The FDA will meet on June 10 to discuss the possible licensure of the Pfizer COVID vaccine for children, despite the fact that COVID poses a statistically insignificant risk to children while the vaccines could cause injury and death.

In light of Dr. Anthony [Fauci's emails](#) released Wednesday, [Children's Health Defense](#) (CHD) calls for health agencies to immediately halt the administration of COVID-19 vaccines to minors, whether in clinical trials or under [Emergency Use Authorization](#).

With a [recovery rate of 99.997%](#), children are not at great risk of serious health consequences from COVID-19 infections — but they are at significant risk of [adverse events](#) from the vaccine.

On May 19, Pfizer released a 37-page "fact sheet" of clinical trial data on its COVID-19 vaccine tested on children 12 and older. The data showed [four out of five children](#) in the trials suffered from mild to severe adverse events.

Regardless of the severity of these adverse events, long-term effects on children's health from this experimental vaccine are [unknown](#).

[Emails](#) released Wednesday prove Fauci knew the virus and pandemic would fade away without a vaccine, that masks do not work and that those who have recovered from infection have substantial immunity.

Despite having this knowledge, Fauci insisted people, including children, wear masks and that those who had already had [COVID](#) be vaccinated.

CHD demands federal and state agencies err on the side of caution, especially when it comes to our future: the world's children. Immediate suspension of decisions regarding [COVID vaccines for children](#) is crucial.

The U.S. Food and Drug Administration (FDA) has announced a [meeting](#) on June 10 to discuss the possible licensure of the [Pfizer](#) vaccine for pediatric populations.

CHD Board Chair Robert F. Kennedy, Jr. and [Children's Health Defense](#) have been advocating for years for improvements in the nation's vaccine safety program which is in [shambles](#).

In a [March 15 letter](#) to President Biden, Kennedy outlined the long list of problems in the [Vaccine Adverse Event Reporting System](#) (VAERS):

- Adverse events are rarely reported by the public or doctors.
- Clinical trial data is often biased, unavailable or nonexistent.
- Conflicts of interest between the FDA and the Centers for Disease Control and Prevention (CDC) vaccine advisory committees and pharmaceutical companies are rampant.

According to a study funded by the U.S. Health and Human Services and the Agency for Healthcare Research and Quality's, the VAERS system [captures only 1%](#) of vaccine adverse events.

Yet as of May 21, VAERS data showed [262,521 adverse events](#) including [4,406 deaths](#) following COVID-19 vaccines since Dec. 14, 2020. Vaccine injuries among 12- to 17-year-olds [more than tripled](#) in the last week of reporting.

In 1976, approximately 50 deaths shut down the Swine Flu campaign under President Gerald Ford. Despite the underreporting to VAERS, the U.S. now has nearly 100 times that number of deaths following COVID vaccination.

The 1986 [National Vaccine Injury Compensation Act](#) has stymied legal action as has the [2005 PREP Act](#), both of which give vaccine makers virtually [zero liability](#) for their products.

Instead, claimants — including children — must file claims for injuries which are [rarely paid](#). Parents of children injured and killed by vaccines are aware of this system. Now people injured by COVID-19 vaccines, or whose loved ones die, also are [finding out](#) they're on their own.

Kennedy's new book, "The Real Anthony Fauci: Bill Gates, Big Pharma, and the Global War on Democracy and Public Health", can be pre-order now from [Barnes & Noble](#) and [Amazon](#). It will be published on July 20.

While most media has been silent, CHD commends [Tucker Carlson](#) and other journalists who are [covering](#) Fauci's emails. CHD is in the process of filing a Freedom of Information Act lawsuit demanding access to the unredacted emails.

CHD urges people around the world to comment on its [FDA petition](#) asking that the Emergency Use Authorizations for COVID vaccines be revoked immediately.

The organization also asks people to [add their names on a letter](#) to Congress supporting the [Prepare Act](#) which would establish a National Commission on the COVID-19 pandemic to examine and report upon the facts and causes behind the worldwide crisis.
