In all major regions of the world, the economic recession is deep-seated, resulting in mass unemployment, the collapse of state social programs and the impoverishment of millions of people.

The meltdown of financial markets was the result of institutionalized fraud and financial manipulation. The economic crisis is accompanied by a worldwide process of militarization, a "war without borders" led by the U.S. and its NATO allies.

"This important collection offers the reader a most comprehensive analysis of the various facets - especially the financial, social and military ramifications - from an outstanding list of world-class social thinkers."
