The doctors, scientists and journalists featured in THE VIRAL DELUSION examine in detail the scientific papers that were used to justify the pandemic, and what they find is shattering. In this shocking, five-part, seven hour documentary series, they explode every single major claim, from the “isolation” of the virus to its so-called genetic sequencing, from the discovery of how to “test” for SARS-CoV2 to the emergence of “variants” that in reality, they explain, exist only on a computer. Their point: that the so-called SARS-CoV-2 virus exists only as a mental construct whose existence in the real world has been disproven by the science itself.

They then go back through history to reveal how the birth and growth of virology has led to massive misunderstanding and misdiagnosis of disease: from Smallpox to the Spanish Flu, Polio to AIDS, to COVID itself – putting the pandemic in a whole new context better understood not as settled science, but the tragic culmination of misunderstood biology by the growing cult of virology, built on pseudo-science, to which much of the rest of the medical profession defers without understanding or examination, and the tragic consequences that have been wrought in its name.

In 2019, the virologists took center stage, and for the first time on film, their methods, miscues and tragedy they have wrought are put under the spotlight, revealing the extraordinary leaps of fantasy buried in their methodology, the contradictions quietly

acknowledged in their papers, their desperate effort to change language to justify their findings, the obvious incongruence of their conclusions and the extraordinary stakes for our entire society in whether we continue to blindly follow their lead into a full-scale war against nature itself.
