[A 2021 lawsuit filed by Baylor Scott and White Health system](#) against world-renowned internist, cardiologist, and COVID-19 expert Dr. Peter A. McCullough, MD, MPH, has been dismissed by the 191st Judicial District Court, Dallas County, Texas. Associate Judge Tahira Khan Merritt granted the nonsuit and dismissed with prejudice all claims asserted or that could have been asserted in the case. Dr. McCullough stated,

"This is a strong victory for freedom of speech and fair balanced publication and media presentation of clinical data as it has emerged over the course of the pandemic crisis. My analyses and conclusions have been accurate, consistent, and have always been my own, not those of any institution."

The lawsuit alleged Dr. McCullough violated his separation agreement by using the Baylor Scott and White Health System name during media appearances. As the national crisis has drawn on, Dr. McCullough has been a public voice of data-driven reason in the media, delivering concise scientific interpretation of the available science, and providing a focused assessment of the pandemic landscape.

He has also been one of America's leading physicians on the early treatment of COVID-19. His protocols and scientific publications have been relied upon to help millions globally. However, Dr. McCullough has drawn harsh criticism for expressing valid concerns over the public health response, including the mass vaccination of entire populations in the face of an incredible lack of data, from a public health apparatus that has often lacked consistency

in it's public health decisions on Covid-19.

An established [medical cancel culture](#) has been running in the background, outside of mainstream awareness, for years. During the COVID response, the unethical behavior of both companies and professional licensing bodies has become a topic of vigorous debate.

Dr. McCullough's recent court vindication came on the back of another win for open scientific discussion and the free expression of medical professionals as a federal judge [has also just blocked](#) a law that punishes doctors for 'misinformation' in California.
