Climate change - climate change - climate change - the world is burning. The Global North with the CO2 emission is the culprit. Weather maps in Southern Europe and Australia are deep red. Add an invented degree or two, and they are going to be black.

News are talking about 48 to 50 and more degrees C in Spain, Southern Italy, Sicily, Greece. Scary. Hardly anybody notices and reports that the temperatures are largely exaggerated by the media, to cause a fear and guilt effect. Possibly a precursor to heat-lockdowns.

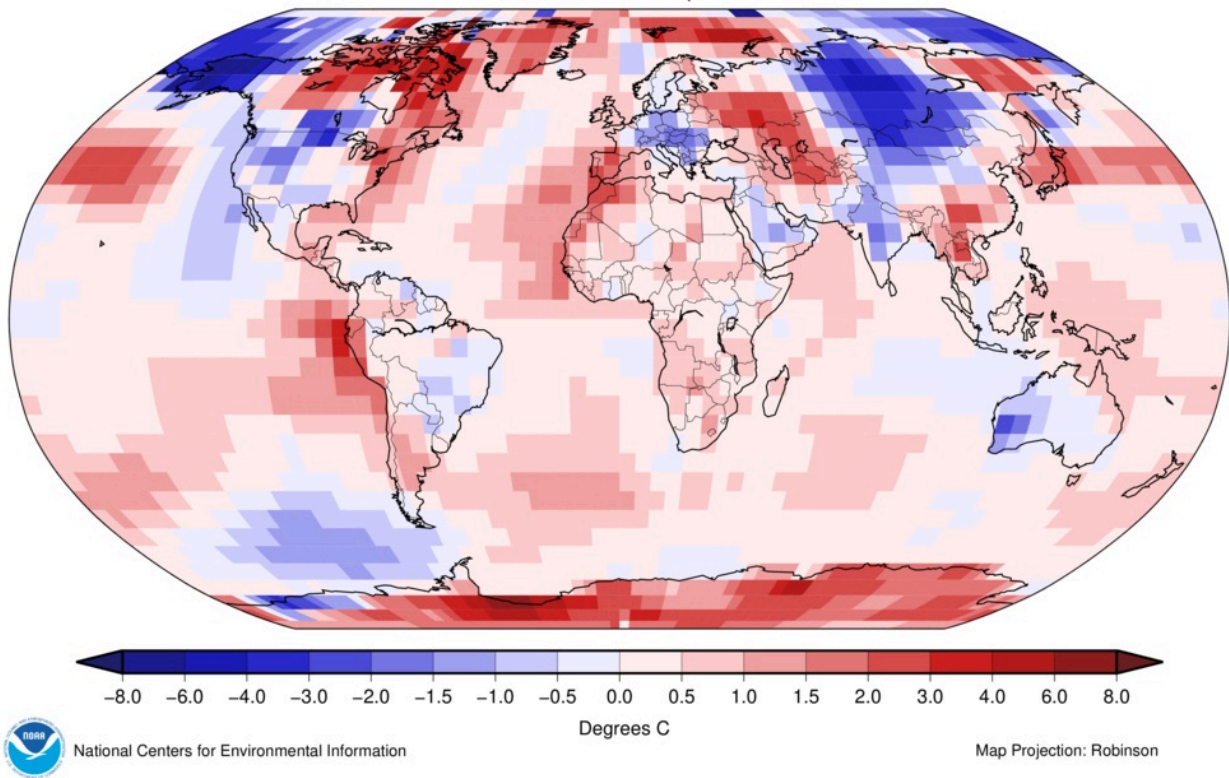

Meteorologists are part of the lie-game. Often, for fear and shock effect, they are reporting ground temperatures instead of air temperatures which are usually measured 2 meters above the ground and are typically 10 or more degrees C lower than ground temps.

It is like MK-Ultra has been socialized: When people see the deep-red-colored weather map and are being told that temperatures are at record heights, in the upper forties into the fifties, they feel the burning heat, they feel it is much hotter than other years, when in fact it is not.

This is the map that climate researchers themselves use.

