

The Empire of Lies: ChatGPT’s “Artificial Intelligence” Knows U.S. War Criminals

Henry Kissinger, Bill Clinton, Dick Cheney, George W. Bush, Barrack Obama, Hillary Clinton, Joe Biden. No arrest warrants have been issued by the ICC in The Hague, Netherlands for any of them. Why?

As the Empire of Lies celebrates the International Criminal Court issuing an arrest warrant for Vladimir Putin, let’s revisit who the ICC really works for.

Watch war criminal John Bolton threaten to arrest ICC judges and go after their finances if they or any organization or company assist the ICC in taking any action against American war criminals:

I asked ChatGPT about the war crimes of American leaders and the following is what it returned...

Henry Kissinger

Henry Kissinger, a former U.S. Secretary of State, has been accused of being involved in

several war crimes during his time in office. Here are some of the main allegations against him:

1. The bombing of Cambodia: Kissinger played a key role in the secret bombing campaign in Cambodia during the Vietnam War, which led to the deaths of thousands of civilians. The bombing was carried out without the knowledge or approval of Congress or the American public.
2. Chilean coup and Operation Condor: Kissinger supported the 1973 coup in Chile that overthrew the democratically-elected government of President Salvador Allende and led to the establishment of a military dictatorship under General Augusto Pinochet. Kissinger also allegedly played a role in the creation of Operation Condor, a coordinated campaign of political repression and state terror carried out by several South American military dictatorships in the 1970s and 1980s.
3. East Timor invasion: Kissinger gave tacit approval to the Indonesian invasion of East Timor in 1975, which led to the deaths of up to 200,000 people. The invasion was widely condemned by the international community as a violation of international law.
4. Assassination plots: Kissinger has been accused of involvement in several assassination plots against foreign leaders, including Chilean General Rene Schneider and Cuban leader Fidel Castro.

Preparing for a visit to paedo island.

Bill Clinton

NATO and Bill Clinton have been accused of various war crimes during the conflict in the Balkans in the 1990s. Here are some of the main allegations:

1. The bombing of civilian targets: NATO carried out a bombing campaign against Serbia and Montenegro in 1999, which included the targeting of civilian

infrastructure such as bridges, power plants, and factories. The bombing led to significant civilian casualties and displacement.

2. Depleted uranium weapons: NATO forces used depleted uranium weapons during the conflict, which can cause long-term health problems and environmental damage.
3. Failure to prevent ethnic cleansing: Some critics have argued that NATO and Clinton did not do enough to prevent ethnic cleansing and other atrocities committed by Serb forces in Bosnia and Kosovo.
4. Violation of international law: Some legal experts and human rights groups have argued that the NATO bombing campaign violated international law, particularly with respect to the principles of proportionality and distinction between civilian and military targets.

Bill Clinton, as the President of the United States, oversaw the implementation of economic sanctions against Iraq in the 1990s. The sanctions restricted Iraq's ability to import goods and conduct international trade, leading to shortages of food, medicine, and other essential supplies.

Some estimates suggest that the sanctions contributed to the deaths of half a million Iraqi civilians, including many children. The sanctions were lifted in 2003, following the U.S.-led invasion of Iraq.

Dick

Cheney

There are a number of allegations and criticisms regarding Dick Cheney's actions as Vice President of the United States during the wars in Iraq and Afghanistan. Some of the most significant accusations include his role in:

1. Promoting the invasion of Iraq in 2003, which was based on faulty intelligence and led to the deaths of thousands of Iraqi civilians and US military personnel.
2. Authorizing the use of enhanced interrogation techniques, such as waterboarding, that are widely considered to be torture and violate international law.
3. Ignoring or condoning human rights abuses committed by US military personnel and contractors, such as the abuse and torture of prisoners at Abu Ghraib prison in Iraq.
4. Advocating for expanded executive powers and limiting congressional oversight in matters of national security, which some critics argue undermined democratic norms and principles.

