Former US Senator Mike Gravel (D-AK) and Richard Gage, AIA, Founder of Architects & Engineers for 9/11 Truth Discuss Scientific Findings

National Press Club, Washington DC, 2:00 pm, Thursday, September 9, 2010

WASHINGTON, Sept. 7 — On Thursday September 9, 2010, Gravel and Gage will host a central press conference at the National Press Club in Washington, DC, presenting hard evidence that all *three* WTC skyscrapers on September 11, 2001, in NYC were destroyed by explosive controlled demolition.

Senator Gravel notes, "Critically important evidence has come forward *after* the original government building reports were completed."

This press conference will be webcast at [AE911Truth.org](#) and hosted concurrently in cities throughout the world.* Following the conference, there will be a mock debate during which public statements made by government investigators and other defenders of the official account will be presented and responded to in multimedia format. "They refuse to debate us in person," says Gage, "so we will let their public statements represent them."

Gage will release a media-friendly summary of his organization's findings, which are based on forensic evidence as well as video and eyewitness testimony that were omitted from official reports. He will show evidence that the WTC Twin Towers were not destroyed by jet plane impacts or fires, but by pre-set explosives and incendiaries. The non-profit organization, Architects & Engineers for 9/11 Truth, will also call for a grand jury investigation of government report lead engineers Shyam Sunder and John Gross of the National Institute of Standards and Technology. "They were in a position to know the evidence we have been presenting," says Gage.

Also speaking will be Florida State Professor Lance deHaven-Smith, who coined the academic term State Crimes Against Democracy (SCAD). Prof. deHaven-Smith has appeared on Good Morning America, the Today Show, NBC Nightly News with Tom Brokaw, CBS Nightly News with Dan Rather, and other national TV/radio shows.
