July 24, 2023 – Lebron James' 18 year old son Bronny James suffered a cardiac arrest during practice at 9:30am and had to be rushed to the hospital and ICU.

BRONNY JAMES SUFFERS CARDIAC ARREST ... During USC Workout

EXCLUSIVE

7/25/2023 7:24 AM PT

Getty

LeBron James' son, **Bronny**, was rushed to a hospital after suffering cardiac arrest during a basketball workout, **TMZ Sports** has learned.

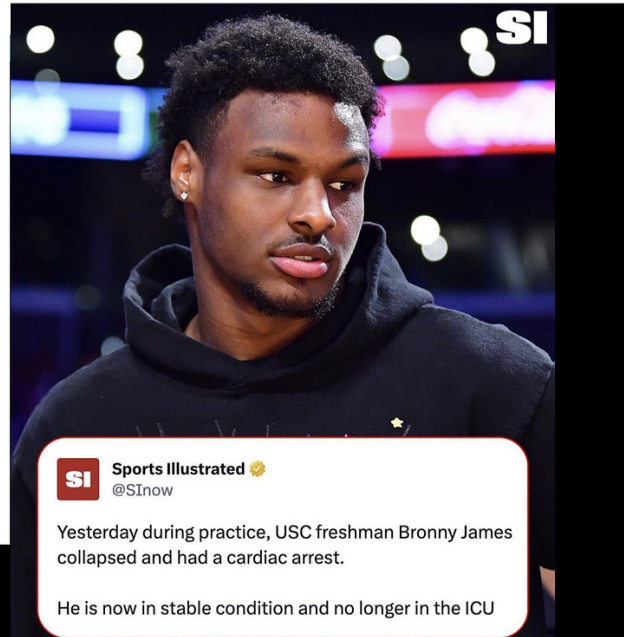

Our sources say it was a Code 3 -- meaning the ambulance lights and sirens -- which signifies the seriousness of the emergency.

Bronny is a rising talent in his sport -- he recently **committed to the Trojans** and is expected to end up in the NBA.

Bronny -- who was just recently seen looking fine at the ESPY Awards two weeks ago with his family -- was a 4-star recruit who averaged 14 points, 5 rebounds and 3 assists at Sierra Canyon during his senior season.

Sources with direct knowledge tell TMZ Sports ... a 911 call was made at 9:26 AM Monday from USC's Galen Center for -- the venue where the team plays and practices -- and the 18-year-old hooper, who was unconscious, was taken by ambulance to the hospital.

Was he COVID-19 vaccinated?

Looking at LeBron James' vaccination status after Bronny James goes into cardiac arrest

"I think everyone has their own choice to do what they feel is right for themselves and their family," said LeBron. "I know that I was very skeptical about it all, but after doing my research and things of that nature, I felt like it was best suited for not only me but for my family and my friends, and that's why I decided to do it."

Young people having cardiac arrests and surviving:

July 7, 2023 - Narooma, Australia - 17 year old Tom Haynes went into cardiac arrest while at school. Students & staff at Carroll College used a defibrillator. Tom is captain of football team U17 Narooma Lions.

Sydney Swans
@sydneyswans

This is 17-year old Tom Haynes from Narooma. 2 weeks ago he went into cardiac arrest while at school. The incredible students & staff at Carroll College used a defibrillator which saved his life.

Today Parks visited him in hospital ahead of his surgery which went well

Tom & his family are Swans members & he's the captain of the U17 Narooma Lions so it was only fitting our courageous and kind skipper went and brightened his (and his family's) day.

July 3, 2023 – 17 year old Long Island High School football player Robert Bush on life support after collapsing on July 3, 2023 “He had been on the field for 4 minutes before he bent over, then passed out due to a cardiac event at about 5pm” He received CPR & defibrillator but his brain went without oxygen for 45 minutes.

17-year-old Long Island high school football player Robert Bush on life support after collapsing on field: ‘Dealing with the end’

By Steve Janoski

July 6, 2023 | 7:07pm | Updated

Robert Bush, a 17-year-old football player from Selden, Long Island, is on life support after collapsing during conditioning drills at Newfield High School earlier this week, his family said.

Gofundme

But the teen never showed signs of having a heart condition, his family told the outlet.

