The saga of the Nord Stream blow-up has been confusing, and confused with multiple reporting on who-did-it, and who did not do it, who had an interest, about the motives, and who was most suffering from the blast. It seems the saga never ends.

Perhaps it should not end before the truth has been found – and before the culprits are brought to justice, because this is a crime of tremendous proportion.

In early February 2023, US investigative journalist Seymour Hersh released a report based on secret but he says highly reliable sources, providing details of how the US intelligence agencies planned the sabotage ordered by US President Joe Biden (confirmed at press conference on 7 February 2022).

President Joe Biden: “If Russia invades that means tanks and troops crossing the border of Ukraine again, then “There will be no longer a Nord Stream 2”

Reporter: “But how will you exactly do that, since the project is in Germany's control?”

Biden: “We will, I promise you, we will be able to do that.” (emphasis added)

J

Seymour Hersh revealed how the US Navy carried out the bombing with the cooperation of Norwegian forces. After the report was published, Washington quickly denied it.

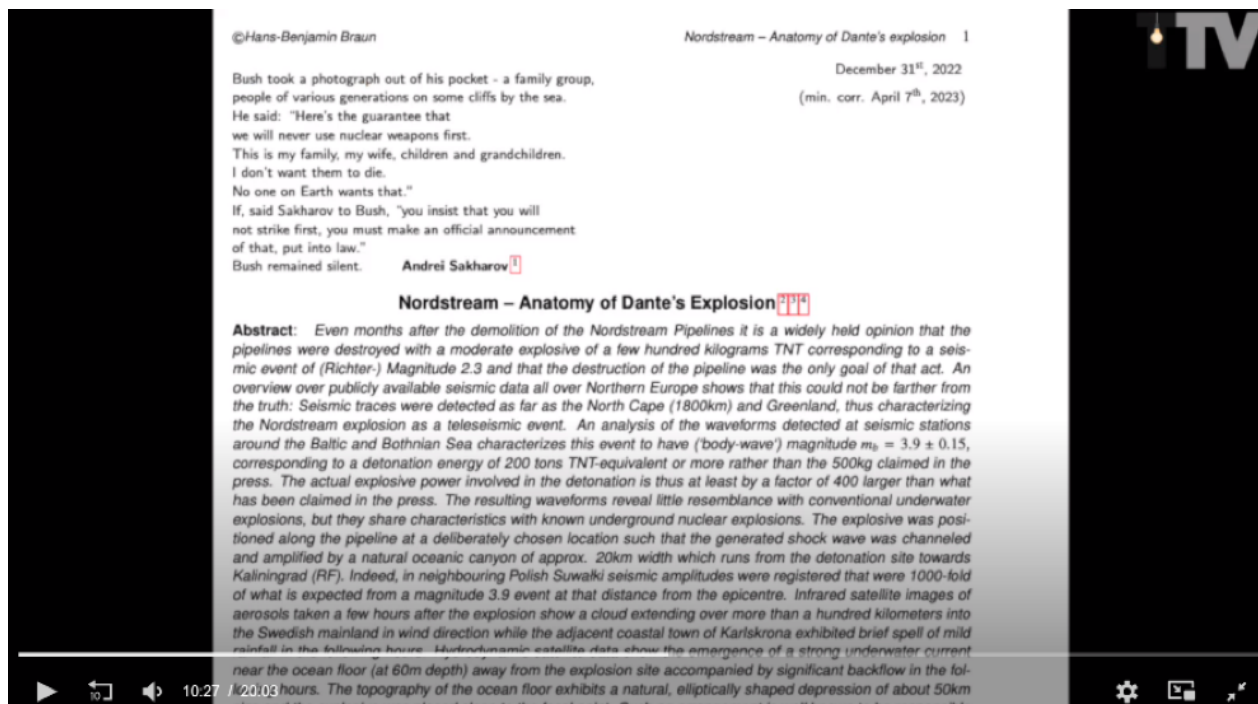

The Blame Game. Who Did It?

This was the beginning of the blame game, who did it, how was it done and what were the motives. This speculative debate has not ended – and there is no end in sight.

An Underwater Tactical Nuclear Device?

However, about a month ago, *Bombshell* news, what appears to be evidence for the “How”, emerged. According to mathematician, physicist and geoscientist Professor Hans Benjamin Braun, the pipelines were devastated by an underwater tactical nuclear device.

