

COVID Is Not the Threat

By [Dr. Paul Craig Roberts](#)

Global Research, November 24, 2020

Region: [USA](#)

Theme: [Science and Medicine](#)

Covid is a real virus. It is a threat to a small minority of the population—primarily people with poor immune systems and comorbidities.

There are inexpensive ways of boosting immune systems with supplements, such as zinc, vitamins C and D3, Beta Glucan, and NAC. But public health officials have not educated the public about the value of supplements in the Covid battle. The reason is that so-called public health officials are shells for Big Pharma's profits, and Big Pharma regards good immune systems as a hindrance to profits.

There are also two effective, safe, and inexpensive cures for Covid. One is the combination of hydroxychloroquine (HCQ), azithromycin, and zinc. The other is the combination of ivermectin, azithromycin, and zinc. See [this](#).

The use of these known cures has been blocked by public health officials, such as Tony Fauci of the National Institute of Health. Again, the reason is Big Pharma's profits. The use of these effective cures negates the profit opportunity of a new vaccine.

So many have died by denying treatment while we wait for a vaccine that some experts worry will be more dangerous than Covid— see [this](#).

Keeping Covid alive as a threat serves other harmful purposes. As I wrote on November 13, the main threat from Covid is not the disease— see [this](#). When Covid subsides as a threat, the increased powers of government over citizens will remain.

In Europe and in parts of the US, it is clear that the people understand that the lockdowns and mask rules are a bigger threat to them than Covid. In Germany there have been mass protests, which are spreading elsewhere in Europe— see [this](#).

Klaus Madersbacher says Germans have memories of where the use of arbitrary power leads. Unlike the American "anti-fascist" Antifa and BLM movements which conduct Kristallnacht against white businesses, a real anti-fascist movement in Germany fights against the lockdown: see [this](#).

In Huntington Beach, California, there were protests early Sunday morning against the Democrat governor's curfew— see [this](#).

Sheriffs in five California counties with a population of 17,250,000 people refuse to enforce the nutty governor's curfew— see [this](#).

Even the police, who welcome any excuse to exercise power, are backing away from enforcing ineffective but intrusive Covid rules. Just as the California sheriffs are declining,

the police chief in Leipzig, Germany, said that there is no point in using the police to fight a pandemic.

The only reason that the “pandemic” continues is that Western public health officials are financially tied in one way or another with Big Pharma, and public health officials are using their positions in the interest of these financial connections.
