Some who took vaccine with the noblest of intentions experienced unexpected debilitating aftereffects. Instead of compassion, they were met with skepticism; instead of being helped they were shunned; instead of being heard, they were silenced. Join us as we bring their stories out of the shadows so they can be heard and seen and no longer alone.

In the climate of a global pandemic, COVID-19 vaccines were rolled out under emergency use authorization after a much shorter than normal testing period. Millions of people rolled up their sleeves because they were told they were doing their part to end the pandemic. But for some—it didn’t go as expected.

The Unseen Crisis is a feature-length documentary that provides an intimate, uncensored look into the lives of those who live with the debilitating after-effects of the COVID-19 vaccines. It examines the issue of COVID-19 vaccine injury claims in a fresh, honest, and comprehensive manner with expert interviews, whistleblowers’ statements, and government health statistics.

This is a documentary about people, not politics.

The patients in the documentary suffered severe reactions to the shot and their health spiraled out of control. When they reached out to the public health system and pharmaceutical companies for help and support, instead of being acknowledged, cared for, and studied; they were ignored, censored, and called “anti-vaxxers” despite having gotten the shot. These patients are by no means isolated cases. The world is witnessing a growing epidemic of COVID-19 vaccine injuries that can no longer be ignored.

Fortunately, a small community of doctors are bravely trying to unravel the mystery of these injuries and how to treat them. They too were shocked to find themselves shut out of the mainstream medical community, simply for practicing what every doctor is trained to do.

But ultimately, *The Unseen Crisis* is a story of hope and triumph. In spite of everything, this

group has learned to rely on themselves and work together to find relief. Determined, principled, and surprisingly positive, they truly embody the resilient American spirit.

For those suffering in silence, hope begins with having a voice. The “Unseen Crisis” finally gives them one.
