[On May 27, 2023](#), I wrote a substack article about multiple COVID-19 vaccinated family members, who died suddenly.

Now, I am starting to see multiple COVID-19 vaccinated family members develop Turbo Cancers (often stage 4) and their stories are shocking and difficult to believe.

A family in Orange County is in the fight of their lives, as both parents have cancer, and their three kids are left hoping their mom and dad beat the odds.

SAN JUAN CAPISTRANO, Calif. (KABC) -- An Orange County family is in the fight of their lives, as both parents have cancer, and their three young kids are left hoping their mom and dad beat the odds.

But they aren't doing it alone, the community is coming together to rally around the family.

"My oldest one, she's pretty smart, and she's picking up something's going on," said Cori Salazar, the family's mom. She is recovering from an aggressive form of thyroid cancer and has undergone two surgeries, including one just last month.

Then the father, Zak Salazar, had to undergo emergency brain surgery after a large tumor was found following a routine eye appointment.

After Zak Salazar's interview with Eyewitness News, he found out he has what was initially diagnosed as stage 4 glioblastoma. But he has since gotten better news - he has been diagnosed with stage 4 astrocytoma and will begin planning for radiation treatments, as well as look into possible clinical trials.

July 23, 2023, Davenport, FL – Michael Ruopoli was just diagnosed with “cancer of the blood”, presumably leukemia, after developing a whole body rash while his mother is currently battling Stage IV Lung Cancer ([click here](#)).

Michael Ruopoli fight his way through Cancer

Michelle Schrader is organizing this fundraiser on behalf of Michael Ruopoli.

Created 2 days ago •  [Rent, Food & Monthly Bills](#)

My name is Michelle, and I am one of Michael's sisters. Unfortunately, Cancer is a pressing issue that is constantly rearing its ugly head, and it has its sites set on our family. Here is the beginning of Michael's story:

After being brought to the ER in late January 2023, because of extremely high blood pressure and paralysis of his right side, it was determined that Michael had diabetes. He began taking medication and testing his blood sugar daily, but after a few weeks he began having a reaction to the medication, he had to be taken off. With the reaction, a rash developed all over his body, and after returning to the doctor, Michael was sent to see a dermatologist. A biopsy was done and after a time and more doctor appointments and tests, it was determined that Michael has Cancer of the blood.

With his diabetes, and paralysis of half of his body, and now being diagnosed with cancer, he will need to have Chemotherapy. Michael can not work. He is being supported by the ones that love him most, but with our mother currently battling Stage IV Lung Cancer, any little bit of help and prayers would be greatly appreciated, thank you

June 29, 2023, Baraboo, WI – Three family members develop cancer! – Both of Jessica Dominguez's parents have been battling end stage cancer, her mother fighting lung cancer last 4 years, and her father diagnosed with late stage Colon cancer in March 2023. Jessica Dominguez herself has just been diagnosed with a brain tumor!

Cancer Sucks - Please Help This Family

Donna Rogers is organizing this fundraiser on behalf of Jessica Dominguez.

My name is Donna and I am one of Jess's long-time friends and a cancer nurse.

Thank you for taking the time to read this: Please consider helping Jess and her family in their time of need. For the past year, Jess has been traveling four hours roundtrip to help her parents, who both have been diagnosed with cancer. Jess's mother has been fighting lung cancer for the last four years, and in March of this year, her father was diagnosed with late-stage colon cancer. Just one month after her father's diagnosis, Jess and her husband John received shocking news - Jess was diagnosed with a brain tumor herself!

Jess recently underwent surgery and has many treatments ahead of her. Despite all the challenges that she faces, Jess remains strong in her faith and her positivity. Due to her medical condition and the potential for seizures, Jess is currently unable to work.

June 26, 2023, Brampton, ON - Daniel Siewdass and Ferria Siewdass were both diagnosed with high grade cancer, Daniel with brain cancer glioblastoma and Ferria with high grade breast cancer (triple negative). ([click here](#))

Brain & Breast Cancer couple & family

Hi, our names are Jessica & Tiffany and we are the daughters of Daniel and Ferria, who both were diagnosed with high-grade cancer 2 months apart from each other this year. Ferria has breast cancer (triple negative) and Daniel has brain cancer (glioblastoma). They both can no longer work. They need financial assistance for a variety of things such as healthy foods that suit their required diet, hospital trips, and bills.

The photo is of our family less than a year ago. My dad was strong, active, going to the gym daily, and was heading to Australia to play cricket for Team Canada in the Over 60s World Cup in this picture. My mom was just beginning to go to the gym with us when she got her diagnosis, thinking her suddenly visible mass was a pulled muscle.

