVigilance](#). Totals may be much higher based on percentage of adverse reactions that are reported. Some of these reports may also be reported to the individual country's adverse reaction databases, such as the U.S. VAERS database and the UK Yellow Card system. The fatalities are grouped by symptoms, and some fatalities may have resulted from multiple symptoms.

On January 29, 2021 a mass funeral protest for children who have died after receiving a Pfizer vaccine was held in Geneva, Switzerland.

Someone recorded the event and made a short video. This is on our [Bitchute Channel](#), and also on our [Telegram channel](#).

In Canada today, it was reported that a judge ruled that a mother could give COVID-19 vaccines to her children over the objections of the children's father, and suspended the father's right to spend time with his children.
