Dad holds baby for first time after mum dies in childbirth and newborn daughter left fighting for life

The couple, who were high school sweethearts, went to hospital expecting to come home a family but Cheryl collapsed, forcing doctors to perform a C-section to save the child

By **Charlie Jones**, Reporter
12:37 ET, FEB 14 2024

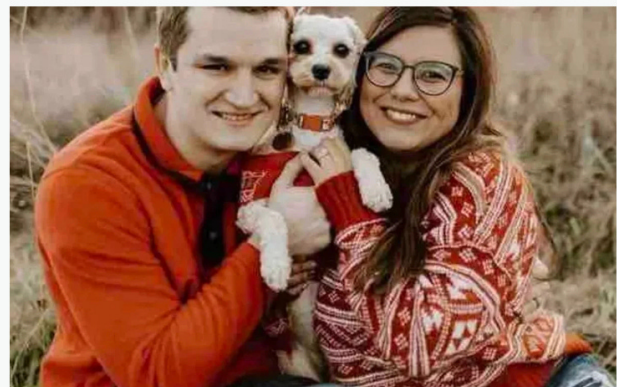

A dad has been left heartbroken **after his pregnant wife** tragically died during childbirth, leaving their newborn baby fighting for life. Travis Strobel and his wife Cheryl, both from Pittsburgh, **Pennsylvania**, had gone to the hospital with hopes of a smooth delivery, but their dreams were shattered when Cheryl collapsed.

Cheryl, 28, suffered a cardiac arrest and their baby Ellie was delivered via C-section. Despite doctors' best efforts, Cheryl passed away and baby Ellie was left in a critical condition. The couple, who were high school sweethearts, both trained as nurses and worked at the same hospital where Cheryl later died.

Baby Ellie was rushed to the Neonatal Intensive Care Unit at West Penn hospital and put on life support due to Hypoxic Induced Encephalopathy. After several failed attempts to remove her breathing tube, further treatment was needed.

Travis Strobel and his wife Cheryl were childhood sweethearts (Image: gofundme)

Eventually, doctors managed to stabilize Ellie and Travis got to hold her for the first time. According to an update on a fundraiser set up by a family friend: "Baby Ellie had her MRI today and it was clear! She is eating and napping on dad like a champ. Travis is eager to take Ellie home to meet Sophie and sleep in his own bed."

The fundraiser reads: "Travis and Cheryl bought their house back home, close to family and were starting their own little family. First with their new dog - Sophie and a baby on the way."

"Travis and Cheryl kept the baby's name a secret. But if I were to guess, they named the baby Ellie based off a Disney movie."

Pittsburgh, PA – Cheryl Strobel and Travis Strobel were both nurses who worked at the same hospital (West Penn Hospital), both were mandated COVID-19 mRNA Vaccines to be able to

continue working.

- You will notice in these media stories there is no curiosity as to why a 28 year old pregnant woman would suddenly have a cardiac arrest and die.
- “despite doctors’ best efforts, Cheryl passed away and baby Ellie was left in critical condition”

COVID-19 Vaccinated Pregnant women are suffering cardiac and vascular injuries. There are 10 more cases:

Feb. 21, 2024 – Stoke-on-Trent, UK – 26 year old Emily Lockley collapsed during delivery from an extremely rare pulmonary aneurysm. “Died mere moments after giving birth”.

Emily Lockley's son is now being taken care of by her loved ones (Picture: Facebook)

A grief-stricken family has paid tribute to a ‘totally healthy’ woman who died mere moments after giving birth.

Emily Lockley's son, Harley, will grow up without a mum after the 26-year-old collapsed during labour at a Stoke-on-Trent hospital.

Doctors believe Emily suffered a suspected pulmonary aneurysm – when the blood vessels that ferry blood from the heart to your lungs bulge.

This **extremely rare condition** damages the heart, causing the patient to cough up blood and feel breathless, and has multiple causes.

To her family, ABBA-fan Emily was their ‘little dancing queen’ who was ‘beautiful inside and out’.

Mum Tracey Wootton, 46, told **The Mirror**: ‘Emily, we will look after your gorgeous boy Harley, and we will pass him your love that you will be sending from heaven.’

