*The American Medical Association reported that [96% of U.S. doctors were vaccinated](#) in June. Even with a 20-point error margin, accounting for saline/placebo shots and exemptions, a vast majority of doctors have received the shots. It’s only fair since doctors peddle the injections to their unwitting, credulous fanatics who worship the white coats.*

Vaccines are the leading cause of coincidences. We all know that. But you can literally search keywords like “died suddenly” and “died unexpectedly” in Yahoo, Bing, DuckDuckGo, etc. and find endless stories like the following. Booster shots [commenced on September 22](#). That could also be a coincidence. But all of the following doctors died on October 13 or later.

We could literally include 100 doctors in this story if time permitted. All of these happened in the last four weeks. The youngest is 32. The oldest is 59.

Dr. Kevin Walsh – Roanoke, Virginia

WDBJ 7 in Roanoke reported that Dr. William Kevin Walsh passed away [“suddenly” and “unexpectedly”](#) on [October 29](#) at the age of 51. He was an OB-GYN with a private practice. Dr. Walsh was also affiliated with LewisGale Medical Center. He is survived by his wife and five children.

Dr. Walsh advocated for “vaccines” and equated COVID-19 to polio on Facebook just six weeks before his death.

Dr. Justin Nasser – Benowa, Queensland (Australia)

It's not just happening in the United States. Dr. Justin Nasser “died unexpectedly of a heart attack” on November 14, [according to the Gold Coast Bulletin](#). He was 52 years old. The Bulletin also described his death as “sudden.” Dr. Nasser was an OB-GYN at Gold Coast University Hospital and [medical director of Swell Women’s Ultrasound](#). He is survived by his wife and three children.

Queensland, and [all other Australian states](#), [require mRNA or viral vector DNA injections](#) for all healthcare workers. Only 4% of Gold Coast University Hospital staff failed to comply as of November 2, [according to the Australian Broadcasting Corporation \(ABC\)](#).

Dr. Stephanie Bosch – Waldport, Oregon

Dr. Stephanie Allison Bosch died “suddenly and unexpectedly” of a pulmonary embolism on October 13, [according to Yachats News](#). She was just 32 years old. Dr. Bosch finished her residency just three years ago. She was a general practitioner at Samaritan Waldport Clinic since 2018. Dr. Bosch is survived by both parents and several siblings.

Pulmonary embolisms are [known and common adverse effects](#) from the mRNA and viral vector DNA injections. All Oregon healthcare workers were required to be “fully vaccinated” [by October 18](#). Oregon is also the only state that we know of with an [outdoor mask mandate](#).

Dr. Craig Shannon – Poughkeepsie, New York

Dr. Craig Michael Shannon passed away at his home on October 29. He was 42. Dr. Shannon was a [neurosurgeon at Vassar Brothers Medical Center](#) in Poughkeepsie. He was apparently well-liked by his patients, as you cannot find one negative thing about him online.

The U.S. Second Circuit Court of Appeals upheld the New York vaccine mandate for

healthcare workers on November 4. The Court [denied the Petitioner's motion for preliminary injunction](#). The two original cases are remanded back to their respective lower courts to litigate the cases' merits. All New York healthcare workers were required to be "[fully vaccinated](#)" by October 7.

Two different obituaries imply that [Dr. Shannon died](#) from [non-Hodgkin lymphoma](#). But he died in his home. If he had advanced, [aggressive non-Hodgkin lymphoma](#), he would have died in a hospital or in hospice, not at home. Dr. Shannon is survived by his wife and both parents.

Dr. Elliott Gagnon – Wasilla, Alaska

Dr. Elliott Gagnon "passed away unexpectedly at his home" on October 14, according to the [Mat-Su Valley Frontiersman](#). He was 48. Dr. Gagnon was a plastic surgeon with his own private practice. He was also affiliated with Mat-Su Regional Medical Center.

A Facebook post on his private practice page says Dr. Gagnon "passed away suddenly."

### Gagnon Plastic and Reconstructive Surgery

October 18 at 1:21 PM · 🌐

It is with deep sadness we inform our community that Dr. Elliott B. Gagnon, owner and sole practitioner of Gagnon Plastic and Reconstructive Surgery, passed away suddenly the morning of Thursday, October 14, 2021.

He cared deeply for his patients, as well as his medical colleagues, for whom he had such high regard, and to whom we are so grateful as they help us to navigate care for his existing patients and refer on patients who were scheduled but not yet seen.