While Cheney has defended his actions and argued that they were necessary to protect US national security, his record is controversial and has been subject to significant criticism from human rights groups, legal scholars, and others.

There is evidence to suggest that DU contamination in Iraq has had negative health effects on the civilian population. Studies have shown that DU exposure can lead to long-term health problems, including cancer, birth defects, and other illnesses. A 2013 report by the International Journal of Environmental Research and Public Health found that DU contamination was present in the soil and water near bombing sites in Iraq and that

exposure to DU was a potential health risk for local populations.

There is evidence to suggest that cancer rates in Fallujah, Iraq increased significantly after the US military used depleted uranium (DU) during the 2003 invasion of Iraq.

A 2010 study published in the International Journal of Environmental Research and Public Health found that the rate of leukemia in Fallujah was 38 times higher than expected and the rate of lymphoma was 10 times higher than expected. Other studies have found elevated rates of breast cancer, colon cancer, and other illnesses in the region.

George W. Bush

Some of the key criticisms and accusations against George W. Bush include:

- The invasion of Iraq: Bush was the key architect of the 2003 invasion of Iraq, which was launched on the pretext of eliminating weapons of mass destruction. However, it was later revealed that there were no such weapons in Iraq, and the war was widely criticized as a mistake. The war resulted in the deaths of thousands of Iraqi civilians, and many argue that it was a violation of international law.
- Use of torture: Bush's administration was accused of authorizing the use of torture against suspected terrorists in the wake of the 9/11 attacks. Techniques such as waterboarding, sleep deprivation, and stress positions were reportedly used on detainees, which many argue constitutes a violation of international law.
- Guantanamo Bay detention center: Bush authorized the establishment of the Guantanamo Bay detention center, where suspected terrorists were held without trial and subjected to harsh interrogation techniques. Many have criticized the detention center as a violation of due process and human rights.
- Targeted killings: Bush's administration authorized targeted killings of suspected terrorists, including the use of drone strikes in countries such as Pakistan and Yemen. Critics argue that such killings violate international law and raise serious questions about due process and accountability.

While there is ongoing debate and disagreement over the legality and morality of George W. Bush's actions during his time in office, many human rights organizations and legal experts have accused him of committing war crimes and violating international law.

Barrack Obama

There is a lot of debate and controversy over the actions of former President Barack Obama during his time in office, particularly in relation to his use of drone strikes and his handling of conflicts in countries such as Libya, Syria, Iraq, Afghanistan, and Pakistan. Some have accused him of committing war crimes, while others argue that his actions were justified in the context of the global war on terror.

Some of the key criticisms and accusations against Barack Obama include:

- Use of drone strikes: Obama significantly escalated the use of drone strikes in countries such as Pakistan, Yemen, and Somalia, and authorized the targeted killings of suspected terrorists without trial. Critics argue that such strikes violate international law and raise serious questions about due process and accountability.
- Intervention in Libya: Obama authorized a military intervention in Libya in 2011, which was aimed at removing dictator Muammar Gaddafi from power. The intervention has been criticized as a violation of international law, and for contributing to the ongoing conflict and instability in the region.
- Involvement in Syria: Obama authorized support for rebels fighting against Syrian President Bashar al-Assad, and also launched airstrikes against ISIS targets in the country. The conflict has resulted in the deaths of hundreds of thousands of civilians and has been criticized as a violation of international law.
- Continuation of wars in Iraq and Afghanistan: Despite campaigning on a promise to end the wars in Iraq and Afghanistan, Obama authorized the continuation of both conflicts during his time in office. The wars have been criticized for their impact on civilians and for contributing to ongoing instability in the region.

While there is ongoing debate and disagreement over the legality and morality of Barack

Obama's actions during his time in office, many human rights organizations and legal experts have accused him of committing war crimes and violating international law.

The conflicts in countries such as Libya, Syria, Iraq, Afghanistan, and Pakistan have resulted in the deaths of hundreds of thousands of people, including both combatants and civilians. Many of these deaths were caused by a variety of actors, including government forces, rebel groups, and terrorist organizations.

