Doug Brignole

I have enough confidence in the vaccine, based on my research, to get it done. Those of you who think the vaccine kills people can use me as a test. If I die, you were right. If I don't die, and have no ill effects, you were wrong, and should admit it (at least to yourselves). Better yet, you should admit that you were misled, and tell the world who misled you, so other people can benefit by avoiding those fear mongers.

I'm vaccinated ! Well, the first of two. Let's get this done so we can get back to traveling, going to concerts, and having fun. My vaccine was yesterday, and I had no problem with it. My deltoid was a bit sore, but otherwise fine. We're all in this together, so let's do our share to beat it.

My Take...

Some people might be tempted to dismiss deaths of bodybuilders. Not me.

There are many deaths here that are highly suspicious, cardiac arrests, deaths in their sleep, and what I found particularly interesting, deaths with seemingly no explanation.

So many deaths that I had to remove the powerlifters and weightlifters and put them in a

separate substack article.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