Bush had joined the football team to improve his health and conditioning, his brother said.

A high school football player from Long Island is on life support after reportedly collapsing during conditioning drills at Newfield High School earlier this week.

Robert Bush, 17, of Selden, had only been on the field for about four minutes before he bent over, then passed out due to a “cardiac event” at about 5 p.m. on Monday, his older brother, Steve Bush, told *Newsday*.

Despite the efforts of his coaches — who performed CPR and shocked him with a defibrillator — and the emergency medical teams who rushed him to Stony Brook University Hospital, Bush went without blood or oxygen to his brain for at least 45 minutes.

“There’s no more brain function,” his brother said Thursday, adding that the teen is on life support.

“We are dealing with the end right now.”

Mar. 12, 2023 – Raleigh, NC – 17 year old cheerleader Keianna Joe, had a cardiac arrest

during a competition warm-up. She was saved with CPR & AED ([click here](#)).

'This is my baby... I have to save her': Heroic mother saves her 17-year-old daughter's life with CPR after the teen suffered a CARDIAC ARREST during a cheerleading competition

- Keianna Joe, 17, had been preparing for a cheerleading competition in Raleigh
- She collapsed and became unresponsive before mother Andrea began CPR
- The mother-of-three was eventually able to restart her daughter's heart

A mother-of-three has recalled her terrifying ordeal after she saved the life of her 17-year-old daughter when the teen went into cardiac arrest during a warm-up for a cheerleading competition.

Keianna Joe had been preparing for the event in Raleigh, **North Carolina**, earlier this month when she suddenly collapsed and became unresponsive.

Her mother Andrea, a certified medical assistant who works in a gynecology practice, leapt into action and began performing CPR for almost 10 minutes after not being able to find her daughter's pulse.

She was eventually able to restart Keianna's heart with doctors claiming that her quick thinking saved the teenager's life.

Lisa Marie · Dec 12, 2022 · 🌐

This is my son, he's 18 and checked out of Huron Vally Sinai Saturday afternoon after a 36 hr stay for diagnosed Covid 19 and acute pericarditis. Friday in the early morning hours I took him to the ER because he had severe chest pains, radiating up his neck and down his left arm. The EKG indicated "benign abnormalities" and then his blood work showed his troponin enzymes were 3500+. He had a heart attack. He's 18.

He went away to college in August and seemed to be sick as soon as he got there and couldn't seem to shake it. After some other, unrelated events, he ended up staying home and withdrawing from school. He's been home since thanksgiving.

They can't say definitively that COVID caused the myocarditis, but there is no other explanation and he tested positive for it. His internist said he's only seen this once in his career and it was in a 40 yr old. The infectious disease dr said there are other viruses that can cause myocarditis, but we have to wait up to 10 days to get the labs back for those tests. He also said the only way to confirm that covid caused this is to do a biopsy on the heart, which we will not be doing.

I know this is rare, but I just wanted to share with folks because I know his story won't make the news and I think we are all getting a little lax about the virus. Joe had the Pfizer vaccine and was double boosted. Stay safe out there friends. ❤️

Nov. 2022, Bradenton, FL – 19 year old decathlete Nick Migliarese went into cardiac arrest at track practice ([click here](#)).

19-year-old returns to IMG track less than 5 months after cardiac arrest during practice

By Kevin O'Donnell | Published April 17, 2023 | Sports | FOX 13 News | ➔

Nick Migliarese: Heart of a champion

Kevin O'Donnell reports

BRADENTON, Fla. - IMG's Nick Migliarese looks out over the track with a new appreciation for life. That's because last November, he collapsed at track practice.

"I was legally dead for three or four minutes," Nick told FOX 13.

Nick went into cardiac arrest. His heart just stopped.

Trainers performed CPR and jump started his heart. Nick arrived at the hospital in a coma and spent nine days recovering.

"Without them reacting as quickly as they did, we might not be having this conversation right now," said Mike.

SPORTS: 'Coming home': High school quarterback's journey brings him to Wiregrass Ranch for senior year

Initially, the diagnosis was a genetic mutation, but now doctors aren't sure why his heart failed. Nick has no memory of the incident and has a defibrillator implanted in his chest to monitor it in case it stops again.