Mother and daughter were diagnosed with cancer in an interval of 20 days, in Juruá, Acre.

The 37-year-old mother discovered breast cancer in March and, in the same month, her 18-year-old daughter discovered a rare tumor between her lungs.

Speech therapist Heliana Barbary discovered her tumor after noticing a swelling in her breasts, which was confirmed with imaging tests. Stage is already 3, in metastasis.

Emanuelly started to feel sick with a constant cough and fever. With x-rays, the dense mass tumor in the mediastinum was identified as Hodgkin's lymphoma,

"More difficult than diagnosis, is treatment", says the speech therapist. Emanuelly started chemotherapy earlier, due to the severity of the tumor. The two undergo treatment together.

"São dias difíceis e cuidamos uma da outra. Dias de muita luta pela vida, com companheirismo e cumplicidade. Estamos exercendo muito a nossa fé", afirma Heliana.

June 8, 2023, Mamaroneck, NY – John Flynn suffered a catastrophic brain bleed while his wife EJ Flynn was diagnosed with Stage 4 metastatic breast cancer ([click here](#)).

The Flynn's

Cara Bruno is organizing this fundraiser.

Early yesterday morning, John Flynn (EJ's husband and Abby's father) suffered a catastrophic brain bleed (hemorrhagic stroke) and was rushed into surgery. Out of surgery, John seems to have movement on his left side and was able to squeeze EJ's hand. This is all we know at this point.

As many of you know, EJ is fighting her own battle against Stage 4 metastatic breast cancer. This family needs every bit of love and prayers we can pull together. They also need some help to get EJ and Abby with meals and finances through the next few weeks.

June 6, 2023, Agoura Hills, CA – Julie Ranoa and her mother Janis Ranoa have both been diagnosed with breast cancer at the same time ([click here](#)).

Mom-Daughter Duo Fighting Breast Cancer Together

Team fundraiser

Regan Ranoa and Susan Hauck Wallis are organizing this fundraiser on behalf of Julie Ranoa.

Hello, we're Regan (cousin and niece) and Susie (auntie and sister), and we're reaching out on behalf of our beloved Julie Ranoa and her mom, Janis. In an unimaginable twist of fate, **both Julie and Janis have been diagnosed with breast cancer at the same time** and their family is in **desperate need of our support**.

Julie is a single mother who works hard to provide for her 8-year-old daughter, Kailea. She received her diagnosis in November 2022 and has been scraping funds together to help cover the medical bills. Devastatingly, on June 6, 2023, her mother Janis, who is a retired school teacher, was diagnosed with breast cancer for the second time. **The impact of this dual diagnosis on their family is indescribable.**

Mar.16, 2023 - Atlanta, GA - Three family members develop cancer. 34 year old Chasity Noltan was dealing with her mother's recent breast cancer diagnosis and had recently lost another family member to breast cancer, when she herself was diagnosed with breast cancer. ([Click here](#))

Mother and Daughter: Journey To Healing

Chasity Nolton is organizing this fundraiser.

My name is Chasity Nolton, better known as Chad. As my 34th birthday approaches, I've gained a new outlook on life and its overall meaning. The last few months have truly devastated my family and our journey is far from over. A couple of months ago, my mother was diagnosed with breast cancer after a routine mammogram. The breast cancer fight is all too familiar as we recently loss a family member less than a year ago to this agonizing disease. After finding out about my mother's diagnosis, I immediately went into overdrive thinking about how I would have to be there every step of the way to support her in this journey. I decided to be proactive and get checked understanding that breast cancer now runs in my family. I immediately scheduled a mammogram and on February 24, I got the phone call informing me that I too have breast cancer. This news completely turned my life upside down. I dreaded telling my mom because she is my priority and I need to be strong for her. Never did I imagine that I would be fighting my own battle. I was shaken to my core knowing I would have to deliver this news to her. With so many moving parts to cancer

Feb. 10, 2023 - Hamburg, NY - Kelly Englert is a nurse who was diagnosed with Stage IV Lung Cancer 3 years ago that has recently spread to her brain. Her daughter Kaitland was just diagnosed with recurrence of her brain tumor which has "mutated into an aggressive form and is a Grade 4 Glioma". Both have simultaneous CANCER RECURRENCES into more aggressive forms! ([Click here](#))

Let's help Kelly crush Cancer!

Cheryl Taddio is organizing this fundraiser on behalf of Kelly Englert.

Hello, we are a group of Kelly's coworkers helping her to raise money as she is battling Cancer along with her daughter. Kelly has been working with Cancer patients for over 15 years, she has been on the front lines fighting for their lives as, a bedside nurse, educator and now a nurse manager. She is passionate about the care she provides and always smiling under a mask even though she has been in the same battle for 3 years.

