The doctors' lives destroyed by long covid

- Long COVID is an umbrella term for a diverse range of more than 200 symptoms—that last longer than four weeks after an acute Covid-19 infection.
- ONS data estimates 4.4% of healthcare workers have acquired Long COVID
- poor access to respiratory protective equipment is being blamed.
- Survey of 603 doctors with “Long COVID” shows 20% no longer able to work, 50% have lost income

- “The BMJ is aware of scores of doctors with long COVID”
- Charities that provide financial support to doctors in need have seen a sudden rise in demand. The Cameron Fund, which supports GPs and their dependents, says 2022 was “an exceptionally busy year” with an increase in applications from GPs off sick with long covid. During the first half of 2023, it has seen a 67% increase in enquiries for assistance compared with the same period last year.
- British Medical Association and Long Covid Doctors For Action have set out 5 demands:
 - financial support for doctors and healthcare staff with Long COVID
 - Long COVID to be recognized as an occupational disease with a definition that covers all debilitating symptoms that Long COVID experience
 - improved access to physical and mental health services
 - greater workplace protection for healthcare staff
 - better support for Long COVID sufferers to return to work safely
- UK Dept of Health and Social Care is investing 50 million pounds to “better understand long COVID”
- NHS has committed 314 million pounds to “support people with ongoing symptoms of Long COVID”
- Article was “commissioned, not externally peer reviewed”

[Sep. 21, 2023](#) – Quebec, Canada – Long COVID, thousands of healthcare workers affected

- This survey was carried out following a mandate from the Quebec Ministry of Health and Social Services (MSSS).
- A total of 23,000 healthcare workers participated in the survey electronically or by telephone from May to July.
- 10% reported persistent symptoms for more than three months, referred to as long COVID.
- [29% have severe symptoms](#) on a daily basis, 43% have moderate, 28% mild
- 71% report Long COVID has an impact on their ability to work, 16% regularly experience difficulty working

Long COVID | Thousands of healthcare workers affected

Eylül 21, 2023

0

Up to 10% of healthcare workers could be affected by long-term COVID-19, reveal preliminary results from a large epidemiological survey by the National Institute of Public Health of Quebec (INSPQ).

[Mar. 6, 2023 WebMD](#) – Long COVID Takes toll on Healthcare Workforce

- The US healthcare system has lost 20% of its workforce
- In New York, 20% of long COVID patients are still out of work after a year
- 2% of nurses have not returned to work after developing COVID-19
- 25% of those filing COVID-related workers compensation claims for lost time at work are healthcare workers, more than any other industry.

[Feb. 2023](#) – Nursing Times – Survey of 1000 UK nurses

- 1000 nurses surveyed
- 9.5% report Long COVID

[Dec. 31, 2022](#) – Pandey et al – Nepal Healthcare workers

- 12.8% of healthcare workers report Long COVID with moderate or severe symptoms
- 2.4% report severe symptoms.

[Sep. 20, 2023](#) – US government awards \$45 million for Long COVID Clinics

- U.S. government is awarding \$45 million in grants to help clinics treating long COVID develop new models of care and expand access, the Department of Health and Human Services (HHS) said
- The condition affects nearly 7% of all U.S. adults and 2.3% of the overall population and has cost an estimated \$386 billion in lost wages, savings and medical bills, according to an analysis in April by the Solve Long Covid Initiative,

a non-profit research and advocacy group.

- More than 200 symptoms have been linked to the syndrome - including extreme fatigue, difficulty thinking, headaches, dizziness when standing, sleep problems, chest pain, blood clots, immune dysregulation, and even diabetes.

[April 2023](#) – Australian Govt commits \$50 million to “studying Long COVID”

[CDC Estimates 20%](#) of US adults have Long COVID

[March 2023](#) – Government of Canada on Long COVID

- 15% of adults who got COVID-19 still experience long term symptoms
- 20% report their symptoms limit their daily activities

[Oct 2022 – Perlis et al](#) – Prevalence of Long COVID among US Adults

- A study of 16,000 individuals
- 15% of US adults with prior positive test have long COVID

My Take

- 10% of healthcare workers are COVID-19 vaccine injured (and believe they have Long COVID)
- 7% are seriously injured and 2% of healthcare workers have been disabled and are unable to work
- Long COVID will be blamed for COVID-19 vaccine injuries to doctors & nurses.
- UK groups are demanding that “Long COVID” is recognized as an “occupational disease” for healthcare workers
- Recently, US, Canadian and Australian governments are starting to pour hundreds of millions of dollars into “Long COVID research” and financial support for those suffering from Long COVID
- We will soon start to see a shift towards accepting a figure of 15% Long COVID in the adult population. Maybe even higher.

I believe that the governments will ultimately try to buy the silence of all COVID-19 vaccine injured doctors, nurses, and healthcare workers through various “support programs” that will be well funded in the hundreds of millions of dollars.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists.
—Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. –David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it’s too late. You will not find so much valuable information and analysis in one place. –Edward Curtin