This was reported by Swiss journalist Christoph Pfluger during his weekly Swiss “Transition TV” or TTV news show. See screenshot of Abstract (below), of Professor Braun’s report. [Scroll dow for link to complete report of Professor Hans Benjamin Braun](#)

Following initial accounts, moderate explosives of a few hundred kilograms of TNT were responsible for the destruction. That would correspond to a seismic reaction of a (Richter) Magnitude of 2.3.

However, after a review of publicly available seismic data throughout Northern Europe, this could not be further from the truth.

“Seismic traces were reported as far as the Nord Cap (1,800km from the detonation) and Greenland, thus, characterizing the Nordstream explosion as a teleseismic event. An analysis of the wave-forms detected at seismic stations around the Baltic- and Bothnian Sea, characterizes this event as having a detonation energy of 200 tons of TNT equivalent or more, rather than the 500 kg claimed in the press”, says Professor Braun in his report.

This is an explosive power at least 400 times larger than claimed. The resulting wave-forms share characteristics with known underground nuclear explosions. Professor Braun concludes that only a nuclear explosion could produce these effects, which also include the extreme warming of the seabed, strong underwater currents, and the radioactive fallout that could be measured even in Switzerland.

For the full Swiss TTV report on the Nord Stream presumed nuclear devastation, see [this](#). The news report is in German. The section on the pipeline explosion starts at min. 9:45. Professor Braun’s report, of which a screenshot of the Abstract, you see above, is in English.

[Translated into English, click Screen Below:](#) (starts at 5'27", following the presentation in German)

After Professor Braun finished his study, he handed it to several colleagues for peer review, among them three physics Nobel Laureates. In April 2023, the final report was handed to the governments concerned, including Sweden, Finland, Poland, as well as NATO's Secretary General, Russia's Ambassador in Switzerland, as well as to the UN Security Council, which at that time was chaired by Russia.

Nordstream – Anatomy of Dante's explosion 1

Bush took a photograph out of his pocket - a family group,
people of various generations on some cliffs by the sea.
He said: "Here's the guarantee that
we will never use nuclear weapons first.
This is my family, my wife, children and grandchildren.
I don't want them to die.
No one on Earth wants that."
If, said Sakharov to Bush, "you insist that you will
not strike first, you must make an official announcement
of that, put into law."
Bush remained silent.

Andrei Sakharov^[1]

Nordstream – Anatomy of Dante's Explosion^{[2][3][4]}

Abstract: *Even months after the demolition of the Nordstream Pipelines it is a widely held opinion that the pipelines were destroyed with a moderate explosive of a few hundred kilograms TNT corresponding to a seismic event of (Richter-) Magnitude 2.3 and that the destruction of the pipeline was the only goal of that act. An overview over publicly available seismic data all over Northern Europe shows that this could not be farther from the truth: Seismic traces were detected as far as the North Cape (1800km) and Greenland, thus characterizing the Nordstream explosion as a teleseismic event. An analysis of the waveforms detected at seismic stations around the Baltic and Bothnian Sea characterizes this event to have ('body-wave') magnitude $m_b = 3.9 \pm 0.15$, corresponding to a detonation energy of 200 tons TNT-equivalent or more rather than the 500kg claimed in the press. The actual explosive power involved in the detonation is thus at least by a factor of 400 larger than what has been claimed in the press. The resulting waveforms reveal little resemblance with conventional underwater explosions, but they share characteristics with known underground nuclear explosions. The explosive was positioned along the pipeline at a deliberately chosen location such that the generated shock wave was channeled and amplified by a natural oceanic canyon of approx. 20km width which runs from the detonation site towards Kaliningrad (RF). Indeed, in neighbouring Polish Suwalki seismic amplitudes were registered that were 1000-fold of what is expected from a magnitude 3.9 event at that distance from the epicentre. Infrared satellite images of aerosols taken a few hours after the explosion show a cloud extending over more than a hundred kilometers into the Swedish mainland in wind direction while the adjacent coastal town of Karlskrona exhibited brief spell of mild rainfall in the following hours. Hydrodynamic satellite data show the emergence of a strong underwater current near the ocean floor (at 60m depth) away from the explosion site accompanied by significant backflow in the following hours. The topography of the ocean floor exhibits a natural, elliptically shaped depression of about 50km size and the explosive was placed close to the focal point. Such an arrangement is well known to be responsible for strong focussing effects of shockwaves towards the underwater channel directed towards Kaliningrad. This explains the extraordinary seismic amplitudes detected along that direction as registered in Suwalki. These facts point towards a controlled and carefully prepared attack not only on Nordstream but also on the Russian exclave of Kaliningrad.*