GPRS nurse Cia has been stalwart through it all, as she has been since day one when Dr. Gagnon opened his practice here on February 15, 2016; we are grateful for her.

Dr. Gagnon's wife and office manager, Janel, will begin closing the practice with the same attention to detail and fidelity to patient care that she and Dr. Gagnon gave from the inception of GPRS. Again, we could not do this without the kind guidance of Dr. Gagnon's former colleagues and our other partners in the community.

We do ask that if you are not a current or past patient that you refrain from calling as our phone lines have been extremely impacted since Thursday. Thank you. Additionally, many have asked where they may send gifts or flowers and we ask that instead of such kindnesses that donations be made to each individual's charity of choice or a food donation be made to one of our local food banks.

Dr. Gagnon was a proud Alaskan. He and Janel were thrilled to be able to practice, raise a family here, and throw out a fly-fishing line whenever possible.

Mat-Su Valley, it has been an honor and a privilege to serve you.

Alaska is one of several states involved in lawsuits to [halt the Joe Biden so-called vaccine mandate](#). Alaska healthcare workers [are not required to receive the injections](#) at this time. Gagnon Plastic and Reconstructive Surgery required masks to enter the establishment. There was no vaccine mandate for entry. But the practice appeared to promote injections for kids.

August 10 · 🌐

School starts soon! We sent these two off with pencils, bookmarks, and, of course stickers!

Mask up, everyone, and talk to your doctor if you or your children, ages 12 and up currently, are not vaccinated. Let's all do our part to keep Covid numbers down. We need schools open and students and educators learning and teaching.

Good wishes for all schools!

Dr. Gagnon is survived by his wife, Janel, and two kids. Janel, who was also the office manager at the private practice, is in the process of closing it down. She received one of her injections in May.

Dr. Daniel McBride – West Hatfield, Massachusetts

Dr. Daniel Gene McBride died of a heart attack after a 16-mile bike ride on October 20, [according to his obituary](#). He was a [general orthopedic surgeon](#) at Cooley Dickinson Hospital. Dr. McBride, 59, is survived by his wife and son.

His obituary says he was an “avid bicyclist” who participated in competitive events. Dr. McBride was also a runner and skier. He was healthy. We’ve [covered several stories](#) of people [dying after exercising](#) in this COVID vaccine era. Mass General Brigham, the parent company of Cooley Dickinson, requires all healthcare workers [to receive the injections](#). The company reported [97% compliance](#) on October 15.

Dr. Janak Patel – Marietta, Ohio

Dr. Janak R. Patel “suffered sudden death” on October 28, according to WTAP News. He was 55. Dr. Patel was doing his normal routine as an [emergency room doctor](#) at Memorial Marietta Hospital when he was “[found down and unable to be resuscitated](#).” He is survived by his wife and three children.

All Memorial Marietta healthcare workers are required to have at least one dose of the injections by December 5, [according to Becker’s Hospital Review](#). Protesters [gathered in front of the hospital last Friday](#), expressing their displeasure with the mandates.

Future of healthcare

The powers-that-be know that vaccine mandates for healthcare workers lead to mass shortages of qualified personnel due to injuries and deaths. Many healthcare workers are [quitting to avoid the injections](#), leading to [even more shortages](#). There’s also the influx of vaxx-injured patients. Even NPR admitted that hospitals are overrun with seriously ill people [who do not have COVID-19](#). It’s shaping up to be a situation with millions of sick people and nobody to help them (not that doctors are helping vaxx-injured people now anyway).

Healthcare will mostly be digitized by 2030. Transhumans and “GMO humans” will be the majority in Western countries. Birthrates will [grind to a halt](#) due to mass infertility, a common trait for GMO-humans. Medicine will be impersonal and mechanical. Direct human interaction will be minimal or nonexistent.’

Military personnel and equipment will inevitably start filling healthcare positions in civilian settings, likely sooner rather than later. Critical thinkers should have already been preparing for this. Avoid doctors at all costs. Keep your weight down and Vitamin D and C levels up. Exercise your heart, get adequate sleep and even meditate 2-3 times a week. Avoiding doctors is a matter of life and death in 2021. Death by doctor is disgraceful. It’s best to die with dignity when the time comes.

Stay vigilant and protect your friends and loved ones.
