

# Is the Danger COVID or the Vaccine?

Why is so much evidence being suppressed?

*How many Americans are as brave as Buffalo Bills wide receiver Cole Beasley, who announced he would give up playing football before he submits to the NFL’s vaccine protocols? See [this](#).*

Health care employees and many other Americans are experiencing pressure to accept vaccination or be fired. For example, a hospital in Texas has made vaccination a condition of employment. I can understand the reluctance of a nurse or doctor, who has witnessed severe injury and death to those who were vaccinated, being unwilling to subject themselves to the risk. They have exposed themselves for 16 months to risk of infection by treating those who are infected. Now they are declared to be a risk to patients because they are not vaccinated and are pressured to accept the high risk of injury from the vaccine.

David Ramsey offers advice to one nurse:

Notice how quickly American corporations have taken to the idea that they have the right to make deeply personal decisions for employees.

It is no longer just US presidents, such as Bush and Obama, who claim authority to set aside our constitutional protections and throw us in prison and execute us without due process, private profit-making corporations are now asserting the right to make our personal decisions.

What does this tell us about the belief in freedom in America? It tells us that it is the last thing public and private leaders think about. Freedom? What is that? The right to disagree with the government, the boss, the media? That’s terrorism. That’s conspiracy theory. That’s being uncooperative. Take off the tinfoil hat and do as you are told.

This is what everyone who works for a US corporation experiences. Take the vaccine. Don’t use these pronouns. Go to sensitivity training. Submit! Submit! Submit!

That is America today. Notice how quickly it came on us. Compare today with 16 months ago and observe the rapid erosion of freedom.

During the 20th century Cold War, Americans heard about “captive nations.” Today America is a captive nation.

Employers’ demands that employees submit to vaccination are not merely assertions of authority over personal decisions and violations of freedom. A lot of evidence indicates that vaccination mandates endanger people’s lives. Much evidence indicates a high incidence of death and serious injury associated with Covid vaccination and that the vaccine itself is causing the variants. See below for one such warning.

The scientific evidence should be publicly debated. Instead, the evidence is suppressed. If the evidence is mistaken, it should be easy to show that to be the case. So why is it suppressed instead of examined and debated? How can it be that corporate executives and boards can be ignorant of the dangers to which they demand employees subject themselves?

Is this a plot against life as people increasingly believe, or is it just stupidity and incompetence on the part of those in leadership positions. Neither answer is reassuring.

Dr. Peter McCullough provides one of the many unambiguous warnings issued by highly qualified experts, people far more knowledgeable than Tony Fauci, a medical bureaucrat whose lifetime work has been to maximize the profits of the pharmaceutical industry: see [this](#).

Dr. Peter McCullough – COVID Vaccines Have Already Killed 50,000 Americans. Is the United States gearing up to force people to submit to vaccination?

Dr. McCullough is Vice Chief of Internal Medicine at Baylor University, editor of *Reviews in Cardiovascular Medicine*, senior editor of the *American Journal of Cardiology*, editor of the textbook *Cardiorenal Medicine*, and president of the Cardiorenal Society.

“The first wave of the bioterrorism was a respiratory virus that spread across the world, and affected relatively few people—about one percent of many populations—but generated great fear,” McCullough explained during the Oval Media webinar with other doctors. He noted that the virus targeted “mostly the frail and the elderly, but for otherwise well people, it was much like having the common cold.”

Dr. McCullough has treated many patients with the disease, written papers on it, had the disease himself, and has also seen a death in his own family due to COVID.

He believes that fear of the virus was used very quickly to generate policies that would hugely impact human life, such as the draconian lockdowns.

“Every single thing that was done in public health in response to the pandemic made it worse,” he pointed out.

McCullough explained that early on, as a doctor treating COVID patients, he came up with an early treatment regimen for those struck with the virus, which reduced hospital stays by about 85 percent, and said he began publishing papers on what he had learned. The doctor noted that he was “met with resistance at all levels” in terms of actually treating patients and publishing his papers.

“Fortunately I had enough publication strength to publish the only two papers in the entire medical literature that teaches doctors how to treat COVID-19 patients at home to prevent hospitalization,” he said.

“What we have discovered is that the suppression of early treatment was tightly linked to the development of a vaccine, and the entire program—and in a sense, bioterrorism phase one— was rolled out, and was really about keeping the population in fear, and in isolation preparing them to accept the vaccine, which appears to be phase two of a bioterrorism operation.”

McCullough explained that both the coronavirus and the vaccines deliver “to the human body, the spike protein, which is the gain of function target of this bioterrorism research.”

He acknowledged that he couldn’t come out and say this on national television because the medical establishment has done such a thorough job of propagandizing the issue.

