Abstract

This preprint paper, [Serious Adverse Events of Special Interest Following mRNA Vaccination in Randomized Trials](#), was written by a team of highly credible authors and is now undergoing peer review. It points out that the vaccines carry more risk than benefit.

Big whoops. That's not what the CDC and FDA have been saying. This is really embarrassing for them that now others are starting to discover what I've been saying for over a year now.

Don't expect the mainstream media to cover this or ask any questions. That's not the way it works.

Tennessee and Publix Super Markets get it

Woo hoo!

Christina Pushaw 🇺🇸 @ChristinaPushaw · 5h

Good decision. Following the data.

Publix won't give COVID vaccine to children under 5

tampabay.com

Publix won't give COVID vaccine to children under 5

The Lakeland grocery chain said it will not release a statement explaining its decision.

And this just in from Tennessee:

Covid Memo @CovidMemo · 6h

Thank you!! Go Tennessee! Saving children's lives and sparing them the risks.

Thank you for following the data and caring enough to speak up!

Following in Florida's footsteps.

Rep. Jason Zachary @JasonZacharyTN · 11h

Yesterday, I was joined by @tnhousegop Leadership in requesting that @GovBillLee direct the @TNDeptofHealth to halt any distribution, promotion or recommendation of the Covid vaccine for children under 5.

The letter we sent to the Governor is 📎.

... but California is completely clueless. Instead of following "the science," in California doctors will "follow the herd"

Once this paper is published, it then becomes "misinformation" according to the State of California (assuming they pass [AB-2098](#) which seems likely). That means that any physician relying on this paper to counsel their patients could have their license to practice medicine taken away.

That's how things work in California. It's not about "follow the science" anymore. That is not a defense. As a doctor you must "follow the herd." If you disagree with the masses, even if you are right, kiss your medical license good-bye!!

But there is a hidden feature of AB-2098 that nobody is talking about: it is IMPOSSIBLE for doctors to shift position on a topic like vaccine safety. Either 100% of the doctors are for it, or 100% will be against it. There can't be a middle ground or you get your license revoked so everyone has to stick with the initial narrative. That means the vaccines will always be

safe and effective in California even when they aren't.

If that doesn't enforce conformity, I don't know what will.