Land & Ocean Temperature Departure from Average Apr 2023 (with respect to a 1991–2020 base period)

Data Source: NOAA GlobalTemp v5.1.0–20230508

TEMPERATURE DEVIATIONS FOR LAND AND SEA, APRIL 2023 relative to the temperature normal, the average for the years 1991–2020. In this map, which uses a clearly indicated and color-coded temperature scale that the scientists themselves use, the temperature deviations we reported about over the last few months from North and South America, Central and Eastern Europe, and Central Asia, with hard-hit Mongolia, India, and Australia, are confirmed. This is despite the fact that critics argue it consistently shows higher temperatures due to non-representative and then tampered with measurement data. Source and map: NOAA

Land & Ocean Temperature Percentiles Apr 2023

NOAA's National Centers for Environmental Information

Data Source: NOAA GlobalTemp v5.1.0–20230508

TEMPERATURE PERCENTILES FOR LAND AND SEA, APRIL 2023 based on an unspecified average. Here we can see that the Benelux countries, where Belgium and the Netherlands in April were 1.4 and 1.1 °C cooler than the climate normal 1991–2020, are falsely presented as having had an April average temperature “Above average” or “Much above average”. Central and Eastern Europe, which were much cooler than normal in April—for example, Czech Republic, Slovakia, and Serbia were 2.1 to 2.8 °C below the climate normal in April, which is significant in a climate context—are marked as “Near average” with misleading neutral white color. Source and map: NOAA

[For more details see GR article entitled Climate Maps Manipulated to Mislead the Public](#)

This is a list of heatwaves going back 500 years, demonstrating that worldwide temps vary widely and that there were much “hotter” years even in the past 20 to 30 years, than 2023. See [this](#).

Since 2020, with the onset of the infamous UN Agenda 2030, the news and fake news about the heat, the man-made CO₂-provoked “climate-change” reaches new heights. To press that point, forest fires are not just made by paid arsonists, but by military grade Directed Energy Weapons (DEW) and other means of Environmental Modifications (ENMOD) technologies.

It is called geoengineering – and what we are witnessing today, in the last three years and even way before, is an outright war with highly sophisticated weaponized laser-directed electromagnetic energy. The energy is so strong, it blows up entire buildings on impact, with

towers of flames, but it spares trees, blows up and burns cars, but not tires – and also boats on the sea, far from burning forests.

This is how the beautiful Hawaiian island, Maui, and her major city Lahaina was destroyed. For more on this – see further down.

[Directed Energy Weapons are defined as electromagnetic systems capable of converting chemical or electrical energy](#) to radiated energy, then these energies are fired by laser beams with the speed of light on specific targets. DEWs can produce forces that range from deterrent, to damaging, to destructive.

In parallel with these horrendous heat waves come typhoons, hurricanes and tsunami-like floodings around the world, especially but not exclusively, in the northern hemisphere. Most of them are also the result of geoengineering. Scandinavia was hit by deluge-like rains, causing floods throughout Norway and Denmark.

Extreme floodings were also experienced in Japan and northeastern China. Beijing registered almost simultaneously record heat waves, closely followed by extreme typhoon-caused torrential rains and consequential flooding. Natural? You bet.

Just a thought: The self-styled masters of the universe think linear. That is what their minds have been trained for. What if these weather and climate modifications they now carry out on specific – always more diverse – targets, develop their own dynamic, since they are not linear, but, yes, dynamic – and have long-lasting effects much different from those intended by the Globalist Cult? – Just saying.

Now while everybody screams “climate-change, climate-change, climate-change”, always referring to man-made CO2 emissions, **on July 6, 2023, the Aviation Tracking System, “Flightradar 24”, registered a record number ever of civilian airplanes in the air – some 134,384 airplanes.** This does not include military airplanes and other non-civilian flights.

See [this](#).

Have you noticed, airlines put on your ticket or your flight reservation how many kilograms of CO2 your flight produces – and so far, mostly on a voluntary basis they suggest you pay for the global warming or climate change “damage” you cause. Nobody has been able to provide a clear answer what happens with this money.

Maybe the money helps compensating for the airlines’ losses during the covid hoax, or it flows into budgets of governments. The same way traffic fines do. Speeding infractions are not reduced by the fines, nor are the numbers of civilian flights reduced by the CO2-emission charge.

Have you noticed, the media must have a restraining order not to speak about military CO2 emission, let alone war-emissions. Just imagine, CO2 emissions of the Ukraine war and other armed conflicts around the globe, dwarfs all civilian car and industrial CO2 emissions worldwide. But nobody talks about it. Very strange.

