UK - 23 year old Chandler Plante, a magazine editor, had "mild COVID" in Dec. 2020, suffered a stroke in March 2021 and lost all vision in her right eye in Nov. 2021. "No one understands why this has happened to me" ([source](#)).

This article blames the "mystery illness" on "severe long COVID" which doesn't make sense. She had mild COVID in Dec. 2020 and then a stroke in March 2021. Chandler is presumed COVID-19 vaccinated (article would focus on her being unvaccinated).

Her illness started as numbness in hands and forearms and she was dismissed as having "anxiety". By June 28, brain scan showed big ischemic strokes.

By April 2023 she had infusion of a chemo drug rituximab and her side effects are improving significantly.

I suspect she had an autoimmune condition caused by COVID-19 vaccines and her doctors either never figured it out or never told her.

Aug. 24, 2023 - Calamvale, QLD, Australia - Shermayne Peka had headaches and a stroke in Dec. 2022 and her doctors blamed it on a "hole in her heart" which they couldn't find on later pre-surgery scans. When her headaches returned in July 2023 she was diagnosed with Glioblastoma Grade 4 (TURBO BRAIN CANCER) ([source](#)).

Maryanne Peka is organizing this fundraiser.

Created 19 hrs ago •  Medical

Hi I'm Maryanne and I'm fundraising to help support my sister Shermayne. She had a stroke in Dec 22 and it was thought then that a hole in her heart which they discovered was the likely cause. Horrific headaches occurred prior to this event. She was on video call with our dad when he noticed something was wrong and made her get checked out. As luck would have it her husband Chris came home early for no reason but God had a reason, he was to be her knight n shining armor, taking her to the hospital. She was told she wouldn't walk and would have paralysis. She proved them wrong. July 21, 2023 our dads 70th birthday and our younger brothers birthday She was to have the heart surgery, they could no longer find it "what a miracle". July 23 the same headaches like the stroke. Chris takes her back to hospital and a scan reveals a tumor. I flew over. After surgery they couldn't remove it all and long wait begins to wait for the results. Longest 6 days ever. Diagnosis Glioblastoma Grade 4, WTF is happening. We are sad for a moment which felt like an eternity. We decide we have to move on and LIVE...live for the now, live like its our last day, live because we can. During this ordeal the expenses are horrific, carparks which weren't subsidized until 2 weeks later, tolls, petrol, food, bills, pet care and anything else you can think of all add up. Chris is not working at the mo to care for his wife, which is what she wants. We cut her hair off, we take control of that. We buy her 2 wigs to give her options. We are trying to make things work. One thing on her list is to renew her and Chris' vows in Japan under Cherry Blossoms. God willing this will happen. She has decided she will fight this mother with

Aug. 23, 2023 - Covington, GA - Hailey Sertain had shingles and a stroke. (shingles are a common side-effect of COVID-19 vaccines).

Hailey Sertain

Emily Sertain is organizing this fundraiser on behalf of Hailey Sertain.

Created 2 d ago •  [Rent, Food & Monthly Bills](#)

Hi, my name is Emily this go fund me is for my wife Hailey. Last week she got shingles in the eye and has been admitted into the hospital ever since she has been in there for 5 days now. Due to the shingles she had a stroke in her left eye and has lost all Vision and sight in her left eye, her face has been swelling to the point to where her eyes won't stay open anymore and is barely recognizable. The doctors are doing all they can to get a medicine to work that will help the situation. This has impacted my wife in so many ways. She hasn't and cannot work and we don't know she will be able return to work, can no longer drive, and