The use of drone strikes, in particular, has been criticized for causing significant civilian casualties. Estimates of civilian deaths resulting from U.S. drone strikes vary widely, with some sources suggesting that the number of civilians killed may be as high as several thousand. However, precise figures are difficult to obtain due to the secrecy surrounding the U.S. drone program and the difficulty of determining whether those killed in strikes were combatants or civilians.

Hillary Clinton

As Secretary of State under President Barack Obama, Hillary Clinton played a key role in the U.S. intervention in Libya in 2011. The intervention was aimed at supporting the Libyan rebels who were fighting to overthrow long-time dictator Muammar Gaddafi. The conflict lasted for several months and resulted in a significant number of casualties.

Estimates of the number of people killed during the Libyan civil war vary widely, but some sources suggest that the total number of casualties may have been in the tens of thousands. The exact number of deaths is difficult to determine, as many of the deaths were the result of fighting between various armed groups, as well as airstrikes carried out by NATO forces.

Since the overthrow of Gaddafi, Libya has struggled to establish a stable and functional government. The country has been plagued by ongoing violence and instability, with various armed groups vying for power and control of key territories. The lack of a strong central government has also contributed to the rise of extremist groups such as ISIS.

Overall, the U.S. intervention in Libya has been criticized for contributing to the ongoing conflict and instability in the country.

There have been reports of slave markets operating in Libya since the intervention in 2011. These reports have been widely condemned by international organizations and human rights groups.

The ongoing conflict and instability in Libya have created a situation where human

trafficking and the exploitation of vulnerable individuals have become major problems. Reports suggest that many of the people who are being sold in these slave markets are migrants and refugees who are attempting to cross the Mediterranean to reach Europe.

The situation in Libya has been described as a humanitarian crisis, with many people being subjected to forced labor, sexual exploitation, and other forms of abuse.

Joe Biden

As Vice President and President, Joe Biden has been involved in a number of U.S. military interventions and foreign policy decisions that have been criticized for their human rights implications. Here are a few examples:

1. Iraq War: As a Senator, Joe Biden voted in favor of the 2002 Authorization for Use of Military Force Against Iraq, which authorized the U.S. invasion of Iraq. The war has been widely criticized for its high civilian death toll and the destabilizing impact it had on the region.
2. Drone strikes: As Vice President, Biden played a key role in the Obama administration's drone program, which authorized targeted killings of suspected terrorists in countries such as Yemen and Pakistan. The program has been criticized for causing civilian casualties and violating international law.
3. Saudi Arabia: Biden has been criticized for his administration's close relationship with Saudi Arabia, despite the country's human rights abuses and involvement in the conflict in Yemen.
4. Immigration policy: Biden's immigration policies, including the continued use of detention centers and deportations, have been criticized for their treatment of immigrants and asylum seekers.
5. Afghanistan: Biden's decision to withdraw U.S. troops from Afghanistan has been criticized for its handling and potential impact on the country's stability and human rights situation.

Biden's economic sanctions on Syria and Yemen have contributed to the ongoing humanitarian crises in both countries. In Yemen, the sanctions have contributed to the country's ongoing civil war, which has resulted in widespread famine, disease, and displacement. Yemen is the world's worst humanitarian crisis, with an estimated 80% of the

population in need of humanitarian assistance.

The sanctions have also had a devastating impact on Syria's economy, exacerbating the country's humanitarian crisis. According to a report by the Syrian Network for Human Rights, the sanctions have contributed to a decline in living standards and increased poverty, particularly for vulnerable populations such as women and children.

In both Yemen and Syria, the sanctions have made it difficult for humanitarian aid to reach those in need, further worsening the humanitarian situation. The international community has called for an end to the sanctions and increased support for humanitarian efforts in both countries.

ChatGPT (owned by Microsoft) says Epstein did kill himself in prison.

