The 5G danger can't be overstated.

5G (5th Generation) is now being actively rolled out in many cities around the world. Simultaneously, as awareness over its horrific health and privacy impacts is rising, many places are issuing moratoriums on it or banning it, such as the entire nation of Belgium, the city of Vaud (Switzerland) and San Francisco (USA).

Radiofrequency radiation (RF or RFR) and electromagnetic fields (EMF) are being increasingly recognized as new types of pollution – environmental pollution. Here are 13 reasons exposing the 5G danger, which could turn into an unmitigated health and privacy catastrophe if enough people don't rise up to stop it.

5G DANGER

If there was ever a time for
activists to step up
in the name of freedom,
truth, health, privacy
and sovereignty,
now is the time.

5G is a giant, inescapable
command and control grid that
eliminates all privacy and
allows every single person on
the planet to be surveilled
all the time.
