

Fake-Green Zero Carbon Fraud: 'Destroying the World to Save It'

By [Julian Rose](#)

Global Research, January 13, 2020

Theme: [Environment](#)

In-depth Report: [Climate Change](#)

If the grand plan to 'decarbonise the planet' was based upon a human scale renewable energy supply and de-corporatised, decentralised, small scale environmentally friendly distribution patterns – I would have no argument with the initiators. On the contrary, I would applaud such a rare demonstration of holistic thinking.

But the reality is very, very different. In fact it could not be more opposite. The plan being put into effect actually constitutes not a slowing down – but a significant expansion of the existing highly centralised finite energy mining and distribution apparatus, backed by a rampant corporatocracy, devious propaganda and unashamed political spin.

Emerging evidence increasingly points to deliberate actions being engaged in to bring about the very conditions that the Intergovernmental Panel on Climate Change (IPCC) claims to be trying to prevent. This United Nation's organisation and its followers, appear to be intent upon expanding the volume of anthropogenic pollutants being released into the atmosphere, rather than reducing them.

The IPCC "CO2 causes global warming" position, adopted by a plethora of industries and institutions determined to benefit from its decree, has already been exposed as a fraudulent misrepresentation of the truth. Making CO2 into 'the devil in our midst' is an overtly false trail which I have dealt with in an earlier article.[1]

Observe carefully and you will notice that the great majority of political pronouncements made by leading protagonists of 'cabal politics' are subsequently reversed in the actions that follow. Promises of peace are followed-up by acts of war; promises of prosperity for all are followed by a widening of the poverty gap. Claims of trying to stabilize the planet's climate are followed by acts of wilful destabilisation – and so on.

This 'reversal of truth' formula is the trick used by power seeking despots who have adopted dark-side practices designed to suppress – and quite literally reverse – peoples natural propensity for humanitarian expressions of warmth and mutual respect. Instead, turning those qualities into cold and calculating acts of division.

Since our world is currently in the grip of this 'cabal agenda' whose goals are not mutable nor flexible, attempts are being made to make it appear that every serious geological/environmental upheaval manifesting on this planet – is happening due to (the phony) 'global warming'.

The continuous repetition of this mantra by mainstream media is essential for the unquestioned roll-out of the corporate and banker backed 'Green New Deal/Zero Carbon' plan (scam) – which is termed 'Fourth Industrial Revolution' by the industry that backs it.

This is because it promises vast riches to the corporations contracted to build and implement the impossibly large scale infrastructural requirements deemed necessary to shift the world from an almost 100% fossil fuel dependence to a close to 100% dependence on renewable energy.

The heavy dependence upon fossil fuel energies needed in order to make possible this (theoretical) shift, would, in practice, involve an unparalleled asset stripping march across the length and breadth of the planet. Such a situation makes a mockery of the hugely over-hyped UN term 'sustainability'.

The 'zero carbon' cabal, for example, must make it appear that the disastrous fires which have ravaged South East Australia and a significant part of California, are the result of 'anthropogenic global warming' and, of course, could not possibly have anything to do with any 'conspiratorial' ulterior motives.

Which leads us to ask the following question: just who might benefit from the fact that whole communities have been wiped-out and large forests burned to ashes in these countries?

A recent expose of the Australian position shows successive governments destroying the vital South East Australian river systems by deliberately siphoning-off huge volumes of river water and hoarding it in a large number of specially constructed reservoirs. Not for strategic use in irrigating the surrounding countryside in times of drought, but to sell-off to the highest bidder – including foreign interests – hugely enriching the vendors.

A viciously inhuman policy which includes grossly negligent management of the Australian bush, in which millions of highly flammable gum trees have been allowed to over mature, presenting the perfect fuel for the rapid spreading of extremely dense fires.

It is believed that the real government ambition behind this appalling act of ecocide is to pave the way for the establishment of a super-sized control grid, construction of 5G microwave powered 'smart cities' and a new high speed railway link between capital cities. All recognised Agenda 2030/Green New Deal ambitions.

