

# Brussels Becomes First Major City to Halt 5G Due to Health Effects

By [Josh del Sol](#)

[Collective Evolution](#) 2 April 2019

Region: [Europe](#)

Theme: [Environment](#), [Science and Medicine](#)

*The statement was made by Céline Fremault, the Minister of the Government of the Brussels-Capital Region, responsible for Housing, Quality of Life, Environment and Energy. From an interview last Friday, with L'Echo:*

"I cannot welcome such technology if the radiation standards, which must protect the citizen, are not respected, 5G or not. The people of Brussels are not guinea pigs whose health I can sell at a profit. We cannot leave anything to doubt."

- Céline Fremault, Minister of the Government (Brussels-Capital Region), responsible for Housing, Quality of Life, Environment and Energy

Ms. Fremault accurately identified that a 5G pilot project is not compatible with Belgian radiation safety standards (9 V/m, or 95 mW/m<sup>2</sup> according to this [online converter](#)), and stated that she does not intend to make an exception. (In the Building Biology [guidelines](#), the threshold for *extreme concern* is 1 mW/m<sup>2</sup>. However, many government agencies still only consider thermal effects, instead of the cumulative body of thousands of peer-reviewed scientific studies.)

Perhaps with Brussels heading up the European Union, and with one of the two major 5G appeals being [addressed to the EU](#), officials there are better informed and motivated to protect themselves.

May support increase for Ms. Fremault and all officials who are hearing the call to sanity and prioritizing the people over the technocratic oligarchy.

2-MINUTE ACTION: To send a brief note of support to Ms. Fremault, [go here](#); and to Brussels city councilors, [go here](#). Encourage them of the importance to keep this ban permanent, despite industry's forthcoming pressure.

## The 5G Situation in Summary

There is almost no question that a 5G-world would place us all under an unprecedented level of surveillance and control; granting unheard-of powers to soulless corporate algorithms.

That should be enough to permanently delete the agenda right there, filed under "useful

*technology gone bad."*

Though perhaps an even bigger question for our time is: does 5G pose a major threat to all biological life? The [independent evidence](#) overwhelmingly indicates that it does.

That is, unless you ask wireless industry sources, who [own the FCC](#) and who recently put out [this CNBC propaganda/commercial](#) in a thinly-veiled attempt to quash pushback.

The talking heads of the wireless industry even [brashly admit](#) — when forced, in a US senate hearing — that they have not done any safety studies... and they don't plan to.

The fact is, [hundreds of scientists](#) are trying everything to sound the alarm.

One such voice, Dr. Martin Pall, the WSU Professor Emeritus whose research actually lays out the mechanism of *how* wireless radiation causes harm in our cells, calls 5G "[the stupidest idea in the history of the world](#)."

However, within the corporatized halls of government, there is a well-worn pattern of voices of reason being drowned out by the frothed frenzy of technocratic corporations, who envision 5G as an unprecedented economic opportunity for the [full-on commercial exploitation of reality](#).

But 5G pushback is starting to get viral. The compilation of truth assembled in [videos on 5G like this one](#) provides a much-needed reality-check on the shocking state of greed and depravation among the agenda-pushers in our world.

While it may sound stark, after observing this for a long while, to me it honestly now appears that those pushing this agenda are stuck in a type of hive-mind syndrome, so frenzied with dollar-signs and "us-versus-them" progress-obsessions that they are in a mode incapable of self-corrective thought. Or at the very least, incapable of seeing where all of this is obviously heading — for them and their kids, too.

When the industry sheep are being presented with an avalanche of scientific evidence for a catastrophe-in-the-making, and yet they refuse to listen and instead continue to tow the profit-pushing line, what becomes visible is the *shadow-expression of utter disdain for life*. That may sound harsh, but I encourage you to consider this deeply.

Perhaps it's the global, unconscious 'death wish' that is at the core of the 5G push. Perhaps this is also at the core of the desire to darkly exit the human condition via AI and transhumanism. Apparently this thought-form sees its escape and salvation through technology, instead of through humanity and/or our connection with divinity.

In any case, to any sane human with normal values, the situation is indeed bewildering. Though once we get over the distress, we are called into a kind of soul-led response. Perhaps it's first a resolve to be sovereign in our thoughts, and to be steward of our mind. Then, inspiration and true Connectedness come when we become involved in manifesting the bigger solution — the *choice* of a positive future.

On this path, our root challenge is to remember: the power in our individual reality is truly within each of us, because *who we are* is not limited to the realms of duality and separation that we experience here.
