

COVID-19 Vaccine Spike Protein in the Brain?

Top New York Cancer Doctor, COVID Vaxxed, 40-year Old Dr. Krystal Cascetta Shot Her 4-month Old Baby Then Turned the Gun on Herself in a Shocking Murder-Suicide.

Westchester County, NY – On August 5th, 2023, 40-year-old Dr. Krystal Cascetta shot herself and her 4 month old baby dead at their \$1 million Westchester home in what police are calling a murder-suicide. ([click here](#))

New York State Police have said 40 year old Dr. Krystal Cascetta, entered the baby's room around 7am on Saturday in the town of Somers, which is in Westchester County, New York,

and shot the baby before turning the gun on herself.

Dr. Cascetta was a well renowned hematology and oncology specialist with Mount Sinai in New York City

She was married to 37 year old Timothy Talty, an entrepreneur and energy bar tycoon, who was not home at the time.

Cascetta and Talty were married in 2019 at a ceremony in Greenpoint, Brooklyn. Talty owns the protein bar company Talty Bars.

The company's website says that Cascetta used her medical and science background to help advise in the creation of the product.

Cascetta had lived in the Granite Springs area of Somers in New York inside a \$1 million home with her husband Tim Talty, pictured here. He was not home at the time of the murder/suicide

Officials said Cascetta's parents were inside their \$1 million house during the fatal shootings.

Officials said Cascetta's parents were inside the house during the fatal shootings. Pictured: The couple's home purchased in 2021

Cascetta was a breast cancer researcher and an award winning doctor:

Cascetta accepting the Physician's Recognition Award at the 2018 SHAREing and CAREing Gala.

Mount Sinai Queens/Facebook

"The people closest to Krystal will tell you that being a doctor is in her DNA," Talty Bars' website reads. "Krystal, herself, will tell you that she has wanted to be a doctor for as long as she can remember; that even as a child she could be found wrapping her dolls in gauze."

COVID-19 mRNA vaccine spike protein in the brain?

I have written several substack articles about COVID-19 vaccine spike protein accumulation in the brain and the resulting neurological and psychiatric injuries.

As a top Mount Sinai, New York hematologist/oncologist, she would have taken at least 4 or 5 COVID-19 vaccines to be considered "up to date" on her vaccinations and to "protect her cancer patients".

I have heard this argument advanced by my own Oncology colleagues in Alberta, Canada, all of whom are 4 or 5 COVID-19 vaccines deep and continue taking them as they think the mRNA jabs protect their cancer patients (they don't).

Canadian doctor suicides have skyrocketed since COVID-19 vaccines rolled out in 2021. ([click here](#))

In the biggest mainstream media hit piece that was done on me by Global News and 20-something year old reporter Ashleigh Stewart, she claimed that after "months of investigation", of the 80 Canadian doctor sudden deaths I reported at the time, she

discovered 6 had died by way of suicide.

The number is probably a bit higher than that. Here are the Canadian doctors rumored to have died by way of suicide. Most of them are very young:

 <p>Died: Dec.19, 2022 Dr. Abeera Shahid Age: 25 Ottawa, ON Med Student UofOttawa Passed away unexpectedly</p>	 <p>Died: Nov.27, 2022 Dr. Warren Yunker Age: 46 Calgary, AB Family Physician Neurological - MND, suicide</p>	 <p>Died: Nov 14, 2022 Dr. Sean Grondin Age: 56 Calgary, AB Thoracic Surgeon Died suddenly</p>	 <p>Died: Nov 05, 2022 Dr. Louis-Benedict Landry Age: 28 Montreal, QC Medical Student Died suddenly (suicide?)</p>
 <p>Died: July 26, 2022 Dr. Ryan Buyting Age: 26 Edmonton, AB (U of Alberta) Neurosurgery resident 1st yr Neurological, suicide</p>	 <p>Died: Dec 31, 2021 Dr. Louise Feddema Age: 60 Canmore, AB Family physician Neurological, suicide</p>	 <p>Died: Jul 31, 2021 Dr. Sanjay Achal Age: 28 Calgary, AB (U of Calgary) Medical student 4th year Died suddenly, neurological sx</p>	 <p>Died: May 11, 2021 Dr. Farah Nasser-Sharif Age: 47 Port Perry, ON Internal medicine Died "tragically at home"</p>

While Global News latched onto the doctor suicides as a way of "discrediting" me, in reality, they simply confirmed that there is a very serious problem with COVID-19 mRNA vaccinated Canadian doctors committing suicide in high numbers.

Suicide Attempts Post-Pfizer or Moderna

Here are the types of post COVID-19 vaccine reactions being recorded in the literature. These are from a previous [substack article I wrote in March 2023](#):

Case 1: 37 yo Japanese man has psychosis after Moderna

A 37 yo Japanese man with no psychiatric history had Moderna booster shot and complained of headache, a floating sensation and difficulty concentrating. ([Kita et al](#))

He presented 4 days later with talkativeness, and grandiose delusions, saying that he had won 2 billion yen in horse racing. He also presented with emotional instability, such as crying, sleeplessness, excitement, hyperactivity and sexual deviance.

He was discharged. Nine days after Moderna booster he jumped from the 2nd floor of his house, and was brought back to hospital by ambulance. He exhibited flight of ideas, hyperactivity, distraction, hyperthymia and religious delusions, such as saying "my child is God". He displayed lack of insight and became enraged when his actions were restricted.

He was diagnosed with acute mania with psychotic features and stayed 66 days in the hospital.

Case 2: 45 yo Latvian man has psychosis & suicide attempt after mRNA

45 yo Latvian man with no psychiatric history presented 1 month after 2nd dose of mRNA vaccine, accompanied by his parents because of bizarre behavior and an attempted suicide by hanging in the early morning. ([Renemane et al.](#))

Immediately after his 2nd mRNA dose, he developed insomnia, unreasonable anxiety and tremor.

After 2 weeks, he realized that he has been jinxed as he found some white powder under the carpet in his apartment. From that moment, he became cautious, did not leave the apartment, and reported persecution.

On the last day before his visit to the psychiatric clinic, the patient saw a man walking past the windows of his apartment and watching him. The patient described the thoughts in his head as not his own, giving him commands to observe the person on the street. He did not sleep that night and had a strong belief that he should commit suicide. He attached a rope, tried to hang himself, but his father stopped him.

Case 3: 45 yo Croatian man has psychosis & suicide attempt after AstraZeneca

45 yo Croatian man developed unusual behavior 5 days after AstraZeneca. He became anxious, suspicious, paranoid, disorganized and complained of headaches. ([Borovina](#))

Two weeks after COVID-19 vaccination, persecutory delusions and delusions of reference led him to suicide attempt by stabbing himself in the abdomen.

He had surgery and spent 23 days in the hospital.

My Take...

We simply never hear about the post COVID-19 vaccination suicide attempts documented above .

According to UK Government Data (Dept of Work and Pensions), psychiatric injuries and disabilities are up 124% in 2022:

2022 Psychiatric: +124%

- anxiety and depressive disorders +126%
- hyperkinetic disorder +336%
- stress reactions +191%
- mood disorders +106%

Yearly PIP clearances (New Claims), from 2016 to 2023.

I believe that the COVID-19 mRNA vaccine spike protein accumulates in the brain and causes tremendous injuries which can be neurological and psychiatric.

I believe that COVID-19 mRNA vaccinated individuals have a much higher risk of developing

mental health conditions that lead to suicide ideation and attempt, than the unvaccinated.

I now wonder if this same mechanism of spike protein injury in the brain translates to an increased risk of mental health conditions that lead to homicide ideation and attempt.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