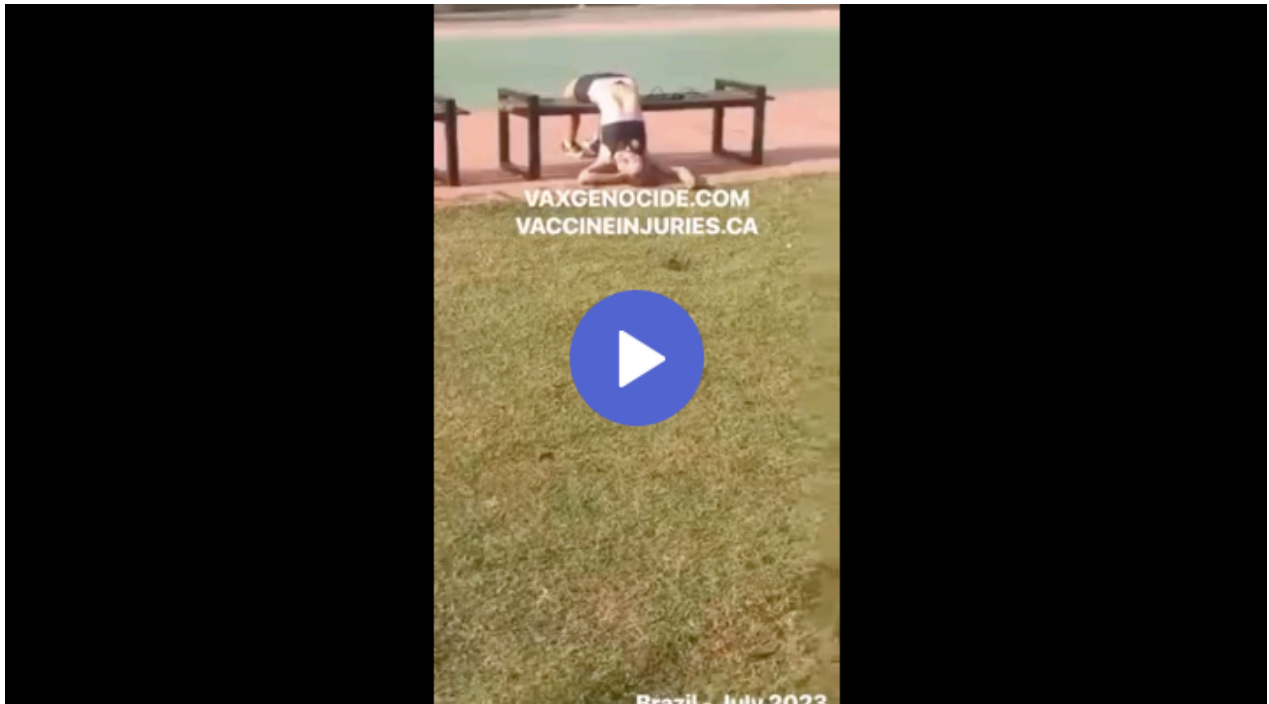

July 17, 2023 - Waukesha, WI - Abelardo Ortega Zarate and his wife Mariana Huerta dreamed of going to Rome, Italy in March 2020 but had to cancel because of COVID-19. They finally went on May 2, 2023 but Mariana suffered a stroke on their first day in Rome and ended up in the ICU. She never recovered and died on July 17. ([Source](#))

Please help the Zarate family with medical bills

AZ and Mariana had their dream vacation planned to travel to Rome, Italy back in March of 2020. Unfortunately, their vacation was cancelled then due to the COVID-19 pandemic. They were finally able to get their vacation rescheduled and left for Italy on May 2nd. Their dream vacation turned into a nightmare. On May 4th Mariana suffered a stroke on their first day in Rome and was taken to Azienda Ospedaliera San Giovanni Addolorata hospital. Mariana was treated in the ICU for a week before she had surgery to remove multiple blood clots blocking blood supply to the area of the brain responsible for breathing. She has been in a medically induced coma and is still in the ICU today.

July 11, 2023 - Brazil - 24 year old Vanessa Batista dos Santos collapsed and died while exercising in the park, skipping rope (she died of a hemorrhagic stroke).

Kristina Hobbs is organizing this fundraiser on behalf of Walter Copeland.

Hello,

as some of you may have heard already, my sister-in-law Deirdre Copeland had a completely random and unexpected reaction to medication for her rheumatoid arthritis on June 10th.