The new mum suffered a suspected pulmonary aneurysm (Picture: Facebook)

Sister Chloe Stokes, 24, added: ‘As a family, we are in complete shock, as Emily had a perfectly normal **pregnancy**.

‘We are all struggling a lot, but having Harley is like having a piece of Emily. He is bringing us comfort.’

Chloe had been with her sister every step of the way during her pregnancy journey.

The beautician went to every scan with Emily, who worked at a GP’s surgery.

‘Emily was absolutely thrilled about being pregnant, it was all she ever wanted. She dreamed of being a mum and would have had two or three babies if she could have,’ Chloe said.

When her water broke while at home on her 26th birthday on February 5, her mum and partner, welder Tyler Collinson, 27, raced her to Royal Stoke University Hospital.

Feb. 18, 2024 – Pistoia, Italy – 37 year old nurse, Laura Porta, 8 months pregnant, collapsed while walking to the bathroom and died (believed to have died from a brain aneurysm) on Feb. 18, 2024. Fate of her newborn is unknown.

Cerebral hemorrhage. This is the reason for the death of **Laura Porta, Bolotana's 37-year-old nurse** died suddenly last Sunday a **Pistoia**. Era pregnant in the eighth month.

A tragedy probably due to **an aneurysm**, to ascertain the causes, the diagnostic feedback ordered yesterday by the Health Authority will take care of.

Laura dreamed of working at 118, also as a helicopter rescuer. But before each aspiration there was for her **Andrea, the child whom she and Comrade Antonio awaited with love and who now struggles between life and death in the intensive care unit of the Meyer in Florence.**

Born in Nuoro on September 14, 1987, she had moved to Tuscany to study nursing sciences. She had graduated with the vice president of the Order of Nurses of Florence, David Nucci, who

Dec. 2, 2023 - Cherrybrook, NSW, Australia - 36 year old neonatal ICU nurse Amy Barker and her unborn boy Marcus both died suddenly and unexpectedly. She was mandated COVID-19 Vaccines. Family has no answers.

She went to the bathroom to vomit and collapsed unconscious on the ground. Apprehension about the fate of the little son born with an urgent cesarean, struggle between life and death at the Meyer in Florence

Laura Porta to the hospital

Nurse -

Pistoia, February 19, 2024 - A huge tragedy, leaving you shocked and terrified. A thirty-seven-year-old woman died at the San Jacopo hospital in Pistoia after suffering a serious illness. And these are hours of great anguish for the fate of his newborn son: at the moment when we are writing struggle between life and death, in a prognosis reserved for the Meyer Paediatric Hospital in Florence.

The victim's name was Laura Porta: nurse, she was originally from Nuoro but had long settled in Pistoia together with her partner Antonio. He had been waiting for little Andrea for eight months now.

The drama took off in the very first afternoon of yesterday: it was about 1.45 p.m. when the alarm went off. The woman, in the final stage of her pregnancy, felt sick inside her home.

Pregnant Aussie nurse, 36, and unborn son die 'unexpectedly'

Amy Barker and her unborn son suddenly died on Saturday.

Brianne Tolj · Associate News Editor

Updated Sat, 9 December 2023 at 3:51 pm GMT-7 · 3-min read

A beloved mum [who died suddenly](#) while 36 weeks pregnant with her second son has been remembered as a “beautiful and compassionate soul” and a “brilliant nurse”.

Amy Barker, from [Sydney](#), and her “beautiful unborn baby boy Marcus unexpectedly and tragically” passed away on Saturday, leaving behind her treasured two-year-old son Nicholas and “partner in life” Clint.

The 36-year-old “brought such love and joy to everyone who met her”, especially those she helped during her 15-year career as a nurse in the Grace NICU at Westmead Children's Hospital, her heartbroken family said. “[The family is awaiting answers as to what caused this tragedy,](#)” grieving relatives told Yahoo News Australia. “Our hearts are broken, having lost Amy and baby Marcus — two lives taken far too soon.”

Oct. 31, 2023 – India – 35 year old Dr. Priya was a medical doctor and an actress in the Malayalam film industry. She suffered a fatal heart attack while pregnant. The baby was saved.

