My beautiful niece, Annie Nelson, passed away unexpectedly yesterday. She was found unresponsive in her apartment by her boyfriend. We don't know the cause yet. She was only 24 years old.

Honestly, I haven't accepted that she is gone. She has been such a huge part of our lives, and been there for my girls in so many ways over the years, as a big sister, an older cousin, a mentor, an advice giver and a cheerleader as they have grown up. She has even helped me as I learn to parent teenagers!

Please keep our family in your prayers.

We will miss you so so much Annie. ❤️❤️❤️

Jan. 28, 2022 - 23 year old Argentine TikToker Valeria Silvestre died suddenly from cardiac arrest while travelling on a bus ([click here](#)).

**FAMOUS TIKTOK STAR DIED ON A BUS**

- A famous TikTok star passes away.
- She fell asleep on a bus.
- Her vacation ended in a tragic ending.

The tragedies do not stop for the influencers. Through the portal of **People in Spanish** it was reported that the well-known Argentine Tiktoker Valeria Silvestre, only 23 years old, **died** on a bus. Mile, who is her cousin, who reported the news on Tik Tok days ago had published photos of her vacation in Florianópolis, Brazil.

The portal reported that the followers could not believe the news, but Mile explained that her cousin fell asleep on the bus they were traveling on but when they tried to wake her up, she had unfortunately **suffered a cardiac arrest**. "They start doing CPR to revive her while they called an ambulance. They took her to a hospital and there they told us that she was gone," explained the Tiktoker's cousin.

«She had a cardiac arrest and left us,» he said. "I am telling you this because there are people who are saying that it is a lie. Do they think that me or my family would f@ck. with that? It doesn't give!". Valeria's cousin argued using TikTok to inform all his followers.

Valeria Silvestre had more than 400 thousand followers on TikTok. She became very popular on social media for her original and creative content, in which she mainly talked about literature, recommending many books and also liked comment on astrology, as reported by **People en Español**.

My Take...

The key question is: what cardiac risks do WOMEN face with COVID-19 vaccines?

Dr.Christian Muller ran a study on over 800 COVID-19 boosted healthcare workers in University Hospital, Basel, Switzerland called "Incidence, Patient Characteristics and Outcome of Myocarditis after COVID-19 mRNA Vaccine (MACIS)" ([click here](#)) (the study name is co-incidental!!)

He found: “there’s slight damage to heart muscle cells in almost 3% of the cases”. That’s about 1 in 30 ([click here](#)).

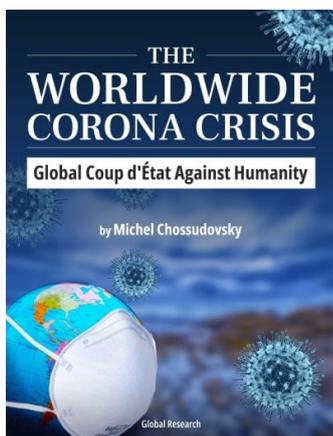

“When we look at our data with mild cases, we see this effect more often in women than in men – and not only at younger ages.”

“We don’t yet know the mechanism for how exactly the booster vaccine damages the heart muscle cells.”

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

*“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”*
