

Bombshell UK Data Destroys Entire Premise for Vaccine Push

The media can read just as well as me (maybe), but somehow it is left to me to report this.

This is an absolute game-changer.

The UK government just reported the following data, tucked away in their report on variants of concern:

Less than a third of delta variant deaths are in the unvaccinated.

Let me say that another way – two-thirds of Delta deaths in the UK are in the jabbed.

To be specific:

From the 1st of February to the 2nd of August, the UK recorded 742 Delta deaths (yes, the dreaded Delta has not taken that much life).

Out of the 742 deaths, 402 were fully vaccinated. 79 had received one shot. Only 253 were unvaccinated.

The report is [here](#).

But this is the crucial page. Look at the bottom line.

Table 5. Attendance to emergency care and deaths of confirmed and provisional Delta cases in England by vaccination status (1 February 2021 to 2 August 2021)

Variant	Age group (years)**	Total	Cases with specimen date in past 28 days	Unlinked	<21 days post dose 1	≥21 days post dose 1	Received 2 doses	Unvaccinated
Delta cases	<50	265,749	84,772	28,330	23,822	40,449	25,536	147,612
	≥50	33,736	13,803	2,989	195	5,640	21,472	3,440
	All cases	300,010	98,722	31,841	24,018	46,089	47,008	151,054
Cases with an emergency care visit§ (exclusion‡)	<50	8,449	N/A	70	756	1,127	694	5,802
	≥50	1,940	N/A	10	15	326	1,098	491
	All cases	10,391	N/A	82	771	1,453	1,792	6,293
Cases with an emergency care visit§ (inclusion#)	<50	10,975	N/A	119	953	1,368	864	7,671
	≥50	3,342	N/A	24	30	486	1,815	987
	All cases	14,319	N/A	145	983	1,854	2,679	8,658
Cases where presentation to emergency care resulted in overnight inpatient admission§ ((exclusion‡)	<50	1,970	N/A	35	136	203	153	1,443
	≥50	1,059	N/A	7	12	125	620	295
	All cases	3,030	N/A	43	148	328	773	1,738
Cases where presentation to emergency care resulted in overnight inpatient admission§ (inclusion#)	<50	3,084	N/A	61	211	298	224	2,290
	≥50	2,074	N/A	20	23	230	1,131	670
	All cases	5,159	N/A	82	234	528	1,355	2,960
Deaths within 28 days of positive specimen date	<50	71	N/A	2	4	4	13	48
	≥50	670	N/A	5	6	65	389	205

SARS-CoV-2 variants of concern and variants under investigation

Variant	Age group (years)**	Total	Cases with specimen date in past 28 days	Unlinked	<21 days post dose 1	≥21 days post dose 1	Received 2 doses	Unvaccinated
	All cases	742	N/A	8	10	69	402	253

Data sources: Emergency care attendance and admissions from ECDS, deaths from PHE daily death data series (deaths within 28 days). NHS trusts are required to submit emergency care attendances by the 21st of each month. As a result, the number of cases with attendances may show substantial increases in technical briefs prepared after the monthly cut-off, compared with other briefs from the same month.

Again, 402 deaths out of 47 008 cases in vaccinated; 253 deaths out of 151 054 cases in unvaccinated. If you get covid having been vaccinated, according to this data, you are much more likely to die than if you were not vaccinated!

Obviously some allowance must be made for more elderly people being vaccinated, but not enough to change the bottom line: this vaccine is not nearly as effective as advertised.

And with all its unknowns, and a much higher adverse reporting number than all other vaccines combined, a complete recalibration of global policy is the only moral option.

Countries around the world, as months pass since vaccinations, are experiencing a surge in vaccinated deaths and hospitalizations. [60% of hospitalizations in Israel are fully vaccinated patients.](#) (Hence the mad rush for untested boosters.)

The powers that be will not admit there is something terribly wrong. They will not acknowledge the clear science that people with natural immunity, and the young and healthy, do not need to take the risks of these injections. Read this [very important piece on natural immunity](#). Reliable studies showing the superiority of natural immunity are just ignored by our overlords.

