Canadian Academics for Covid Ethics (CA4CE) is a group of researchers and scholars from fields spanning the natural and social sciences and humanities. We are greatly concerned about the mismanagement of the ongoing SARS-CoV-2 pandemic response in Canada and around the world. We are publicly funded experts trained in thinking through problems, integrating knowledge, and sharing our findings in written and spoken form. Therefore, it is our duty to raise these concerns.

Please note that the following publications and media appearances do not necessarily represent CA4CE-wide consensus and should always be attributed to the named author(s) or speaker(s).

Completed Group Publications

- **[Post-secondary COVID-19 policies in Canada must end](#)**. Troy Media, 27 September 2022. *In this commentary, we reiterate the ineffectiveness and outright absurdity of the "health & safety" policies for COVID-19 on Canadian post-secondary campuses. We extend the argument of the preceding open letter to mask mandates and natural immunity. References for scientific claims made include articles in Nature, Environmental Research and Public Health, and the Canadian Journal of Disability Studies, which are available upon request.*
- **[Re: Post-secondary COVID-19 vaccination policies in Canada must end now](#)**. Open letter, 27 August 2022. *Letter to our faculty colleagues, campus unions, and college and university administrators reminding them of worker rights to decline coerced medical treatments as well as updated public health recommendations that make campus COVID-19 vaccination policies unfounded and irrational. For references, see [Vaccination mandates on post-secondary campuses have run their course and must never return](#) and [Dr. Moore's press conferences](#).*
- **[COVID-19 vaccination policies at post-secondary institutions in Ontario](#)**. Open letter, 9 February 2022. *Letter to Ontario Premier Doug Ford, copied to*

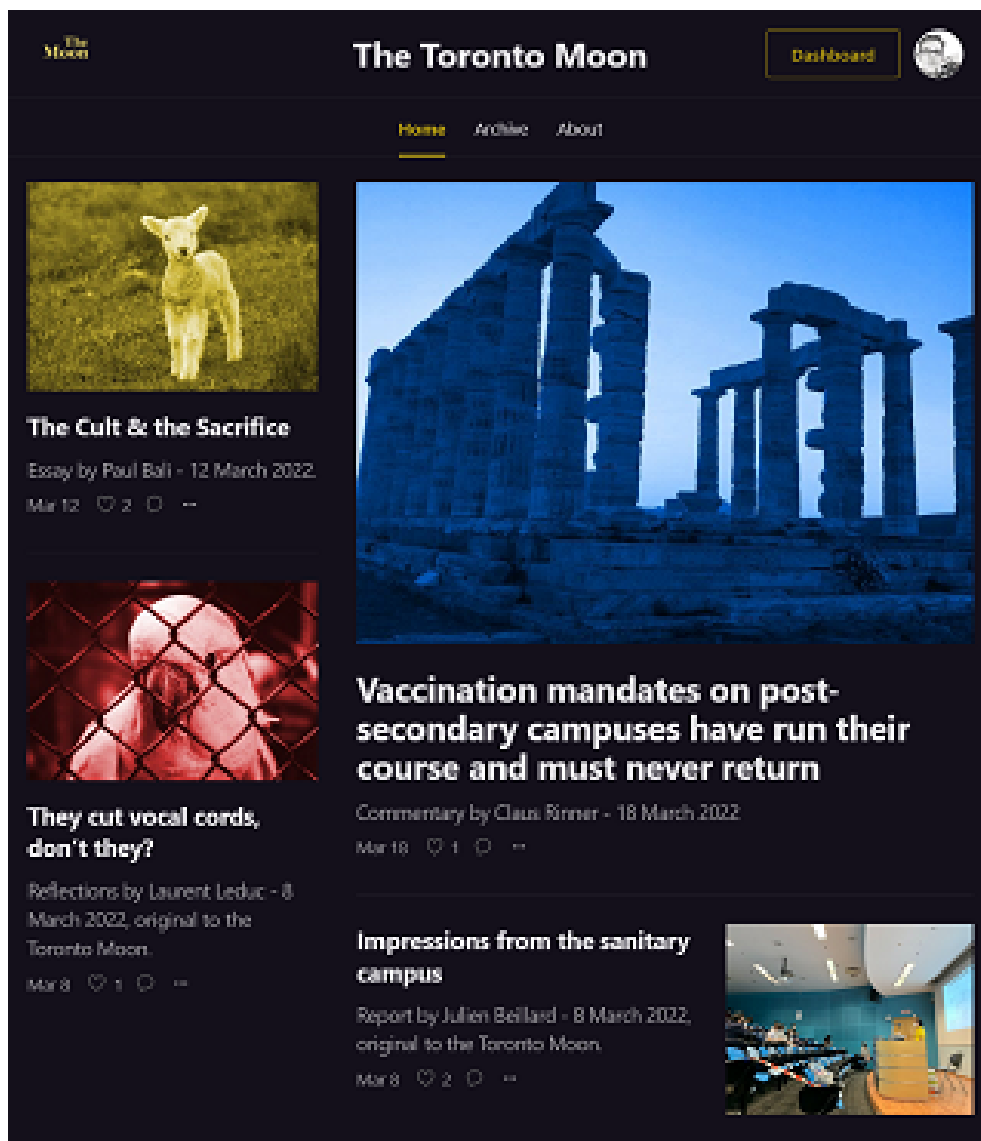

Ministers Dunlop (Colleges and Universities) and Elliott (Health) and Drs. Moore (Chief Medical Officer of Health) and Gardner (Chair, Council of Ontario MOHs), requesting the immediate removal of campus vaccination policies in light of recent acknowledgements that the COVID-19 vaccines do not prevent virus transmission.