- “The actress underwent a regular pregnancy check-up at the hospital shortly before suffering the fatal heart attack”
- “Doctors have managed to save the newborn baby and he has been put in the Intensive Care Unit”
- “Dr. Priya Has passed away due to a heart attack; she was eight months pregnant”

TRAGIC LOSS Dr Priya dead – Pregnant Malayalam TV actress suffers fatal heart attack aged 35 as baby is saved by doctors

It comes after South-Indian actress Renjusha Menon was found dead

Sayan Bose

Published: 8:50, 1 Nov 2023 | Updated: 12:57, 1 Nov 2023

PREGNANT Malayalam actress Dr Priya has tragically passed away at 35.

The expectant mother reportedly died due to cardiac arrest in a private hospital on October 31.

The actress underwent a regular pregnancy check-up at the hospital shortly before suffering the fatal heart attack - it has been reported.

Doctors have managed to save the newborn baby and he has been put in the Intensive Care Unit, according to the hospital.

She is survived by her mother and husband.

Paying tributes to the late Malayalam star, actor Kishor Satya broke the sad news to fans: "Yet another unexpected death in the Malayalam TV industry.

"Dr. Priya has passed away due to a heart attack.

"She was eight months pregnant.

"May her soul rest in peace and god gives her family the courage to survive this tragic loss."

Besides being a doctor by profession, Priya was one of the popular faces in the Malayalam film industry.

July 21, 2023 – Brazil – 26 year old Renata Pereira was 3 months pregnant when she had cardiac arrest & died suddenly.

July 21, 2023 – Liverpool, UK – Kelsey Brown, a hairdresser, was pregnant with her 2nd child and had just moved to Spain with her young family, when she died suddenly.

 **Kelsey Brown, from Liverpool, died on July 21, 2021 while living in Marbella, Spain.** (Image: Instagram)

A pregnant mum who "loved life" and "lived for her son" died suddenly in Marbella, prompting a flood of tributes.

Kelsey Brown, from Liverpool, died on July 21 having moved to Spain with her young family.

The hairdresser was pregnant with her second child at the time of her death, the news of which has left her family, friends and former colleagues devastated.

Her former employer, Robyn's Makeover Studio on Aigburth Road, posted on Instagram with a tribute from staff members: "Words cannot describe how we are feeling today.

"Kelsey, you left us for your happy ending. All you ever wanted was your little family.

June 11, 2023 – Campbell, River, BC – Kat Zettler, at 31 weeks pregnant, suffered a heart attack caused by a "SCAD – Spontaneous Coronary Artery Dissection".

- "SCAD heart attacks typically affect healthy women with no known signs of cardiac issues/risks and no known history of coronary disease."

A heartfelt rally for Kat, Colin, and Baby Boy ❤️

Natasha Pereszlenyi is organizing this fundraiser on behalf of Kat Zettler.

Organizer
Campbell River, BC

Dearest friends, family, and support network,

My name is Kat Zettler and on Sunday June 11th - while 31 weeks pregnant - I survived a rare heart attack caused by something called SCAD - Spontaneous Coronary Artery Dissection. SCAD heart attacks typically affect healthy women with no known signs of cardiac issues/risks and no know history of coronary disease.

I was admitted into Campbell River ICU on Sunday night and then airlifted to St. Paul's Hospital in Vancouver on Monday morning. I was then rushed into their Cardiac ICU while still in cardiac failure. I stayed in Cardiac ICU for 3 days, underwent several procedures, and was given some of the best care and medications by world leading experts in Cardiology!

May 18, 2023 - California Instagram influencer 35 yo Jackie Miller James, 39 weeks pregnant, collapsed on May 18, 2023 with a ruptured brain aneurysm, was in 5 week coma.

- Jackie was found by her husband, Austin, on May 18, 2023, and was rushed to the emergency room and into an operation where they performed an emergency C-section and brain surgery simultaneously.
- "Twelve days after this incident, Jackie remains in a medically induced coma and has undergone five separate brain procedures."
- She awoke from her 5 week coma on July 2, 2023:

May 9, 2023 - 35 year old Amanda Banic, 35 weeks pregnant experienced chest pain - doctors told her she had indigestion and a panic attack and sent her home. A week later she had chest pain 2nd time and had an aortic dissection that almost killed her.

