Scotland is one of the most transparent countries about Covid vaccines.

Whoops!

I mean Scotland WAS one of the most transparent.

The country just said mRNA shots work so well that the raw data showing how well they work will no longer be released.

Because they work so well.

Covid data will not be published over concerns it's misrepresented by anti-vaxxers

By Lauren Brownlie

"Misrepresented" means screenshotted for everyone to see (though, sigh, I am not an antivaxxer anymore than someone who investigated thalidomide in 1965 is an "antimediciner.")

Here's the final chart we'll ever have.

Rates of death remain lower in people who were not vaccinated than those who received two doses, as they have for months:

Table 15: Number of confirmed COVID-19 related deaths by vaccination status at time of per 100,000, 08 January 2022 to 04 February 2022

	Unvaccinated				
Week	No. of deaths Population No. of Population Nortality Rate per 100,000 with 95% confidence intervals		No. of deaths		
08 January - 14 January 2022	17	1,542,795	11.94 (4.40 - 19.48)	3	
15 January - 21 January 2022	18	1,538,621	7.46 (2.70 - 12.22)	6	
22 January - 28 January 2022	13	1,531,988	10.68 (3.82 - 17.54)	2	
29 January - 04 February 2022	13	1,524,406	10.95 (3.40 - 18.50)	4	
		2 Do	oses*		
Week	No. of deaths	Population	Age Standardised Mortality Rate per 100,000 with 95% confidence intervals	No. of deaths	
08 January - 14 January 2022	34	999,502	14.37 (9.15 - 19.59)	72	
15 January - 21 January 2022	31	934,811	16.15 (10.27 - 22.03)	77	
22 January - 28 January 2022	26	855,982	14.87 (8.82 - 20.93)	70	
29 January - 04 February 2022	17	830,753	11.68 (6.05 - 17.32)	73	

* 1 Dose and 2 Dose populations include individuals who have exceeded the recommended dose schedule and may be subject to measure of vaccine effectiveness due to unaccounted for biases and risk factors in different populations. For more information, p summary sections above.

Vaccination status is determined as at the date of positive PCR test according to the definitions described in Appendix 6. A confirmed COVII nositive by PCR for SARS-CoV-2 at any time point and has COVID-19 listed as an underlying or contributory cause of death on the death or

Now let's look at the whole chart, including boosters - no misinformation here!

Week	Unvaccinated			1 Dose*		
	No. of deaths	Population	Age Standardised Mortality Rate per 100,000 with 95% confidence intervals	No. of deaths	Population	Age Standardised Mortality Rate per 100,000 with 95% confidence intervals
08 January - 14 January 2022	17	1,542,795	11.94 (4.40 - 19.48)	3	339,017	4.79 (0.00 - 11.14)
15 January - 21 January 2022	18	1,538,621	7.46 (2.70 - 12.22)	6	318,899	12.12 (1.58 - 22.67)
22 January - 28 January 2022	13	1,531,988	10.68 (3.82 - 17.54)	2	302,872	2.48 (0.00 - 5.96)
29 January - 04 February 2022	13	1,524,406	10.95 (3.40 - 18.50)	4	275,718	8.57 (0.00 - 17.35)
	2 Doses*			Booster or 3 Doses		
Week	No. of deaths	Population	Age Standardised Mortality Rate per 100,000 with 95% confidence intervals	No. of deaths	Population	Age Standardised Mortality Rate per 100,000 with 95% confidence intervals
08 January - 14 January 2022	34	999,502	14.37 (9.15 - 19.59)	72	2,982,479	1.52 (1.16 - 1.87)
15 January - 21 January 2022	31	934,811	16.15 (10.27 - 22.03)	77	3,070,304	1.60 (1.24 - 1.96)
22 January - 28 January 2022	26	855,982	14.87 (8.82 - 20.93)	70	3,170,693	1.43 (1.09 - 1.77)
29 January - 04 February 2022	17	830,753	11.68 (6.05 - 17.32)	73	3,229,938	1.50 (1.15 - 1.85)

* 1 Dose and 2 Dose populations include individuals who have exceeded the recommended dose schedule and may be subject to vaccine waning. Data in this table should not be used as a measure of vaccine effectiveness due to unaccounted for biases and risk factors in different populations. For more information, plage see the interpretation of data and Vaccine effectiveness.

SOURCE

13 out of the 104 people who died of Covid in Scotland in the week ending Feb. 4 were unvaccinated. In the 4 weeks ending Feb. 4, 61 of the 478 people were unvaccinated. (That's equivalent to about 30,000 deaths in the United States.)

In other words, almost 9 out of 10 of the people who die in Scotland are vaccinated, and the vast majority of those are boosted. And deaths remain stubbornly high, even though Omicron is far milder.

Scotland was among a handful of countries to publish data at this level of detail. I suspect the others will follow its lead.

The novel Covid vaccine experiment is over. It's ending. It's failed.

The authorities know the truth as well as anyone else.

They are taking their only possible course of action: end the mandates, hide the raw numbers, and hope there are no long-term problems and everyone forgets.

Oh yeah, and try to censor anyone who won't.