- **[Another year of chaos at Ontario's universities and colleges.](#)** Troy Media, 23 December 2021. *In this article, we discuss the futile attempts at the province's higher-education institutions to return to a "normal" winter 2022 semester. We are concerned about the push for total vaccination of students and the impact of campus mandates on employees like ourselves.*
- **[Five facts all parents should know about the mRNA vaccines.](#)** Troy Media, 24 November 2021. *In this article, we remind parents that the available mRNA injections are experimental, genetic-based therapeutics not comparable to traditional childhood vaccines; that the under-powered safety trials were not designed to detect serious side effects such as myocarditis; and that children are at statistically zero risk from COVID-19. Therefore, applying an oft-cited "abundance of caution", we should not be vaccinating children, youth, or any other sensitive group.*
- **[Hands off our children!](#)** Open letter, 6 November 2021. Letter to Ontario Premier Doug Ford emphasizing the unfavourable benefit-risk ratio of COVID-19 "vaccines" for children, the minimal contribution of young people to the spread of SARS-CoV-2, and the existence of safe and effective drugs—written in response to a recent science brief by the Ontario COVID-19 Science Advisory Table titled "Behavioural Science-Informed Strategies for Increasing COVID-19 Vaccine Uptake in Children and Youth".
- **[Mandatory experimental shots - Canadians are being tricked, not treated.](#)** TrialSiteNews, opinion article, 1 November 2021. *Commentary on the experimental nature, unproven safety, and failing efficacy of the COVID-19 vaccines, co-authored with members of the Canadian Covid Care Alliance. Full text also available [here](#).*
- **[Response: COVID-19 vaccine mandates for Ontario's hospital workers.](#)** United Health Care Workers of Ontario, 28 October 2021. *Open letter to Premier Doug Ford providing scientific evidence supporting the right of health care workers to make an informed decision about their own health.*
- **[The problems with The Canadian Press - and those who spread its message.](#)** Exclusive to OpEdNews, 15 October 2021. *Rebuttal of a Canadian Press article that perpetuates misinformation about early treatment options for COVID-19 and uncritically reports on the silencing of an independent physician.*
- **[COVID Policies and Universities.](#)** Society for Academic Freedom and Scholarship, Newsletter No. 90, 10 October 2021. *Special issue containing several contributions by CA4CE members.*
- **[The Mandates, Restrictions and Propaganda: The Death Knell of Universities?](#)** Global Research - Centre for Research on Globalization, 7 October 2021. *Polemic arising from a group email thread about the failure of academics, faculty associations, and university leadership to support critical dialogue about the mishandling of the corona crisis.*
- **[The Greater Toronto Declaration.](#)** Petition, 5 October 2021. *We ask governments and public health officials to re-focus the global pandemic response on medical treatment options for the ill, encourage broader scientific and public discourse, and restore all suspended democratic processes and civil*

liberties.

- **Vaccine concerns weighed against natural immunity**. Ontario Civil Liberties Association, 21 September 2021. *Informational summary of the state-of-the-science on natural immunity against COVID-19 compared to the limited protection from the vaccines, written for a lay audience.*
- **Open Letter to Public Health Officers**. Ontario Civil Liberties Association, 13 September 2021. *Call for the resignation of all medical officers of health in Ontario, due to their unfounded, ill-advised, and unconstitutional emergency orders.*
- **A Letter to the Vaccinated**. Ontario Civil Liberties Association, 30 August 2021. *Open letter denouncing the transient nature of ‘fully vaccinated’ status and the growing rift in society.*
- **No, COVID-19 vaccine passports and mandatory vaccination do not ‘protect the health and safety of Canadians’**. Running title “Mandatory vaccination for COVID has no rational basis”. Toronto Sun, 24 August 2021. *Op-ed about the flawed logic of vaccine mandates given unproven impact on transmission, plus disregard for natural immunity after recovery.*
- **A Letter to the Unvaccinated**. Ontario Civil Liberties Association, 2 August 2021. *Open letter supporting the vaccine-hesitant in their decision.*
- **It’s time to follow the scientific method — and re-evaluate Canada’s COVID approach**. Toronto Sun, 28 June 2021. *Op-ed calling for updated science and risk/benefit analysis.*

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