Jan. 10, 2024, 8:35 AM MST / Source: **TODAY**

By Meghan Holohan

In early May 2023, a 35-week pregnant Amanda Banic visited the hospital with chest pain. Doctors told her she was experiencing indigestion and a panic attack — and sent her home. A week later, the pain returned.

“The only thing I can compare it to is a knife shredding through me,” Banic, 35, of Hartford, Michigan, tells TODAY.com. “I’m like, ‘This is it. I’m dying.’ This time the pain (radiated) up into my jaw. It’s this sensation I can’t really describe. My vision (started) to blur. I started seeing black.”

Terrified, her husband, Derek, urged her to return to the hospital. She felt wary because they already dismissed her.

“I’m like, ‘I’m not going to go to the hospital because they’re just going to send me away with anxiety,’” she recalls. “I felt like at that point I was going to be made a mockery of.”

Derek Banic insisted they go, and it saved his wife's life. She had an aortic dissection, meaning her aorta — the largest blood vessel in the body — was torn, a rare and often fatal condition.

“They’ve already told us that had we not went back to the hospital, I was within hours of passing,” she says. “It was overwhelming.”

Amanda Banic felt excited about her first pregnancy and welcoming a new baby. For 34 weeks, she experienced a “beautiful, very healthy pregnancy.” Then one day she felt a jolt of chest pain, and the couple rushed to the hospital. Doctors told her was fine.

“They had sent me away with anxiety and indigestion,” she says. “That whole week I just kept declining.”

A week later, she remembers feeling “very uncomfortable” and tossing and turning in bed. Since her first hospital visit, she had gained 20 pounds.

When her husband saw her, he knew immediately they had to go to the hospital. But she hesitated to return.

Eventually the doctor agreed after learning about Amanda Banic’s family history of Marfan syndrome, a genetic condition that can cause heart problems, including aortic dissection, according to the Marfan Foundation. They conducted a second CT scan and discovered that her aorta was dissected.

As a cardiothoracic surgeon, Dr. Stephane Leung has treated several patients with aortic dissection, even though it’s rare. It occurs so infrequently during pregnancy that few doctors have experience managing situations like the Banics. As he waited for his patient to arrive at Corewell Health in Grand Rapids, Michigan, he read the handful of cases studies on aortic dissection in pregnant people.

While the delivery on May 9, 2023, went off without a hitch, Banic was at risk of hemorrhaging afterward. That’s because blood flow increases when a person gives birth, and she was taking blood thinners in order to be on the bypass machine, which prevent blood from clotting.

My Take...

Pregnant women are just “collateral damage” in the \$200+ billion mRNA Vaccine Industry.

It may be several years before we find out how many millions in bribe money was given out to Ob/Gyn Medical Associations to push these toxic products on pregnant women.

COVID-19 mRNA Vaccinated Pregnant women are at a significantly increased risk of cardiac injury (cardiac arrests) and blood vessel injury (aneurysms), either of which can result in sudden death.

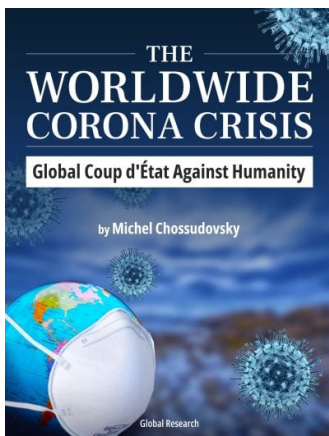

I did not include mRNA induced blood clots or Turbo Cancers in this article.

Recommending COVID-19 mRNA Vaccines in pregnancy isn't just medical malpractice, it's criminal. And they're still doing it, with no intention of stopping.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects

humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument."

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight. -Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden "plandemic"; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that "there is no causal relationship between the virus and economic variables." In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. -David Skripac

A reading of Chossudovsky's book provides a comprehensive lesson in how there is a global coup d'état under way called "The Great Reset" that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