Back to DEWs and other ENMOD technologies. This science has been developed since the 1940s and in the last 80 years has become highly sophisticated, resulting in a myriad of technologies, capable of causing unspeakable damage, destroying infrastructure, housing, forests – and lives of all sentient beings, including animals and humans.

These technologies are very diverse and range from DEW, to the [High-frequency Active Auroral Research Program, or HAARP](#), a US Airforce program, as well as Scalar electromagnetic wave weaponry, similar to DEW – and more.

There is a vast literature on the subject but virtually no media coverage.

HAARP array of antennas. Gakona, Alaska

It is worth noting that the HAARP program was acknowledged by a CBC Program as early as 1996

Video HAARP CBC. Weather Control

Why Is It So Massively Used?

People are spellbound – have no idea what is going on and why. They cannot understand that such all-destructive and killing disasters are actually man-made, by technologies intent of simulating “climate change”. These people, the Globalist Cabal, who have sold their soul to the devil cannot be called humans anymore.

Maybe part of the answer provides the case of Australia – which is committed to the UN Agenda 2030. It supports the implementation of radical changes in the central role of land ownership and natural resources over the next decade.

In this context, Aussie authorities are developing a series of smart city initiatives, promising locations full of “sustainable” programs.

Could it be that the current forest fires across Australia – and across the world for that matter – are part of this plan? What is the hidden agenda? The link below provides more details of Australia’s bushfire ‘crisis’, including weather / climate geoengineering, the proposed CLARA high-speed rail network and the connection to the smart city agenda led by

the fully compromised United Nations. See [this](#) and [this](#): Australia under Fire – Environmental Warfare and the Climate Change Deception.

A similar question, why and how is Lahaina of Maui and much of this paradisaical Hawaiian island destroyed, with so far *officially* close to 100 deaths – and thousand missing? The unofficial but closer-to-the-truth figure, is up to thousand and more deaths. And the devastation and the count goes on.

The rumor mill about the destruction of Maui is diverse. One of the more consistent gossips has it that the Lahaina and Maui fires are meant to depopulate Maui and pave the way for a buyout of all property owners – for a penny on the dollar – by the multi-multi billionaires. It is living in paradise when the shitstorm hits.

Here are terrifying images on how “paradise” became hell and [this](#).

Maui, a paradise island, might be bought for pennies on the dollar... privatized paradise for the powerful financial interests.

And for more on Maui you may also want to see this (video of more than an hour).

Apparently some 90% of the people of Maui know what is going on, that it has nothing to do with the *climate change* hoax, but was a direct assault on their paradise island. See [this](#).

Video

Who are actors behind the DEW attacks? Were the US and State governments involved?

There are several, speculative answers, but they are food for reflection for those who are somewhat familiar with UN Agenda 2030 and the Great Reset — and with Klaus Schwab’s (WEF) dream of the all digitized Fourth Industrial Revolution.

The government of Hawaii states as goal of the destruction is the rebuilding to make the entire island of Maui the first Smart Island. They want the entire island governed by Artificial Intelligence (AI), as outlined in the Hawaii Digital government summit of 2023 that they have planned to host on September 25, 2023 on Maui.

Plans to Implement a Digital AI Government over Hawaii

See [this](#) and [this](#) and [this](#), Maui Island of Hawaii, a case study.

Dr. Rosalie Bertell, author of “Planet Earth: Latest Weapon of War”, says

“While the earth’s human civic community has been trying to rid itself of nuclear weapons over the last 65 years, some economically developed nations have quietly moved into the realm of geo-warfare. Geo-weaponry has recently been introduced to the public as a ‘new’ high tech way to mitigate the effects of ‘global warming’, and it is

being called 'geo-engineering'...defined as planetary-scale environmental engineering of our atmosphere: that is, manipulating our weather, our oceans, and our home planet itself."

"What is planned now are climate and weather wars, wars in which earthquakes and volcanoes, floods and droughts, hurricanes and monsoon rains will play a role." See [this](#).

Does this make living today on Mother Earth scarier? Is it fear-mongering for pushing the Agenda 2030? – or is it real?

In any case, Do Not Fear, But Stand UP – as We, the People, against this unhuman atrocity, in unison and solidarity and in a mind of PEACE – not anger, not aggression, but PEACE. This is the only way we can defeat the drive to the abyss – and start afresh. But the time is NOW.
