

Post-COVID Vaccination Heart Inflammation: CDC Refuses to Release Updated Information

'When appropriate, the updated safety data will be published,' a CDC spokesman said.

The U.S. Centers for Disease Control and Prevention (CDC) is refusing to release updated information on reported cases of myocarditis and pericarditis following COVID-19 vaccination.

COVID-19 vaccines can cause the inflammatory conditions, the CDC previously confirmed.

The agency has regularly conveyed the number of post-vaccination myocarditis and pericarditis cases reported to the Vaccine Adverse Event Reporting System (VAERS), which it helps manage, as it has consulted with its advisers on updates to the vaccines.

But during a meeting on Sept. 12, the CDC didn't mention VAERS data.

Asked for the information, a CDC spokesman pointed to [a CDC study](#) that covers data only through Oct. 23, 2022.

That study identified nine reports of myocarditis or pericarditis following vaccination with one of the bivalent COVID-19 vaccines, which were introduced in September 2022. Seven of the reports were verified by medical review.

Asked for more current data, the spokesman acknowledged that the agency has it but isn't making it public.

"When appropriate, the updated safety data will be published," the spokesman told The Epoch Times in an email.

"The CDC has acknowledged that heart inflammation is a complication of mRNA

COVID-19 shots and, yet, the only published data released by CDC officials about that complication is a seven-week study that ended on Oct. 23, 2022,” Barbara Loe Fisher, co-founder and president of the National Vaccine Information Center, said in an email to The Epoch Times.

“Where is more specific myocarditis/pericarditis data related to bivalent COVID shots for the past 10 months?”

The mRNA shots are made by Pfizer and Moderna. Novavax’s updated shot, which uses different technology, hasn’t yet been authorized by the U.S. Food and Drug Administration (FDA).

“I am tired of the CDC and FDA deciding what information the public needs and doesn’t need. This is precisely the information that parents need to have especially when there are still schools and activities mandating these shots. This is evil playing out right before our eyes,” Kim Witczak, a drug safety advocate who runs the nonprofit Woodymatters, told The Epoch Times in an email.

“The CDC’s response of ‘when appropriate, the updated safety data will be published’ is unacceptable and they wonder why there is vaccine hesitancy and lack of trust in public health officials.”

Presentation

During the recent meeting, CDC officials and their partners presented data on the bivalent shots to their advisory panel, the Advisory Committee on Immunization Practices. The advisers were considering which groups they should recommend get one of the new COVID-19 vaccines, which were [cleared by regulators](#) with scant clinical trial data.

Dr. Nicola Klein, a Kaiser Permanente doctor who works closely with the CDC, gave a presentation ([pdf](#)) on COVID-19 vaccine safety. She presented data from the Vaccine Safety Datalink, a monitoring system that covers a much smaller population than VAERS.

Dr. Klein said that two cases of myocarditis after bivalent vaccination were detected in the Vaccine Safety Datalink (VSD) through March 11. The cases didn’t trigger a safety signal among adults, Dr. Klein said. It isn’t clear why more current data weren’t presented.

Dr. Klein didn’t respond to a request for comment.

The presented data were widely cited by doctors quoted in news outlets, including Dr. Andrew Pavia, who [said](#) at a briefing that there didn’t appear to be a “detectable risk” of myocarditis caused by the bivalent shots.

“What I was conveying is that in the era of the bivalent vaccine, the number of cases has fallen to where it no longer is giving a signal that is detectable,” Dr. Pavia, chief of the University of Utah’s Division of Pediatric Infectious Diseases, told The Epoch Times in an email.

Regarding how the missing VAERS data affect the strength of that claim, he said, “The strongest data are from the controlled studies like the VSD where you have built-in

controls.”

Through Sept. 8, 98 cases of myocarditis, pericarditis, or myopericarditis were reported to VAERS following bivalent vaccination, according to a search of the system by The Epoch Times.

Although anybody can submit reports to VAERS, research has shown that most reports are entered by health care providers. People who submit false information can face prosecution.

Five reports were for people aged 6 to 17 years, and another 13 were for people aged 18 to 29.

When presenting to the panel, CDC official Megan Wallace said, “There are limited data to inform the myocarditis risk following an updated mRNA dose.”

She didn’t mention the cases reported to VAERS but alleged that the benefits of the vaccines outweigh the risks, even for young, healthy males. The Vaccine Safety Datalink, she acknowledged, did have a “relatively lower sample size” of recipients.

Dr. Oliver Brooks said after the presentation, “Feel good about the fact that in the bivalent we saw no signal from myocarditis.” Dr. Brooks, chief medical officer at Watts Healthcare Corp., didn’t respond to a request for comment.

Dr. Pablo Sanchez was the lone member who was against [a widespread recommendation](#), citing the risk of myocarditis.

“I think we really need to level with our patients and say what is known and unknown, rather than make a complete recommendation,” he said, “especially for some groups that there are limited data.”

The labels for the new vaccines say they can cause myocarditis.

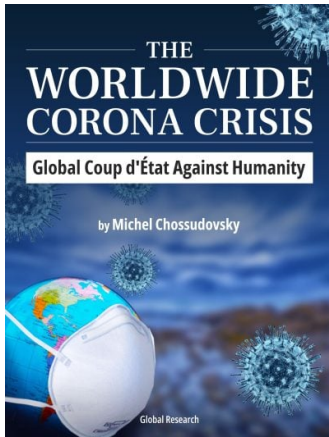

“Postmarketing data with authorized or approved mRNA COVID-19 vaccines demonstrate increased risks of myocarditis and pericarditis, particularly within the first week following vaccination,” the labels state. While some people have recovered, [others have not](#). The labels also say, “Information is not yet available about potential long-term sequelae.”

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom

loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
