

Video: Why Nuclear War Is Planetary Death. Stephen Star Explains

The end of humanity awaits a false nuclear alarm

By [Dr. Paul Craig Roberts](#)

For more than two decades US presidential administrations have been increasing the likelihood of nuclear war with Russia. It began with Bill Clinton violating the word of the US government not to move NATO to Russia's border. Successive US presidents since have undone all the trust-building agreements achieved during the 20th century Cold War.

The provocations of Russia since the US overthrow of the Ukrainian government in 2014 have completely destroyed Russia's trust of Washington. The atomic scientists say it is 90 seconds before Midnight. I think it is one nano-second. We have reached the point where all it takes is one false alarm of incoming missiles.

You can see the triumph of evil in the deployment of weapons that if used will destroy life on Earth. The prospect of their use has risen dramatically in the 21st century.

Democrat Hillary Clinton declared the President of Russia to be "the new Hitler."

Republican Senator Lindsey Graham called for President Putin's assassination.

Instead of keeping to President Putin's Minsk Agreement to maintain peace in Ukraine, Washington used it to deceive President Putin while building a Ukrainian army with which to attack the Donbass republics.

Instead of working with President Putin to create a mutual security pact, Washington provoked and widened the conflict in Ukraine in order to further enlarge NATO by bringing in Finland and Sweden, thus multiplying NATO's presence on Russia's border. The US and NATO are now so heavily involved in the Ukraine conflict that the question is what does Washington do when the reinforced Russians overrun Ukraine's defenses? Do US and NATO soldiers rush to Ukraine's rescue?

Only incompetent, irresponsible, and totally stupid, indeed, totally evil, US and European governments would think their prestige in Ukraine justifies nuclear war. If the US Joint Chiefs of Staff, CIA, and US politicians had the least bit of intelligence they would understand that in today's climate of preemptive nuclear strikes, nuclear weapons jeopardize America's existence. They do not protect us.

The notion that Russia or China want to rule us is insane. It is the US that has the expansionist ideology and agenda of world hegemony. The Russian and Chinese governments have their own problems and do not want those of a morally bankrupt country like the US where men marry men and women marry women and "doctors" mutilate the genitals of youngsters in order to transgender them.

During the 20th century Cold War warning times were longer and the doctrine of Mutually Assured Destruction could be regarded as deterring nuclear attack. Today the hypersonic speeds of the Russian missiles and ability to unpredictably change trajectory in flight has changed the emphasis to preemptive strike. It only takes one false warning to initiate nuclear Armageddon as there is no time to determine if the warning is false.

Everyone needs to understand that once Washington followed by Russia changed their war doctrines from no first use of nuclear weapons to preemptive attack, nuclear weapons ceased to be a deterrent. The doctrine of preemptive attack guarantees their use if there is a single false alarm. The American war planners responsible for this change should be immediately arrested, tried for crimes against humanity, and the doctrine repudiated.

Video: Steven Starr explains that nuclear war means planetary death

What we should be witnessing throughout the West is a campaign to destroy all nuclear weapons. The weapons do not protect us. They weapons endanger us. To have weapons deployed that can only achieve your own total destruction is insane.

During the Cold War there were those who thought "better Red than dead." Today the expansionist Communist ideology is dead. It is the American neoconservatives who control US foreign policy who have the expansionist agenda of US hegemony. It is insanity for the neoconservatives to believe that the US can exercise hegemony over Russia and China.

If we want to survive, we must immediately stop being insane.

Paul Craig Roberts is a renowned author and academic, chairman of The Institute for Political Economy, where [this article](#) was originally published. Dr. Roberts was previously associate editor and columnist for The Wall Street Journal. He was Assistant Secretary of the Treasury for Economic Policy during the Reagan Administration. He is a regular contributor to Global Research.

Featured image: The world's first nuclear explosion – the U.S. 'Trinity' atomic test in New Mexico, July 16, 1945. If a nuclear war breaks out today, the devastation caused by modern nuclear weapons would make Trinity's power look small by comparison. Most life on Earth would likely be wiped out. | U.S. Department of Energy

[“Towards a World War III Scenario: The Dangers of Nuclear War”](#)

by Michel Chossudovsky

[Michel Chossudovsky](#) is Professor of Economics at the University of Ottawa and Director of the Centre for Research on Globalization (CRG), which hosts the critically acclaimed website www.globalresearch.ca. He is a contributor to the Encyclopedia Britannica. His writings have been translated into more than 20 languages.

Reviews

“This book is a ‘must’ resource – a richly documented and systematic diagnosis of the supremely pathological geo-strategic planning of US wars since ‘9-11’ against non-nuclear countries to seize their oil fields and resources under cover of ‘freedom and democracy’.”

–John McMurtry, Professor of Philosophy, Guelph University

“In a world where engineered, pre-emptive, or more fashionably “humanitarian” wars of aggression have become the norm, this challenging book may be our final wake-up call.”

–Denis Halliday, Former Assistant Secretary General of the United Nations

Michel Chossudovsky exposes the insanity of our privatized war machine. Iran is being targeted with nuclear weapons as part of a war agenda built on distortions and lies for the purpose of private profit. The real aims are oil, financial hegemony and global control. The price could be nuclear holocaust. When weapons become the hottest export of the world's only superpower, and diplomats work as salesmen for the defense industry, the whole world

is recklessly endangered. If we must have a military, it belongs entirely in the public sector. No one should profit from mass death and destruction.

-Ellen Brown, author of 'Web of Debt' and president of the Public Banking Institute