The author also refers to the UN NPT Art.3 [2] [Original version: <https://www.un.org/disarmament/wmd/nuclear/npt/text>] which states that any non nuclear weapon state which is a signatory of this treaty (in this case Switzerland) is obliged to invoke security measures that have the goal to prevent nuclear materials from being diverted from their peaceful use for the use in nuclear weapons and other nuclear devices. The NPT also states that "each of the Parties to the Treaties undertakes to pursue negotiations in good faith on effective measures relating to cessation of the nuclear arms race at an early date and to nuclear disarmament, and on a treaty on general and complete disarmament under strict and effective international control."

⁴Dante's Inferno and the nine circles of hell, cf. <https://www.thoughtco.com/dantes-9-circles-of-hell-741539>

What happened? Big silence.

None of the countries concerned, not even Russia, and of course not NATO, seems to have an interest to escalate the case, demonstrating to the world that presumably Washington / NATO does not shy away from using a nuclear device to destroy the energy supply that fuels

the German and European economy. *And that we are indeed already in a nuclear war.*

Motives for the “Sabotage”

Officially, the motives were nothing less than making sure that the “sanctions” on Russia over the Ukraine war would hold, could not be broken by Germany under pressure from Germany’s business and manufacturing community. Germany’s economy was going to suffer tremendously without cheap Russian gas.

Unofficially, there is a secret plan by the corporate financial cabal, a plan wholly integrated into the UN Agenda 2030 and the WEF’s Great Reset, to bring the western economies, particularly the ones of Europe and the US, down, possibly to a full-blown ruin. Number one instrument is depriving the economies of energy.

This goes hand in hand with the cabal’s depopulation agenda – also an integral part of the Great Reset and Agenda 2030. Achieving both these targets would make it easier to initiate and implement a new world order, based on full digitization and Artificial Intelligence (AI). The surviving humans would become electronically manipulatable transhumans which could be “turned on and off”, so to speak, as needs dictate.

The entire UN system is sold to the unnamed corporate financial behemoth. UN Agenda 2030 is not just comprising the 17 noble Sustainable Development Goals (SDG). It goes much farther. To understand what these SDGs really mean – see [this](#).

As to “unnamed financial cabal”, the number one financier and supporter of the World Economic Forum (WEF) is BlackRock. The WEF is one of the main *executing agencies* of the Great Reset and Agenda 2030.

The cabal is not there yet, and with humanity’s strength and spiritual power, these dark forces shall not reach their objective.

The cabal knows perfectly well that the world’s economies are fueled by hydrocarbon and that this will remain the main source of energy for the foreseeable future.

The propaganda and hubris talk about “*climate change*” no end, when *real science* knows that *real* climate change happens all the time, has happened for the last 4.5 billion years, since Mother Earth exists. Its main cause of influence is the sun – 97%-plus – and it has nothing to do with CO2 generated by man’s activities and economies. The ever ongoing natural process is slow so nature and sentient beings may adjust.

The brutal changes in weather and climate that we increasingly experience in the last decade or so, are wantonly man-made, meaning they are part of Environmental Modification (ENMOD) technologies called geoengineering. They include numerous highly sophisticated and scientifically studied technologies, which are capable of modifying the composition of the higher atmosphere to bring about rapid weather / climate changes – hot, cold, drought, flooding.

Drought, flooding, in rapid succession can and does destroy vital food crops, fertile agrarian lands, infrastructure, housing, and wellbeing of people. It causes, famine, misery, and death – and a bleak future.

Geoengineering can be targeted on specific societies, countries, or regions of the world.

There is much similarity with potential nuclear warfare. See also [this](#).

The chemicals and methods used in geoengineering – even satellites are used – are protected by hundreds of patents, of which the public at large has no idea. And of course, mainstream media is generously paid to remain silent about it.

In order to fight this massive crime on humanity, We, the People, must wake up, and take matters under OUR, We, The People's control – NOW.

With every day we refuse to wake up, we move a step closer to the abyss of no return. We are seconds before midnight and must act NOW.