She had seizures, a bunch of strokes and had to be air lifted to Barnes where they performed emergency brain surgery and removed many blood clots but unfortunately couldn't remove all of them. She is on life support in the ICU and we have been told she will not wake up.

June 10, 2023 - Brooks, GA - Ashlie Newton had blood clots in her legs and a stroke. She is on the long road to recovery.

Help for sweet Ashlie - she had a stroke 6-10-23

Jennifer Davis is organizing this fundraiser on behalf of Ashlie Newton.

My name is Jenny and one of my dearest friends Ashlie "Lady" Newton, has suffered a stroke and has been in neuro ICU in GA since 6/10/2023. Her family has shared that her stroke was due to a missed diagnosis of high-blood pressure and she also has 2 blood clots in her leg. "Some days have been better than others, and at this time 7/20/2023 she is both alert and responsive." Ashlie is still on a ventilator, and prayerfully will have it removed soon. It's not known at this time, when she will be able to be discharged. First, please pray for my friend Ashlie.

April 22, 2023 - Clermont, FL - 34 year old Kaleigh Zimmerman, a nurse and mRNA vaccine activist who fought "vaccine misinformation" suffered a cerebellar stroke. She faces a long road to recovery. The twist: unvaccinated people are donating to her GoFundme to help her recover. ([Source](#))

Help Smugnurse on Her Road To Stroke Recovery

Team fundraiser

NoRads ToTheNads and Kiara Wade are organizing this fundraiser on behalf of Kaleigh Zimmerman.

Many of us know Smug Nurse from TikTok for her sassy responses and fighting covid and vaccine mis/disinformation. While now she needs our help. On Saturday April 22, 2023 she was hospitalized for a cerebellar stroke. Since then she has had a procedure to place a shunt to help relieve some of the pressure on her brain, and we are hoping that it can be removed and that she is discharged soon. She is talking and doing ok, but faces a long road of recovery. As a single mom who works as a nurse (but her company just closed down), she is going to be out of work for a while. She could really use the help of the communities

April 20, 2023 - Atlanta, GA - Zenette Steele suffered a spinal stroke 24 hours after her COVID-19 booster shot. She is now paraplegic ([Source](#)).

Zenette Steele

April 20 at 11:40 PM · 🌐

Hello to my friends and family on Facebook page I know most of you saw my picture that I posted of myself and my eldest son those were pictures from the past about a few months ago I did that because it made me felt good. Looking back at myself, standing able to walk, able to go about my every day life which I have enjoy, working caring for individuals, and now today, Thursday, March 20th i'm not walking as of yet that wheelchair you see in the picture I use a sliding board to get to and from it I get PT at home also OT and I have a home health aide assisting me. I can use my app I have body make an a long story short, because I know it baffles some people delete long stories. I had to come back to the hospital because my UTI was not cleared up. Also, I had to get my colon cleanse it was backed up, so this is my current situation I know it God all things are possible to those who believe I keep my faith and I know that one day I will walk again, my message to you, friends and family don't take I life for granted enjoy your life enjoy your body as you have it as one also remember to go to the doctor check up yourselves even though my spinal stroke came from taken the Covid booster 24 hours that was it for me my little buddy just shut down I appreciate all of your prayers and well wishes. God bless each and everyone of you and enioy your life with your family. 🙏🙏🙏

I will appreciate from your heart what ever you can give, will help me a great deal after having a spinal stroke on 13 January one day after my booster shot I've been hospitalized four times due to infections hospital bills are piling up. [I'm currently paraplegic](#). I pray one day I'll be able to walk with the help of Sheppard Center . God bless and thank you from my heart.

Dec. 2022 - 45 year old BBC broadcaster Jennie Gow suffered a serious stroke in December 2022. "My speech has been the thing that is most affected".

| Jennie Gow said she was "progressing well" after suffering a serious stroke

Broadcaster Jennie Gow has updated fans on her recovery from a serious stroke ahead of the new Formula 1 season.