Instead they will jab and jab and jab again. The vaccine passports will be renewable every six months. Countries are ordering up to 8 shots per citizen. The masks will not go away. Israel, the pre-eminent vaxxed nation, is in lockdown.

The report also made one other important admission:

- has started to recover as case numbers fall and capacity expands
- Delta variant accounted for approximately 99% of sequenced and 98% genotyped cases from 25 July to 31 July 2021
- PCR cycle threshold (Ct) values from routinely undertaken tests in England show that Ct values (and by inference viral load) are similar between individuals who are unvaccinated and vaccinated.
- the UK Genotype to Phenotype Consortium reports new data relating to VUI-21JUL-01 (B.1.621). There is evidence of reduction in pseudovirus

In other words, getting vaccinated to protect others is not true!

This is NOT a sterilising vaccine that stops diseases like polio or hepatitis using live virus. This is for you alone. Which means, as experts like Martin Kulldorff, biostatistician, epidemiologist and professor of medicine at Harvard Medical School, and Jay Bhattacharya, professor of medicine at Stanford University and research associate at the National Bureau of Economic Research, [have long said](#), it makes zero sense to vaccinate the young and healthy.

We are dealing with a world-historical error, and in fact a global assault on young bodies.

To be clear, I make no advice to anybody about taking the vaccine or not. I may well have decided to take it if I were in a risk category, or if I knew I did not have to wear a mask or get tested after taking a single shot. Your decision should be guided by consulting with a doctor, informed consent, and your own conscience.

And you should ask yourself why there is no explanation for the hundreds of thousands of [women experiencing menstrual changes](#) after the shot, or the way vaccines are being mandated at the same time they are under investigation [for unknown risks](#).

What I will say categorically is that you will have to answer one day, in this life or the next, for where you stood on the issue of mandating medicine for the healthy without informed consent, on giving cover for governments to shove things down kids' noses, and locking down all that makes life worthwhile. Where were you when kids' freedoms were stolen from them? I doubt there will be much forgiveness from that generation.

Every time somebody posts a meme mocking vaccine hesitance, not only do they alienate the hesitant, and radicalize them, they implicitly endorse a new police state in which a liberal government like Australia feels empowered [to pepper spray kids in the face](#) for not wearing a mask that has not been conclusively shown to prevent viral transmission.

For crying out loud, this what even the World Health Organization [admits](#) about masks:

Guidance on mask use in community settings

Evidence on the protective effect of mask use in community settings

At present there is only limited and inconsistent scientific evidence to support the effectiveness of masking of healthy people in the community to prevent infection with respiratory viruses, including SARS-CoV-2 (75). A large randomized community-based trial in which 4862 healthy participants were divided into a group wearing medical/surgical masks and a control group found no difference in infection with SARS-CoV-2 (76). A recent systematic review found nine trials (of which eight were cluster-randomized controlled trials in which clusters of people, versus individuals, were randomized) comparing medical/surgical masks versus no masks to prevent the spread of viral respiratory illness. Two trials were with healthcare workers and seven in the community. The review concluded that wearing a mask may make little or no difference to the prevention of influenza-like illness (ILI) (RR 0.99, 95%CI 0.82 to 1.18) or laboratory confirmed illness (LCI) (RR 0.91, 95%CI 0.66-1.26) (44); the certainty of the evidence was low for ILI, moderate for LCI.

The vaccines will not end these measures, especially in countries with low vaccination rates. They cannot, unless these governments admit their massive errors. Their booster shot push makes this unlikely.

Finally, why does the media not even report on governmental data? Why am I reporting this stuff?

I have no idea, but it is truly sinister.

Ask yourself why the media will not even mention the fact that this 23-year-old Irish footballer below, in perfect health, received a vaccine three days before dropping dead:

Irish community in mourning as tributes paid to talented young sportsman after 'untimely' death

The talented sportsman, who died after a short illness on Tuesday, enjoyed huge success as a football player with Villa FC and Waterford United
