Documents that the ruling class tried to keep confidential are confirming that ADE (Antibody-dependent enhancement), VAED (Vaccine-Associated Enhanced Disease), and AIDS (Acquired Immunodeficiency Syndrome) are common outcomes after COVID-19 injections. These diseases come on often months after taking the shots.

AIDS is particularly alarming, as it is appearing in a disturbing number of recipients just five months after their initial injections.

Antibody-dependent enhancement (ADE) and Vaccine-Associated Enhanced Disease (VAED). are serious adverse events that can occur after vaccination.

ADE and VAED can occur when an individual is exposed to a pathogen, such as the alleged Covid-19 virus, after receiving a vaccine that does not provide full immunity.

In these cases, the vaccine-induced antibodies may actually enhance the ability of the pathogen to infect cells, leading to more severe illness than if the individual had not received the vaccine.

When a vaccine causes ADE or VAED, it can have significant public health implications.

First and foremost, individuals who receive the vaccine and develop ADE or VAE may suffer from severe illness, and in some cases, even death. [-The Daily Exposé](#)

One example of a bacterial infection that could potentially be worsened by ADE or VAE is streptococcus A (strep A) infection. Strep A is a type of bacteria that can cause a wide range of illnesses, including sore throat, pneumonia, and sepsis. You will have most likely seen in the mainstream news that Strep A infection is killing children all over this winter.

Government documents show that the most likely cause of all of these diseases is the COVID-19 injection.

The [US Food and Drug Administration](#) (FDA) attempted to delay the release of Pfizer's COVID-19 vaccine safety data for 75 years despite approving the injection after only 108 days of safety review on [December 11th, 2020](#).

The FDA originally said that they were prepared to release [500 pages per month](#) in a response to the Freedom of Information (FOI) request filed on behalf of [Public Health and Medical Professionals for Transparency](#) (PHMPT) requesting the safety data.

Instead, in early January 2022, Federal Judge Mark Pittman ordered them to release 55,000 pages per month. They released 12,000 pages by the end of January.

Since then, PHMPT has posted all of the [documents to its](#) website. [-The Daily Exposé](#)

One of the documents contained in the latest data dump is '[reissue_5.3.6 postmarketing experience.pdf](#)'. Table 5, found on page 11 of [the document](#) shows an 'Important Potential Risk', and that risk is listed as 'Vaccine-Associated Enhanced Disease (VAED), including Vaccine-Associated Enhanced Respiratory Disease (VAERD)'.

Table 5. Important Potential Risk

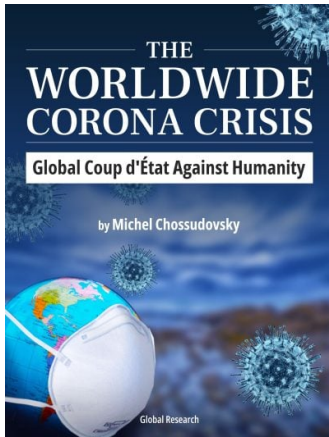

Topic	Description
Important Potential Risk	<p>Post Authorization Cases Evaluation (cumulative to 28 Feb 2021) Total Number of Cases in the Reporting Period (N=42086)</p> <p>Vaccine-Associated Enhanced Disease (VAED), including Vaccine-Associated Enhanced Respiratory Disease (VAERD)</p> <p>The search criteria utilised to identify potential cases of VAED for this report includes PTs indicating a lack of effect of the vaccine and PTs potentially indicative of severe or atypical COVID-19^a.</p> <p>Since the first temporary authorization for emergency supply under Regulation 174 in the UK (01 December 2020) and through 28 February 2021, 138 cases [0.33% of the total PM dataset], reporting 317 potentially relevant events were retrieved:</p> <p>Country of incidence: UK (71), US (25), Germany (14), France, Italy, Mexico, Spain, (4 each), Denmark (3); the remaining 9 cases originated from 9 different countries; Cases Seriousness: 138; Seriousness criteria for the total 138 cases: Medically significant (71, of which 8 also serious for disability), Hospitalization required (non-fatal/non-life threatening) (16, of which 1 also serious for disability), Life threatening (13, of which 7 were also serious for hospitalization), Death (38). Gender: Females (73), Males (57), Unknown (8); Age (n=132) ranged from 21 to 100 years (mean = 57.2 years, median = 59.5); Case outcome: fatal (38), resolved/resolving (26), not resolved (65), resolved with sequelae (1), unknown (8); Of the 317 relevant events, the most frequently reported PTs ($\geq 2\%$) were: Drug ineffective (135), Dyspnoea (53), Diarrhoea (30), COVID-19 pneumonia (23), Vomiting (20), Respiratory failure (8), and Seizure (7).</p> <p>Conclusion: VAED may present as severe or unusual clinical manifestations of COVID-19. Overall, there were 37 subjects with suspected COVID-19 and 101 subjects with confirmed COVID-19 following one or both doses of the vaccine; 75 of the 101 cases were severe, resulting in hospitalisation, disability, life-threatening consequences or death. None of the 75 cases could be definitively considered as VAED/VAERD.</p> <p>In this review of subjects with COVID-19 following vaccination, based on the current evidence, VAED/VAERD remains a theoretical risk for the vaccine. Surveillance will continue.</p>

This evidence was published by The Daily Expose and is rather damning, and horrifying for those who have taken these shots or given them to their own children. These documents could help explain the instances of SADS or sudden adult death syndrome, as well as all of those who have “died suddenly” in the past year since these shots have been rolled out with force.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. –Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. –David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom

loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