Sep. 10, 2022 - 17 year old Tennessee athlete Gabe Higginbottom suffered a heart attack after a race.

Bartlett City Schools
September 13, 2022 · 🌐

Our thoughts and prayers are with this young man and his family.

Info posted from the Bartlett High School Boys Cross Country booster club:
On September 10th, after a race in Pensacola, FL, one of Bartlett High School's Cross-Country runners suffered a heart attack. Gabe Higginbottom, 17, a junior at Bartlett High School, was sent to Ascension Sacred Heart Pensacola Hospital at the advice of the on-staff medical team. Sacred Heart performed a CAT scan which revealed further action needed to be taken.

Gabe was transported to the UF Shands Heart and Vascular Hospital in Gainesville, FL by helicopter that night. In Gainesville, they found his right artery was completely blocked. The doctors performed an angioplasty to insert a balloon to open up that artery. Later, they performed a 3-hour surgery inserting two stents and found two blood clots.

Cross Country coach, Kris Harman, and Gabe's mother, Edrika, remain by Gabe's side, as he is currently recovering at the UF Shands in

Aug. 5, 2022 - 18 year old Drew Strasser, tennis player, collapsed during warm up at tennis practice, with a cardiac arrest. His teammate performed CPR while his coach used a defibrillator (AED) to shock him ([click here](#)).

Oct. 20, 2022, 2:51 PM MDT / Source: TODAY

By Meghan Holohan

Drew Strasser, 18, had just finished his warm-up laps at tennis practice when he lurched toward the wall to brace himself before slumping down, unconscious. His teammate and friend Jake jumped into action performing CPR on him while a coach, Jesse Atkinson, rushed to get an automated external defibrillator (AED) to jolt his heart. Their quick action likely saved the teen's life.

"I never would have thought it would be my kid," Laneia Strasser, 38, of Rochester, Indiana, told TODAY. "His friend, his 18-year-old teammate who works as a lifeguard — luckily he handled the situation right. Nobody knows how you're going to react to a situation like that, and he did what he needed to do."

Early practice ends in an emergency

On Aug. 5, Drew Strasser woke early and left the house at 5:30 a.m. to attend tennis practice. He drove himself to the school and started running warm-up laps in the gym when he suddenly collapsed.

Immediately, Jake started CPR while Atkinson rushed for the AED to assist while someone called 911. That day the team happened to be in the gym at the school, a lucky turn of events as there was no AED on the tennis courts.

"It wouldn't have been as likely that they could have saved his life with the AED had he not be inside the school in close proximity to it," Laneia Strasser said.

After experiencing sudden cardiac arrest, Drew Strasser spent nearly a week intubated and battling an infection. Soon after he was weaned off the ventilator, he began piecing together what happened.

KANSAS CITY, Mo. — A Blue Valley High School junior is headed back to class Wednesday and thankful to be alive. Just two weeks ago he collapsed at baseball practice from cardiac arrest.

Seventeen-year-old Davis Dwight was at Mac N Seitz for hitting practice with Coach Nikolaus Crouch.

“It’s an incident that keeps me up at night at times. It’s an incident that fills my mind and my heart,” Crouch said. “I was having a typical conversation with a 17-year-old kid about a situation that happened earlier with him – he broke his wood bat — and then two minutes into the conversation he just passed out.”

Crouch yelled for help and called 911. Coach and former Royals catcher Mike Macfarlane came running. They said Dwight was not breathing.

My Take...

The only prospective study ever done for COVID-19 mRNA vaccine induced myocarditis in young men:

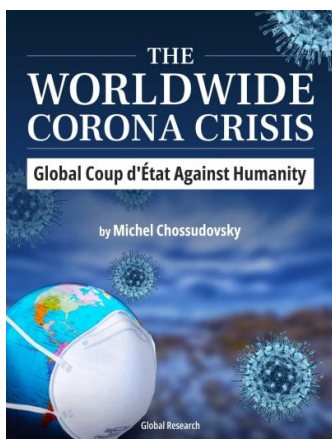

[Thailand study \(2022, Mansanguan\)](#), of 202 boys ages 13-18, from two different schools, 7 of them developed subclinical myo/pericarditis after 2nd Pfizer dose. That’s a ratio of 1 in 30 per Pfizer vaccine dose.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
