

China Repeatedly Tried to Block Taiwan From Giving Toxic COVID-19 mRNA Vaccines to Its Population

Now Taiwan is publishing fraudulent new research covering up myocarditis in mRNA jabbed teenagers

Conclusion:

Although adolescents vaccinated with the second dose of BNT vaccine commonly experienced transient postvaccination discomfort, the serial echocardiographic examinations did not reveal any significant deterioration of cardiac function within 28 days. Further studies are required to investigate the incidence of Severe Acute Respiratory Syndrome Coronavirus 2 (SARS-CoV-2) mRNA vaccination-associated myocarditis in adolescents and the related mechanisms.

This article starts with fraudulent Pfizer mRNA Vaccine safety research paper funded by the Taiwanese government, just published ([Jan. 2024](#)).

- Study prospectively studied 25 teenagers, mean age 14 years, 14 males, 11 females
- “this prospective study assessed clinical conditions and myocardial function using serial echocardiography before and after the second dose of the BNT (Pfizer) vaccine in adolescents aged 12 to 15 years
- Conclusion: serial echocardiographic examinations did not find significant deterioration during the 28-day post-vaccination period
- “maintained consistent contact with the adolescents and their families. During the subsequent 1-year follow-up, all adolescents reported no events.”
- Study was funded by grant from the “National Science and Technology Council of Taiwan”

My Assessment of this new research paper on myocarditis after 2 Pfizer mRNA jabs:

- This study is hot garbage. It is pure trash.
- A prospective study is a high level of evidence (Level 2 where level 1 is highest = randomized control trial) – however that’s misleading in this case.
- they only tested 25 teenagers, 11 of whom were girls.
- even the prospective [2022 Thailand study](#) done by Mansanguan tested 301 teenagers of whom 202 were male.
 - 54 had abnormal ECGs
 - 7 had abnormal bloodwork
 - 100% of them had NORMAL echocardiograms
 - “Conventional echocardiography may not be the ideal diagnostic tool in suspected vaccine-induced myocarditis because of its mild clinical symptoms; conventional echocardiography appeared normal in these patients.”
- So we already have a 2022 published study that looked at 301 teenagers post 2nd Pfizer mRNA jab and determined that echocardiography was useless.
- This Taiwan study looked at 25 teenagers post two Pfizer mRNA jabs and found that echocardiography was normal.
- There was no need to do a much worse study than the Thailand study and come to a conclusion about echocardiography that was known 2 years ago – it’s a test that is USELESS in the diagnosis of post Pfizer mRNA jab myocarditis in teenagers.
- In fact, [2020 study by Thunneemann-Tarr et al](#) showed that only a very specialized echocardiogram called “Speckle tracking echocardiography” can diagnose a viral myocarditis in young people whose regular echocardiogram was NORMAL

- Why did the National Science and Technology Council of Taiwan, a “[statutory agency](#) of Executive Yuan of the Republic of China (Taiwan)”, also known as the Taiwanese Government, fund such utterly fraudulent research?
- Why is the Taiwanese government misleading the rest of the world on the “safety” of Pfizer COVID-19 mRNA vaccines?
- And why was it published in the Chinese Journal of Medicine?

What is going on with China and Taiwan and Pfizer mRNA Vaccines?

- Most would agree that China does not have our best interests at heart.
- United States may even go to war with China over Taiwan.
- But here are some fascinating stories most people have missed.

[May 28, 2021](#) – Taiwan’s president said China interfered in and delayed its COVID-19 vaccine deal with Pfizer-BioNTech

- “We almost completed signing the contract with the German manufacturer (BioNTech), but it was delayed because China interfered,” Tsai said.
- [Insider](#) reported this week that Tsai is also facing pressure to purchase China-made Sinovac vaccines from the mainland.
 - Sinovac is a whole inactivated virus COVID-19 vaccine developed by the Chinese company Sinovac Biotech
- Zhu Fenglian, the spokeswoman for Beijing’s Taiwan Affairs Office, said China was not stopping Taiwan from procuring vaccines and was instead offering to donate COVID shots to the Taiwanese, according to a report from Chinese news portal [Sina News](#).
- Tsai said Taiwan has signed deals with the UK-based manufacturers of the AstraZeneca vaccine and with the US suppliers of the Moderna jab.

[April 18, 2022](#) – TAIPEI (Reuters) – Talks on Taiwan buying the child version of the Pfizer ([PFE.N](#))/BioNTech COVID-19 vaccine have stalled as Pfizer does not have the right to sell it and BioNTech and its Chinese partner do not make it, a Taiwanese minister said on Monday.

- A deal for the main version of the vaccine ran aground last year after Taiwan accused China of political interference, which Beijing denied.
- “The vaccines were later purchased after Taiwan’s government allowed chip-maker TSMC ([2330.TW](#)), a Buddhist charity and Terry Gou, the billionaire founder of Apple Inc ([AAPL.O](#)) supplier Foxconn ([2317.TW](#)), to buy them on the government’s behalf.”
- “Taiwan Health Minister Chen Shih-chung said the problem now was that only Pfizer makes the version of the shot for children, but it does not have the right to sell it to Taiwan, which lies with BioNTech and Fosun.”
- “Pfizer does not have the sales rights for China, Hong Kong, Macau and Taiwan. So that has complicated the contract.”
- More than half the population of 23 million have received three vaccine doses

[April 11, 2022](#) – Taiwan orders Pfizer’s COVID-19 pill as infections rise

- Health Minister Chen Shih-chung said the pills ordered would be enough to cover

3% of Taiwan's population, with half of them due to arrive in the second quarter this year.

- Taiwan has maintained mandatory mask wearing and almost 80% of the population have had two vaccine shots while more than 50% have had three.