“What we have learned over time is that we could no longer communicate with government agencies. We actually couldn’t communicate with our propagandized colleagues in major medical centers, all of which appear to be under a spell, almost as if they’ve been hypnotized.”

“Good doctors are doing unthinkable things like injecting biologically active messenger RNA that produces this pathogenic spike protein into pregnant women. I think when these doctors wake up from their trance, they’re going to be shocked to think what they’ve done to people,” he said, echoing what he, and Dr. Harvey Risch, professor at the Yale School of Public Health, told Fox News host Laura Ingraham during an interview last month.

Last summer McCullough started an early treatment initiative to keep COVID patients out of the hospital, which involved organizing multiple groups of medical doctors in the United States and abroad. The doctor noted that some governments tried to block these doctors from providing the treatments, but with the help of the Association of Physicians and Surgeons, they were able to put out a home patient guide, and in the U.S., organized four different tele-medical services, and fifteen regional tele-medical services.

This way, people who were stricken with COVID-19, were able to call in to these services and get the medications they needed prescribed to local pharmacies, or mail order distribution pharmacies, he explained.

“Without the government really even understanding what was going on, we crushed the epidemic curve of the United States,” McCullough claimed. “Toward the end of December and January, we basically took care of the pandemic with about 500 doctors and telemedicine services, and to this day, we treat about 25 percent of the U.S. COVID-19 population that are actually at high risk, over age 50 with medical problems that present with severe symptoms.”

“We know that this is phase two of bioterrorism, we don’t know who’s behind it, but we know that they want a needle in every arm to inject messenger RNA, or adenoviral DNA into every human being,” he said. “They want every human being.” The doctor later warned that the experimental vaccines could ultimately lead to cancers, and sterilize young women.

Dr. McCullough said his goal is to set apart a large group of people that the system cannot get to, which would include those who have already had the virus, those with immunity, children, pregnant women, and child-bearing women.

The cardiologist went on to say that because there is no clinical benefit in young people whatsoever to get the vaccine, even one case of myocarditis or pericarditis following the shots “is too many,” yet even though the CDC is aware of hundreds of alarming reports of cases of heart swelling in teenagers and young adults, they’re only going to reevaluate the matter later on in June. He accused the medical establishment of neglecting to do anything to reduce the risks of the vaccines.

As someone who has chaired over two dozen vaccine safety monitoring boards for the FDA, and National Institute for Health, McCullough had room to criticize how the vaccines have been rolled out.

“With this program, there is no critical event committee, there is no data-safety monitoring board, and there’s no human ethics committee. Those structures are mandatory for all large clinical investigations, and so the word that’s really used for what’s going on is malfeasance, that’s wrongdoing of people in authority,” the doctor explained.

“Without any safety measures in place, you can see what’s going on,” he continued.

“Basically it’s the largest application of a biological product with the greatest amount of morbidity and mortality in the history of our country.”

“We are at over 5,000 deaths so far, as you know, and I think about 15,000 hospitalizations. In the EU it’s over 10,000 deaths. We are working with the Center for Medicaid (CMS) data, and we have a pretty good lead that the real number is tenfold.”

McCullough explained that because the Vaccine Adverse Event Reporting System (VAERS) database only amounts to about 10 percent of the bad reactions to the vaccines, his team has had to go to other sources for information.

“We have now a whistleblower inside the CMS, and we have two whistleblowers in the CDC,” the doctor revealed. “We think we have 50,000 dead Americans. Fifty thousand deaths. So we actually have more deaths due to the vaccine per day than certainly the viral illness by far. It’s basically propagandized bioterrorism by injection.”

Dr. McCullough said he’s seen people in his office with cases of portal vein thrombosis, myocarditis, and serious memory problems post-vaccination. “It’s so disconcerting,” he said.

“If you said this is all a Gates Foundation program to reduce the population, it’s fitting very well with that hypothesis, right? The first wave was to kill the old people by the respiratory infection, the second wave is to take the survivors and target the young people and sterilize them,” he said.

“If you notice the messaging in the country, in the United States, they’re not even interested in old people now. They want the kids. They want the kids, kids, kids, kids kids! They’re such a focus on the kids,” he said, noting that in Toronto, Canada, last month, they lured the children with promises of ice-cream to get the jab. According to one report, the government of Ontario—which doesn’t require parental consent for

children to get vaccinated—encouraged the kids to get the Pfizer vaccine at a pop-up vaccine event.

“They held the parents back, and they were vaccinating the kids,” the doctor reported. He said his Canadian wife’s mother was forcibly vaccinated against her will.

McCullough predicted that the United States is gearing up to force people into getting the injections.

“We have to stop it, and we have to see what’s behind it,” he concluded.
