According to the [Daily Sceptic](#), documents obtained by doctor Dr. Melissa McCann as part of a Freedom of Information (FOI) request were shared at a conference on Covid gene drugs held in Brisbane, Melbourne and Sydney.

McCann reported on her extraordinary efforts to obtain these documents from the TGA which took six months. The doctor made the application after noticing an unexpectedly high number of patients with adverse events after a Covid injection at her clinic. She also noted a high number of reports of serious side effects in the official DEAN database, including the reported death of a 14-year-old in October 2021.

However, the TGA only published the case of a 21-year-old woman in the safety reports while some of the victims were as young as 7 years old. The reported deaths are listed in DEAN, but the assessment of causality is not visible to the public.

Australians have been falsely and misleadingly informed by the TGA that out of 973 reported deaths, only 14 have been linked as causally linked to the Covid shots. The causality assessment reports released as part of FOI prove this statement to be incorrect.

Lying to the public

The TGA safety report from November 2022 also stated: "There were no deaths in children or adolescents who were found to be related to the Covid 19 vaccination". However, the assessment reports demonstrating the causal role of the Pfizer vaccine in cases of seven- and nine-year-old children were presented to McCann in July 2022. They prove that this statement is also incorrect.

McCann was surprised to find that 10 of the 11 documents received were not published by the TGA.

When questioned, the TGA responded: "The decision maker noted that disclosure of the

documents could undermine public confidence and reduce the public's willingness to report adverse events to the TGA."

EuroMOMO also records rise in child deaths linked to jabs

Since the vaccines were approved by the European Medicines Agency (EMA) in 2021, initially for 12-15 year olds and then even for 5 to 11 year olds, the excess mortality among children has increased massively. According to new studies, it rose by 1,580 percent.

According to calculations by the portal *The Exposé*, the increase in deaths among up to 15-year-olds is now around 1,580 percent compared to the average before the Covid vaccines were approved. The portal refers to current statistics from EuroMOMO, in which figures from 27 European countries were collected and evaluated.

Children: From zero to high excess mortality

According to this, in the first 21 weeks of 2021, when no vaccinations were administered to children and adolescents, there were 346 fewer deaths than expected within the relevant age group in the EU countries examined – specifically a low mortality rate of minus 346 cases (or “zero excess mortality”). In the first Corona year 2020, there were 466 fewer deaths among children than in the years before Corona.

This was at a time when Corona was said to be at its peak and the myth was being spread that children were even the “main drivers” of the virus. In fact, their risk of transmission and infection was minimal and the number of serious cases in this population group was practically below the detection limit.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
