

Details Still Lacking on Russian ‘Hack’

By [Robert Parry](#)

Amid more promises of real evidence to come, the Obama administration released a report that again failed to demonstrate that there is any proof behind U.S. allegations that Russia both hacked into Democratic emails and distributed them via WikiLeaks to the American people.

The New York Times, which has been busy flogging the latest reasons to hate Russia and its President Vladimir Putin, [asserted](#), “The F.B.I. and Department of Homeland Security released a report on Thursday detailing the ways that Russia acted to influence the American election through cyberespionage.”

President Obama in the Oval Office.

But the actual report fell far short of “detailing” much at all about how the disclosures of the Democratic National Committee’s manipulation of the primaries to hobble Sen. Bernie Sanders and the contents of Hillary Clinton’s Wall Street speeches ended up at WikiLeaks and ultimately became available to American voters.

Most of the 13-page FBI/DHS report was devoted to suggestions on how Internet users can protect their emails from malware, but there was little new that proved that the Russians were the source of the Democratic emails given to WikiLeaks.

The tip-off to how little proof was being offered came in the report’s statement that “The U.S. government assesses that information was leaked to the press and publicly disclosed.” When you read a phrase like “the U.S. government assesses,” it really means the U.S. government is guessing – and the report notably uses a passive tense that doesn’t even assert that the Russians did the leaking.

A well-placed intelligence source told me that there’s little doubt that elements of Russian intelligence penetrated the emails of the Democratic National Committee and Clinton campaign chairman John Podesta, but the Russians were far from alone. Indeed, placing

various forms of malware on computers is a common practice, as average folks who periodically take their laptops to an I.T. professional can attest. There's always some kind of "spyware" or other malicious code to be discovered.

The source said the more debatable issue is whether Russian intelligence then turned over the emails to WikiLeaks, especially given that WikiLeaks founder Julian Assange and an associate, former British Ambassador Craig Murray, have stated that the material did not come from the Russian government. Murray [has suggested](#) that there were two separate sources, the DNC material coming from a disgruntled Democrat and the Podesta emails coming from possibly a U.S. intelligence source, since the Podesta Group represents Saudi Arabia and other foreign governments.

Future 'Details'

So, The New York Times misled its readers by claiming that the FBI/DHS report released Thursday was "detailing" how the Russians carried out the operation, and a separate [Times article](#) essentially acknowledged that the details were still to come.

"A more detailed report on the intelligence, ordered by President Obama, will be published in the next three weeks, though much of the detail — especially evidence collected from 'implants' in Russian computer systems, tapped conversations and spies — is expected to remain classified."

In other words, the FBI/DHS report really didn't have much in the way of details and the "more detailed report" – due out before President Obama leaves office on Jan. 20 – will still be hiding "much of the detail" to justify Obama's retaliation against Russia including new sanctions and expulsion of 35 Russian diplomats or intelligence officers from the United States.

But the Times article does inadvertently make the interesting admission that the U.S. government has penetrated Russian computers, much as the U.S. government accuses Russia of doing to U.S. computers.

But the data purloined by these U.S. "implants" and other clandestinely obtained evidence – assuming there really is any – won't be something that the American people will get to see.

The shell game will continue up to the start of the Trump administration with the apparent goal to hem in President Trump from trying to reach out to Russia to avert a costly and dangerous New Cold War.

But the evidence so far released by the Obama administration still amounts to “trust us.”
