Liestal, Switzerland

Hi guys, over last 10 days I became severely ill again homebound unable to do much. My body is too weak to fight this illness and I have no more strength so I made decision to end my life at Pegasos association in Switzerland. I was diagnosed with untreatable chronic neurological illness ME/CFS caused by booster jab on top of having suspected respiratory ALS. This illness made me disabled, unable to work or have social life and unable to enjoy life all together. Breathing have become more and more difficult and painful for me and my lung function has been declining. Thank you for all your friendship and support over last year. The booster jab I received over year ago destroyed my health, my body and my life completely. There is no other way to end my suffering other than the decision I made.

Sick From the Jab, A Young Actress Chose To End Her Own Life

Kat Pave documented the progress of her disorders caused by the jab on Instagram. Finally, she was unable to go on living.

“Kat was an actress, so she also had to follow the vaccine requirements stipulated by the entertainment industry and unions if she wanted to be able to work. But then Kat became very sick. So sick that last week, she chose to end her life at a Swiss clinic specialized in assisted suicide.” ([click here](#))

“This past weekend, Kat’s friends – many of them in entertainment – held a picnic and a last farewell for their actress friend on a beach in Malibu.” ([click here](#))

In July 2021, Kat worked with Uma Thurman on a movie. COVID-19 vaccine mandates were not in place yet.

Post

In late 2021, Kat worked on the Brad Pitt and Margot Robbie movie “Babylon” – was she required to be COVID-19 vaccinated to have a role in the movie?

Kat was an avid traveler, traveling to Hawaii in June/July 2021 and Greece in August 2021.

“The booster jab I received over a year ago destroyed my health, my body, and my life completely”

Kat would probably have received her COVID-19 mRNA vaccine booster shot in Los Angeles either in Dec. 2021 or early 2022.

What COVID-19 vaccine injuries did she suffer after the booster shot?

ME/CFS – Myalgic encephalomyelitis / chronic fatigue syndrome ([click here](#)) .

- People with ME/CFS are often not able to do their usual activities. At times, ME/CFS may confine them to bed. People with ME/CFS have overwhelming fatigue that is not improved by rest.
- ME/CFS changes people’s ability to do daily tasks, like taking a shower or preparing a meal.
- ME/CFS often makes it hard to keep a job, go to school, and take part in family and social life.
- At least one in four ME/CFS patients is bed- or house-bound for long periods during their illness.
- In addition to fatigue, patients with ME/CFS also suffer from a variety of other symptoms including post-exertional malaise, cognitive impairment, musculoskeletal pain, sleep dysfunction, sore throats, lymphadenopathy, orthostatic intolerance, and gastrointestinal symptoms.

ALS of the lung – Amyotrophic lateral sclerosis ([click here](#))

- ALS is a neuromuscular disorder characterized by respiratory muscle weakness and a progressive decline in lung function
- Death occurs within 3 to 5 years of onset, from respiratory complications

ME, CFS, ALS have been reported in “Long COVID”

Several studies have linked “long COVID” to ME/CFS, suggesting that the underlying cause of ME/CFS in patients with “long COVID” is an “aberrant and lasting immune response, possibly involving mast cells and microglia” ([click here](#))

For ALS, there are studies that report accelerated ALS disease progression after COVID-19 infection with “rapid functional decline” ([click here](#))

Nothing in the literature about COVID-19 mRNA vaccines and either CFS or ALS.

Kat was gaslit by her doctors (meaning they didn’t believe her).

kat.pave Medical gaslighting happening to all vax injured including myself! video by @nohj_85 - getting myocarditis diagnosis 1 year after his vaccine injury!!!

NSW, Australia – Melene Guevremont was injured by 3 Pfizer COVID-19 mRNA vaccines, now has symptoms of ALS and is wheelchair bound.

Nashville Angela ✓
@angelanashtn

Melene Guevremont's health started to deteriorate after her third Pfizer shot. She went from being an active mother to being in a wheelchair for the last six months. She has over 30 symptoms, some of which mimic Motor Neuron Disease (MND), Amyotrophic lateral sclerosis (ALS) and Guillain- Barré syndrome (GBS).

Mel, vaccine injury - Help Mel get Treatments

January 31 · 🌐

Well, I'm now disabled and in a wheelchair from the 3 C0v!d 🦠 (😞) and I've decided to share my story as there needs to be more awareness around the risks with these provisional 😞, regardless of whether you're pro or anti-😞.

Unfortunately, I'm not an isolated case. The censorship regarding global 😞 injuries is incommensurable and mainstream media will never paint the true picture of the severity of this new health crisis.

Do your research and please don't believe everything mainstream media tells you.

You can read my story on [jab_injuries_australia](#) on Instagram below.

Calgary, AB – Mark Staudinger had ME/CFS caused by reaction to COVID vaccination over a year and a half ago ([click here](#)).

My Take...

Can COVID-19 vaccines cause ALS? There is some anecdotal evidence that yes, it's possible, but it's rare. The mechanism is unknown but could be an aberrant immune (autoimmune?) response after COVID-19 vaccination.

There are some reports of ALS post COVID-19 vaccination in VAERS that are quite convincing for causation ([1645371](#))([1893118](#))([1916790](#))([1955385](#))([1976763](#))

In Kat's case, she may have developed ALS after COVID-19 vaccination, or she may have had ALS which was then accelerated by three COVID-19 vaccines with "rapid functional decline". I don't have enough information.

Can COVID-19 vaccines cause ME/CFS? It appears there is a much stronger connection here.

There is a very interesting association between EBV viral infection and ME/CFS. ([click here](#))

Even more interesting, is the fact that COVID-19 vaccines cause reactivation of dormant viruses, especially EBV. ([click here](#))

So COVID-19 vaccines may be causing ME/CFS directly through a dysfunctional immune response, or indirectly through viral re-activation of EBV, a virus that almost everyone has.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project "destroys people's lives". He provides a comprehensive analysis of everything you need to know about the "pandemic" — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

"My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the "deadly" COVID-19 "vaccine". This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument."
