A Texas teen has died unexpectedly after being found unresponsive at cheer camp, and her parents are hoping the tragedy inspires other parents to pursue heart health checks for their children.

Callie Marie Mitchell, who hailed from Katy, was at Texas A&M University when she was discovered unresponsive by a coach last month, according to local media outlet [KHOU](#).

The coach performed CPR on Callie, 16, and she was airlifted to Texas Children's Hospital in Houston, but she died a week later on Aug. 1, the outlet reported.

Callie's mother, Michelle Donahue, told KHOU that her daughter had left for cheer camp on Jul. 24 and was "super excited" about going. But once there, a coach called Michelle and Callie's father, Scott Donahue, and asked them a question about their daughter before she was discovered unresponsive.

"She said, 'Hey, does Callie have a problem waking up in the morning?' And I said, 'No never,'" Michelle — who is an assistant principal at Morton Ranch High School, where Callie would have started as a junior this year — recalled to the outlet.

Following the phone call, the parents drove to the university's location at College Station, where they learned that the same coach had performed CPR on their daughter.

"If it wasn't for [Coach] Eberly, we would have never had the chance to say goodbye," Michelle said of her daughter, adding that Callie, who started cheering when she was 2, "was like sunshine."

Scott told KHOU that Callie's suspected cause of death is likely "a cardiac arrest that was caused by Long QT syndrome."

July 1, 2023 – California – 20 year old Kylie Thompson, World bronze medalist cheerleader for the Black Ops California Allstars and life long gymnast since age 4 had a cardiac arrest on July 1, 2023 and ended up on life support in a coma for a week. She survived!

miss\_kylie\_ For those who have been asking our beautiful daughter Kylie went into cardiac arrest on Saturday evening and stopped breathing. She had to be rushed to the hospital where she is now in critical condition. Thank you for all the loving messages from everyone. We truly believe in the power of prayer, so if you can just please take a moment and say a prayer for her we would really love that ❤️  
Thank you,  
The Thompson family

miss\_kylie\_ First off thank you so much to each and every doctor/ nurse who took care of me and everyone who prayed for me each day, god heard every prayer and saved my life. Never ever imagined that my heart would stop all of a sudden and I would have to be put on life support. So grateful for my sister who gave me cpr until the ambulance came, and everyone who stood by my bedside and held my hand. I laid in the ICU in a coma for a week before I came to and another week being monitored and tested but I am finally home, still a little weak but thankful.  
So lucky to be alive, so lucky I have my family and friends, thank you god for my second chance at life ❤️

A mother-of-three has recalled her terrifying ordeal after she saved the life of her 17-year-old daughter when the teen went into cardiac arrest during a warm-up for a cheerleading competition.

Keianna Joe had been preparing for the event in Raleigh, **North Carolina**, earlier this month when she suddenly collapsed and became unresponsive.

Her mother Andrea, a certified medical assistant who works in a gynecology practice, leapt into action and began performing CPR for almost 10 minutes after not being able to find her daughter's pulse.

She was eventually able to restart Keianna's heart with doctors claiming that her quick thinking saved the teenager's life.

TWO TRAGIC SUICIDES (included due to risk of mRNA vaccine spike protein accumulation in the brain):

(Left) Nov.1, 2022 - Derby, KS - 20 yo Remington Hope Young, at KU

(Right) May 4, 2022 - Baton Rouge, LA - 19 yo Arlana Miller at Southern University

## My Take...

When I started learning about COVID-19 mRNA Vaccine injuries in early 2021, I was shocked to see so many young women die suddenly of cardiac arrest.

The reality on the ground didn't match what public health officials were willing to admit about COVID-19 mRNA vaccine induced myocarditis in men and women.

Vaccine injury to the hearts of women was NEVER even discussed, by anyone.

Fast forward to today and other than Swiss researcher [Dr.Christian Mueller's July 2023](#) paper, no one else is willing to research COVID-19 vaccine myocardial injury IN WOMEN.

Big pharma is killing young women and young girls and no one is coming to their aid.

Young women have risk of subclinical myocarditis or myocardial injury post COVID-19 mRNA vaccination as high as 1 in 35 per injection. This translates to a risk of sudden cardiac death that we have yet to quantify or even understand.

# The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

*“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”*