[Nov. 4, 2022](#) – Scholz's China visit secures BioNTech/Pfizer vaccine access for expats – German chancellor says this would be a 'first step' toward wider use of the vaccine.

- People in China will soon be offered the BioNTech/Pfizer COVID-19 vaccine — but only if they are not Chinese (read that a few times)
- German Chancellor Olaf Scholz announced the deal today [during a visit](#) to China accompanied by a group of business leaders from his country, including BioNTech chief Uğur Şahin.
- one influential financial news outlet, [Caixin](#), reported that the BioNTech vaccine would only be available to "German expats" in China.
- Closer cooperation with the EU medicines agency [the European Medicines Agency] would pave the way here," he added, suggesting that BioNTech's marketing authorization application is still pending.
- BioNTech filed for a Chinese license for its COVID-19 vaccine last year. A spokesperson for the company declined to comment on the proceedings
- China has to date relied heavily on domestically produced vaccines, notably from Sinopharm and CanSino, in the fight against the coronavirus. These vaccines, which use an older technology based on an inactivated form of the virus, have been outperformed in numerous studies by the new mRNA vaccines from BioNTech/Pfizer and Moderna.

[Dec. 4, 2022](#) – China's Xi unwilling to accept western vaccines, U.S. official says

- Chinese leader Xi Jinping is unwilling to accept western vaccines despite the challenges [China](#) is facing with Covid-19
- "despite the social and economic impact of the virus, Xi "is unwilling to take a better vaccine from the West, and is instead relying on a vaccine in China that's just not nearly as effective against Omicron"
- "It's, again, not something we see as being a threat to stability at this moment, or regime change or anything like that," she said, while adding: "How it develops will be important to Xi's standing."
- "China has not approved any foreign Covid vaccines, opting for those produced domestically, which some studies have suggested are not as effective as some foreign ones. That means easing virus prevention measures could come with big risks, according to experts."
- "The White House said earlier in the week that China had not asked the United States for vaccines."
- "One US official told Reuters there was "no expectation at present" that China would approve western vaccines."
- "It seems fairly far-fetched that China would greenlight western vaccines at this point. It's a matter of national pride"

[Nov. 27, 2023](#) – Moderna invests in mRNA vaccines in China

- US pharma and biotech company began construction on its facility this month

- China has had a prickly relationship with mRNA.
- Throughout the pandemic, the Chinese government said no to mRNA vaccines.
- In May this year, Chinese CSPC Pharmaceutical Group produced China's first mRNA vaccine for Covid-19.
- Shortly after, in July, US pharma and biotech company Moderna announced an investment to "manufacture mRNA medicines in China for the Chinese people". Construction on the facility began in November. According to Chinese-language publication Yicai, the investment is understood to be worth roughly \$1bn
- In July this year, China's minister of commerce Wang Wentao hosted a roundtable with foreign pharmaceutical companies, reassuring them of China's business environment
- "The Chinese government places great importance on attracting foreign investment and continues to optimise the business environment," Mr Wang said.
- In June, China's CSPC Pharmaceutical Group also signed a strategic partnership with Pfizer to produce a local brand of Covid-19 drug Paxlovid.
- In Moderna's case, the Chinese government has been "very smart", as the topic is no longer on the radar and they can now reap the benefits from mRNA medicines, while foreign companies, like Moderna, producing mRNA vaccines don't have the demand anymore, at least not the Covid demand, she says.
- "The jury's still out as to whether [companies like Moderna] will make money in China," she adds.

My Take...

It is clear to me that China worked very hard to block Taiwan's government from poisoning its own population (that China sees as its own) with COVID-19 mRNA Vaccines.

They blocked the initial two doses for months while offering Taiwan freely donated SINOVAR COVID-19 Vaccines (whole inactivated virus vaccines)

Then there were delays in Taiwan's procurement of Pfizer's mRNA jabs for children which involved China as well.

Look at the elaborate lengths the Taiwanese government went to, to get their hands on mRNA jabs, so they could poison their population:

- "The vaccines were later purchased after Taiwan's government allowed chip-maker TSMC, a Buddhist charity and Terry Gou, the billionaire founder of Apple Inc supplier Foxconn, to buy them on the government's behalf."

The Dec.4, 2022 Reuters article brings up "regime change" if Chinese leader Xi Jinping doesn't warm up to mRNA vaccines.

Interestingly, in July 2023, China gave Moderna the go-ahead to build an mRNA Vaccine factory which I see as nothing more than just further stalling and delaying as the factory didn't even start building until November 2023.

Why didn't China just buy a billion mRNA doses for its population from Pfizer or Moderna (Japan bought 400 million mRNA doses and poisoned its own population).

That doesn't mean the Chinese Communist government is benevolent, but it does show that

it's protecting it's own people from being injected with mRNA Vaccines.

Even when the German Chancellor visited China in November 2022, China granted the use of mRNA vaccines but only for German nationals and not its own people.

As I wrote in my substack yesterday, China is pumping out fraudulent research on next generation mRNA vaccines (self-amplifying vaccines and mRNA cancer vaccines), parroting "safe and effective" propaganda while refusing to mRNA jab its own people.

Taiwanese government is pumping out fraudulent research on COVID-19 mRNA Vaccine injuries, namely myocarditis in double Pfizer mRNA Vaccinated teenagers, pretending the jabs are safe for children.

Clearly, the Taiwanese government is acting as an enemy nation intent on seeing our youth destroyed, and is willing to commit scientific fraud to assist in the process.

Imagine going to war to protect Taiwan – run by a government that wants to see our children dead or disabled.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In a world where humanity in which we find ourselves, in this singular, irregular and complex crisis, liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global

coup d'état under way called "The Great Reset" that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