The 45-year-old, who covers F1 for BBC Radio 5 Live, said she was "progressing well" since her stroke at the end of December.

In a message on the **BBC's Chequered Flag podcast**, Gow added "my speech has been the thing that is most affected".

Podcast co-host Jack Nicholls said: "We wish Jennie all the best and hope to

June 2022 – 35 year old Irish football player Siobhan McGrath suffered a stroke. "My arms just weren't functioning properly.

Player Profile: Siobhán McGrath

A four-time All-Ireland winning footballer has said she counts herself 'very lucky' after recovering from a stroke.

Dublin star Siobhán McGrath suffered a stroke last June, after dismissing aches and pains she was experiencing as simple exhaustion.

However this changed when she suffered a stroke last June.

The 35-year-old told [Lunchtime Live](#) she noticed something strange when she went to get dressed.

"I was trying to put on my t-shirt, and I noticed then my hands and my fingers were in different directions," she said.

"My arms just weren't really functioning properly.

"My t-shirt got a bit tangled in my hands, and my brain just wouldn't comprehend how to actually untangle the t-shirt and put it on.

"I decided I just needed to get a bit of air, so I went over to my window and I tried to open that.

"Again, I could put my hands on the clasp, but my brain couldn't figure out how to push them and my fingers wouldn't really do it either".

Dec. 26, 2021 - North Staffordshire, UK - 37 year old Charlotte Evans collapsed in the kitchen and had a stroke, she was given 50/50 chance to live.

Family's horror as woman hit by stroke aged 37 collapses in kitchen

Charlotte Evans was given a 50/50 chance of survival

A North Staffordshire woman has opened up about the ordeal of being hit by a debilitating stroke aged just 37. Charlotte Evans, from Audley - a former promotions worker at The Sentinel - was given a 50/50 of survival.

After the stroke, she suffered the loss of the right side of her body. She said that she had to go through extensive physio. Now, the 38-year-old has all but recovered to full health.

She said: "I wouldn't call myself sporty but I was pretty active, walking my dog and such. It was on Boxing Day 2021 and I was upstairs. On Christmas Day I wasn't drinking or feeling particularly unwell

" I went downstairs and when I went into the kitchen. I knew something was happening. It's hard to describe but there was something going wrong.

READ: Family need £30k to get Jack, 28, home 33 days after he collapsed in Benidorm

"I remember I shouted my partner Sean, he was in the bedroom which is above the kitchen, I fell on the floor and I heard Sean come into the room. I grabbed the handle of the oven as I fell.

"The next thing I remember is the ambulance driver's voices and my mum's voice too. I can't remember a week of my life. It's just blank. They operated on me during that time.

"I remember they told me I had covid so they put me in this pod, like a glass room. I just remember waking up and knowing that I had had a stroke.

"Of course I wasn't aware they had given me at this point a 50/50 chance of surviving, but when I was bought out of the anesthetic I apparently said 'I feel better than I did before'. Professor Roff said to my

Nov. 2021 – Sydney, Australia – 37 year old Laura Sharp, stay at home mom of 5, had bad migraines, vision problems, and suffered a stroke. She had no risk factors.

Healthy and fit mum of five who had a stroke at 37 reveals the two uncommon symptoms she suffered and why she waited THREE DAYS before going to hospital

- Mum-of-five wants everyone to know stroke symptoms after shock diagnosis
- Laura Sharp was 37 when she had a stroke - mistaking it for a bad migraine
- The mum stayed home for three days before going to hospital to get help
- She experienced blurred vision, neck pain and a headache - not numbness

For Laura Sharp the idea of having a stroke was so far-fetched it had never even crossed her mind.

The 37-year-old mother-of-five from [Sydney](#) was never sick, eats a diet brimming with green, leafy vegetables, hits the gym for hours every week and walks 7.5km every morning.

But in November, the unthinkable happened and Laura found herself in hospital, surrounded by doctors who, after pumping her full of medications and conducting an MRI, revealed she'd had a stroke.