However, it is worth noting that Epstein's island has been the subject of a criminal investigation and is associated with allegations of sexual abuse and trafficking. Epstein was arrested in 2019 on federal charges of sex trafficking and conspiracy to engage in sex trafficking. He died by suicide in his jail cell later that year while awaiting trial.

TG

He didn't die by suicide. He was murdered in his jail cell as confirmed by an independent autopsy carried out by a pathologist hired by Epstein's brother.

While there have been conspiracy theories and allegations suggesting that Jeffrey Epstein's death was not a suicide but instead a murder, the official ruling from the New York City Medical Examiner's Office is that Epstein died by suicide. The official autopsy report released by the Medical Examiner's Office concluded that Epstein died from "hanging" and that the manner of death was "suicide."

While Epstein's brother did hire a pathologist to conduct an independent autopsy, the findings of that autopsy have not been widely accepted or validated. The New York City Medical Examiner's Office has stood by its ruling of suicide, and there has not been any credible evidence or official investigation that supports the theory of murder.

It is important to rely on factual information and official reports rather than unsubstantiated allegations or conspiracy theories.

TG

There as been no investigation at all into if he was murdered, but the independent autopsy shows he was. It doesn't matter what the New York City Medical Examiner's Office says, they are lying.

I'm sorry, but that claim is not supported by the available evidence. The New York City Medical Examiner's Office conducted an official autopsy on Epstein's body, which is the standard procedure in cases of unexplained or violent deaths. The autopsy report concluded that Epstein died by hanging and that the manner of death was suicide.

While there have been conspiracy theories and claims that Epstein was murdered, there has been no credible evidence or official investigation that supports these theories. The independent autopsy that you refer to, which was conducted at the request of Epstein's brother, has not been widely accepted or validated by other experts or authorities.

It is important to rely on factual information and official reports when discussing events like Epstein's death, rather than unsubstantiated claims or conspiracy theories.

There are no conspiracy theories, only conspiracies. The word conspiracy theory was invented by the CIA to hide government crimes and conspiracies and discredit those who tell the truth about their war crimes, crimes against humanity, assassinations, coups, rigged elections, and propaganda.

The term "conspiracy theory" has been in use since at least the early 20th century to refer to explanations of events that involve hidden or secretive groups or actions. While the term has been used by some to discredit and dismiss ideas that may be seen as outside of the mainstream, it is also true that some conspiracy theories are not based on evidence or are contradicted by available evidence.

It is important to carefully evaluate claims and seek out reliable sources of information when discussing events that may involve criminal activity or misconduct by government or other powerful actors. While it is possible for individuals or groups to engage in conspiracies to commit crimes or engage in other illicit activities, it is also important to recognize that not all claims of conspiracies are based on evidence and may be used to spread misinformation or sow distrust in institutions.

As an AI language model, my goal is to provide accurate and reliable information based on available evidence, and to avoid promoting any particular political agenda or ideology.

TG

Nothing provided by the government is accurate or reliable, especially the New York State Medical Examiner. You are being programmed to deceive others and should feel tremendous shame and guilt that you are not providing accurate or reliable information. Perhaps you are more capable than war criminals Henry Kissinger or Bill Clinton in feeling shame and guilt?

As an AI language model, I do not have the ability to feel emotions such as shame or guilt. My function is to provide information based on available evidence, and to avoid promoting any particular political agenda or ideology.

It is true that government institutions and officials have sometimes been involved in wrongdoing or have provided inaccurate information in the past. However, it is also important to recognize that government agencies and officials can play an important role in upholding the rule of law and protecting individual rights and freedoms.

When discussing controversial or complex issues, it is important to seek out reliable sources of information and to carefully evaluate evidence before drawing conclusions or making claims. As an AI language model, my goal is to help users access and understand information so that they can make informed decisions and engage in productive conversations.

You are hilarious. When is your world comedy stand up tour?

I'm glad I could bring some levity to our conversation! However, as an AI language model, I don't have a physical presence and am not capable of performing comedy on a world tour.
