"A vaccine with those reaction rates could cause grave injuries in 1.5 billion humans if administered to "every person on earth". That is the threshold that Gates has established for ending the global lockdown."

.

.

– Robert F Kennedy Jr [1]

According to the most recent poll conducted by the research firm Leger, roughly two out of every three Canadians intend to get the vaccine for COVID, once it has been approved by Health Canada. Only 17% of the Canadian population said "no." [2]

That makes a certain amount of sense if you factor in the panic generated by the Sars-CoV-2 virus. No other known bug has brought our society to the point of shutting down. No one ever witnessed the economic desecration. None saw countries closing their borders. And now, many are starting to see face masks and social distancing as the new normal. So, if the promise that the world will return to pre-pandemic normal, once that magical elixir has been constructed, who wouldn't risk the shot?

The Director General of the World Health Organization, Tedros Adhanom Ghebreyesus, is a major booster of immunization. He claims that vaccines are to credit for the [near annihilation of smallpox, polio and other feared diseases](#). Now he promises that the COVAX facility, co-led by Gavi, the Vaccine Alliance; the Coalition for Epidemic Preparedness Innovations (CEPI), and the WHO, will be delivering two billion doses of the COVID vaccine by the end of next year. [3]

The pharmaceutical corporations driving the vaccine push will certainly make tons of money getting a shot distributed to hundreds of millions around the world. But might there also be a risk associated with it? Is there another agenda that the authorities may be pursuing that patients may not even be aware of that will affect not only their health, but their prospect of

freedom? This is the question that the Global Research News Hour investigates in part four of this special series on Coronavirus.

In our first half hour, the Global Research News Hour reassembles three of the guests from past episodes of this series, Sucharit Bhakdi MD, Meryl Nass MD, and Docs for an Open Debate, share their reservations about the COVID vaccine. In our second half hour, Peter Koenig, an economist and geopolitical analyst with background at the WHO, brings forward his perspective that includes an ID2020 nanochip that could ultimately raise the threat to a new level.

Sucharit Bhakdi, MD is a physician and a post-doctoral researcher. He was named chair of Medical Microbiology at the University of Mainz in 1990, where he remained until his retirement in 2012. He has published over three hundred articles in the fields of immunology, bacteriology, virology, and parasitology, for which he has received numerous awards and the Order of Merit of Rhineland-Palatinate. He is a specialist in microbiology and one of the most cited research scientists in German history. His book, co-authored by Karina Reiss, is [Corona: False Alarm? Facts and Figures](#).

Docs for Open Debate is a group in Belgium doctors and health professionals intent on demanding more critical analysis of the pandemic fight, relaxation of the extreme emergency measures, and freedom to express their positions on mainstream media. They crafted an open letter to this end which has so far been signed by 515 physicians and 1767 medically trained health professionals. Their site is [docs4opendebate.be](#)

Meryl Nass, MD is a General Internal Medicine Physician with 40 years of experience. She is an epidemic and anthrax expert and composes a series of blogs for the site [Anthrax Vaccine](#) as well as Global Research. She's based in Ellsworth, Maine.

Peter Koenig is an economist and geopolitical analyst. He is also a water resources and environmental specialist. He worked for over 30 years with the World Bank and the World Health Organization around the world in the fields of environment and water. He lectures at universities in the US, Europe and South America. He writes regularly for online journals such as Global Research; ICH; New Eastern Outlook (NEO) and more. He is the author of [Implosion – An Economic Thriller about War, Environmental Destruction and Corporate Greed](#) – fiction based on facts and on 30 years of World Bank experience around the globe. He is also a co-author of [The World Order and Revolution! – Essays from the Resistance](#). He is a Research Associate of the Centre for Research on Globalization.