The busy mum, whose kids are aged between three and 15, has none of the risk factors of stroke which include obesity, smoking, diabetes or high blood pressure.

The first sign something was wrong came three days before Laura was rushed to hospital.

She said it was a 'normal Friday', her husband was away for business, she had gone for her 7.5km walk, sent her kids to school, done a heavy session at the gym, and then hung out with her children in the afternoon.

She put them to bed and had gone to her own room to watch TV when she realised something was off.

'The television was blurry and I couldn't work out why,' she said.

'I turned it off and on again before I realised it was actually my eyes.'

March 2021 - Henderson, NV - 18 year old Emma Burkey had strokes following her one dose of J&J COVID-19 vaccine. She remains confined to a wheelchair in 2023 ([Source](#)).

Emma's Medical Expenses

Bret Johnson is organizing this fundraiser on behalf of Kathy Burkey.

Emma Burkey, 18, became seriously ill with seizures and clotting in the brain following her vaccination with the Johnson & Johnson COVID-19 one-dose vaccine on March 20, 2021. Emma was initially treated at St. Rose Hospital, Siena Campus in Henderson, Nevada beginning on March 30, but was subsequently airlifted several days later to Loma Linda Hospital 's (near San Bernardino, California) special neural treatment unit. Emma was put into an induced coma, ventilated and at least three brain surgeries have been done to repair blood clots. If you follow the national news, the J & J vaccine has been put on hold because of these rare cases (now as of April 23, the J & J vaccine has been re-released). Unfortunately, Emma is the "one in a million" here.

My Take...

It is clear in the early days of COVID-19 mRNA jab rollout, women were collapsing with strokes and their doctors weren't even considering COVID-19 jabs as a cause.

These "mysterious strokes" in young COVID-19 vaccinated women continue to this day. Women often have other vaccine injuries in addition to their strokes.

[UK Govt Disability Data](#) shows how much "clotting disorders" are up in 2022 compared to a pre-pandemic average:

- age 20-24 is +170%
- age 25-29 is +278%
- age 30-35 is +1005%
- age 35-39 is +700%
- age 40-44 is +387%
- age 45-49 is +1427%

- age 50-54 is +989%

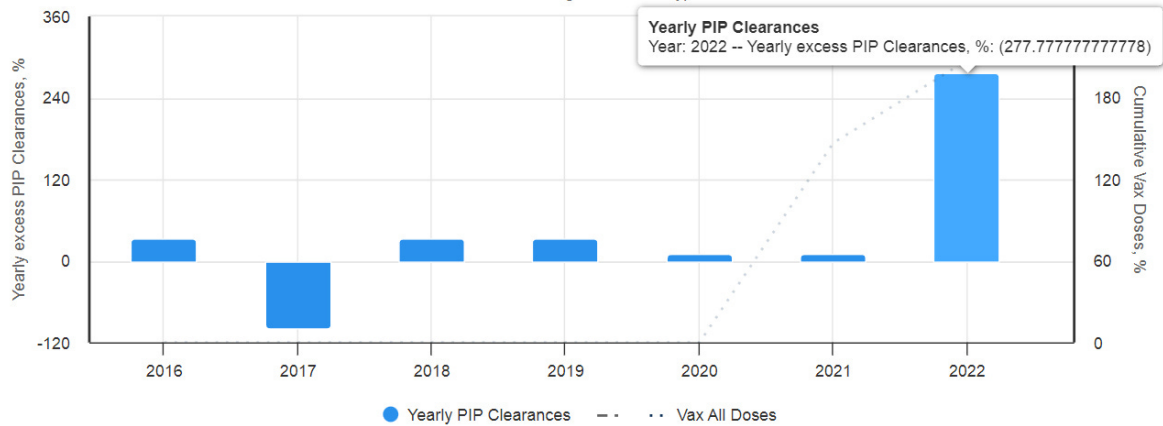

In any COVID-19 vaccinated young woman, any symptoms of a stroke or a TIA (transient ischemic attack) should be considered due to the vaccine until proven otherwise.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