I established in earlier articles that Green New Deal is a key part of the New World Order's strategic march to power. It is founded on the fictitious 'greenhouse effect' science of the IPCC/United Nations; and on the insanely bizarre plan to achieve an end to the use of fossil fuels ('zero carbon') by mining and burning vast volumes of oil, coal and gas (fossil fuels) in order to achieve this end!

Looking at steel alone, the embedded energy (fossil fuel) requirement involved in the construction of the tens of thousands steel hungry giant wind farms that would be needed to satisfy the Green New Deal 'zero carbon' scam – would lead to a terrible massacre of the ecology of the planet.

Quite obviously, chasing this monstrous Zero Carbon 'Industrial Revolution' (oxymoron) ambition will be the harbinger of severe climactic reactions. Quantum physics has already revealed the intimate interrelatedness and interactions that occur between man's global activities and Gaia's subtle levels of equilibrium and balance. The sheer scale of the Green New Deal undertaking will involve unavoidable destabilisation of all aspects of planetary life, including that of the biosphere.

Under such a regime one can expect to see the build-up of a wide variety of intense environmental and geological upheavals, coupled to those already set in motion due to other nefarious anti-life programmes like the deadly HAARP ionospheric heaters, highly toxic global atmospheric aerosol geoengineering activities and the ubiquitous build-up of WiFi electronic smog. These are, of course, coupled with other military/space attack and defence programmes manifest by a long running US determination to exert its hegemonic ambitions at will.

Weather, already largely under the manipulative control of the US military, will become even more a victim of political/corporate attempts to carve up the planet for their own deeply narcissistic ends.

However, all forms of geological and atmospheric disruption will be blamed on 'global warming/climate change' with a stupefied public clinging to the quite demonic notion that 'zero carbon' – achieved at the cost of planetary ecocide – will finally put everything right!

This insider created 'planetary climate emergency' – now with the backing of almost the entire global corporate cabal elite and a posse of high flying multi billionaires to boot – is operating under the Green New Deal moniker. While Green New Deal's professionally trained propaganda front-runners have been given the title 'Extinction Rebellion', so as to give the impression of being cool anti-government rebels. The UK Green Party has also willingly been brought into the fold, like so many errant sheep searching for a safe pen to keep them out of trouble.

Under this infamous Green New Deal, governments and their cohorts are further capitalising on spurious and fraudulent planetary 'carbon trading' schemes. Schemes that fill the coffers of already bloated insider wheeler-dealers whose insatiable appetites lead them to rip-off the needy for the further aggrandisement of their uncontrolled narcissistic cravings. Carbon trading has nothing to do with climate stabilisation, it is just another 'green dressing' for pure neocolonial exploitation.

Where the insanity on display reaches its most cruel zenith, is in the astounding degree of top-down deception that is being perpetrated on humanity. "Power corrupts and absolute power corrupts absolutely" has never been a more apt declaration.

Perhaps the outstanding slight of hand performed by these trickster's highly organised disinformation campaign – is the use of the word 'Green' to describe the materialistic rape of our blessed Earth.

All those who grasp the true meaning of the word Green, used as a synonym for environmentally friendly ecological management systems that support localised human scale communities and benign land practices, must now speak-out and vigorously decry this fake-green wholesale evisceration of the essential life support system of the planet. Let us not allow ourselves the misplaced luxury of thinking that at some point all this craziness is just going to magically dissolve away. It is not.

Those who recognise themselves as 'Real Greens' must now unite in overcoming the subversive fake-green interlopers, whose activities are carried-out with seemingly cool disdain – while boasting an unquestioning commitment to the six defining flags of green deception: 'Sustainable Development', 'Agenda 2030', 'Green New Deal', 'Climate Emergency' and 'Extinction Rebellion.'

May all those capable of thinking and acting responsibly, now come together to stand resolutely for actions that work with – not against – nature. Let us also rise up as one in support of the ever threatened sanctity of humanity, remembering that everything of value starts with Reverence for Life.
