*WASHINGTON, D.C. — Those vaccinated against COVID-19 have a 26 percent higher mortality rate on average compared to those who declined the jab – and the death toll is even more staggering for vaccinated people under 50 years old, where mortality is 49 percent higher than for those unvaccinated.*

*The shocking numbers are based on government data from the United Kingdom and were brought to Senator Ron Johnson's (R-WI) attention by Josh Stirling, one of the nation's top insurance analysts and formerly Senior Research Analyst for U.S. nonlife insurance at Sanford C. Bernstein & Co.*

"Worst of all – the people who only took one dose of the vaccine have an approximately 145 percent worse mortality rate," Stirling said and explained that this even higher death rate applies to those who took the first shot and then had adverse reactions, making them stop the planned vaccination schedule.

*A slide from a presentation on excess mortality by insurance analyst Josh Stirling.*

"If you were to take these numbers and apply them to the United States, that ends up being something like 600,000 excess deaths per year," Stirling concluded.

Watch Josh Stirling's and former Blackrock executive Edward Dowd's testimony on vaccine-induced excess mortality below.

'The One Chart That Tells the Entire Story': Analysis Shows 26% Worse Mortality Among the Vaccinated

And "the people who are under the age of 50 who took the vaccine now have a 49% higher mortality rate," stated top insurance analyst Josh Stirling.

"And if you were to take... [pic.twitter.com/7O4kR8Z2Xa](https://pic.twitter.com/7O4kR8Z2Xa)
