Last November we spoke with Dr. Pablo Campra Madrid, a professor of chemical sciences at Spain’s University of Almeria.

Doctor Campra is affiliated with La Quinta Column, or “The Fifth Column,” a group of dissident researchers who have dedicated themselves to investigating the vaccines the government is trying to force us all to take. Doctor Campra says that through his analysis of vaccines he’s discovered graphene oxide structures within vaccine samples.

But Doctor Campra isn’t the only member of the Fifth Column.

Another member is Dr. Ricardo Delgado. Dr. Delgado joins us.