Kelly was diagnosed with Lung Cancer 3 years ago that has now spread to her brain. Her daughter Kaitland was diagnosed with a brain tumor that has now changed into stage 4 Glioma.

Kelly Englert Flak created a fundraiser for Roswell Park Alliance Foundation.

February 8 · Facebook fundraisers ·

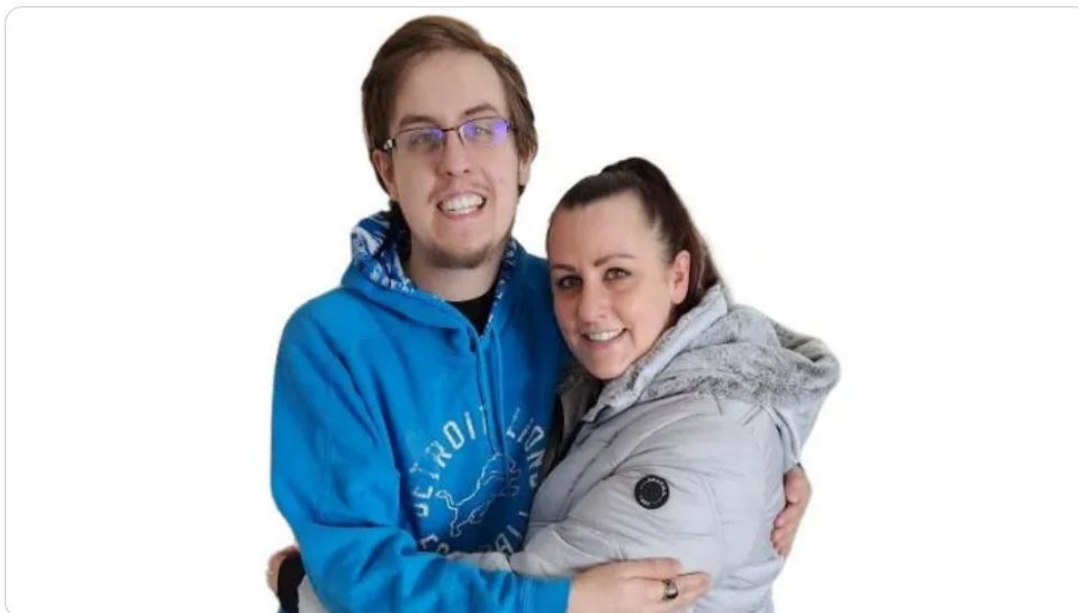

2022 was not a well celebrated year for our family. My Stage IV Lung Cancer has metastasized to the brain. In November Kaitland had a reoccurrence of her brain tumor, which now has mutated into an aggressive form and is a Grade 4 Glioma. With continued research and advancements I am receiving targeted therapy, which stabilized the disease process at the moment. Kaitland has had a second craniotomy and will be entering into a phase 1 clinical trial in the next few days. The last few months have been challenging to say the least. Kaity has had some very serious complications this time around and requires a lot more time to heal from this last surgery before she prepares to start her Immunotherapy regimen. Without everyone's love, support, and prayers we would have not made it this far. We will both fight to continue to kick cancers a\$\$.

I fight for me, I fight for my daughter, I fight for those family we have already lost to this terrible disease, and I fight for all of my patients every day, as I am also fortunate enough to be an employee of this amazing hospital. The day I give up the fight is the day I let cancer win.

This is my third time participating in the Ride for Roswell as a rider. Previous years I was fortunate enough to be volunteer and assist with medical needs. My

Jan, 2023, Aitkin, MN – Mother and son are both fighting cancer. Sarah Fjeld had Stage 3 breast cancer in 2017 and was cancer free. She developed COVID in March 2021 and was found to have Stage 4 breast cancer recurrence that spread to lungs, bones and liver. Her 20 yo son Noah Fjeld was diagnosed with rare Nasopharyngeal cancer in Nov. 2022 ([click here](#)).

Mother and Son Face Cancer Battle Together

Karen Elstad is organizing this fundraiser on behalf of Sarah Fjeld.

In March of 2021, Sarah developed Covid. She could not shake the cough and developed shortness of breath due to fluid around her lungs. The fluid was drained, tested for cancer and came back with stage 4 metastatic breast cancer. A CT scan found cancer had spread to the pleura lining, lungs, spine, ribs, and liver. It was hard for Sarah to hear about the initial diagnosis, but now to hear that her cancer was terminal and there was no cure, was devastating.

Sarah is a fighter, so more chemotherapy, three weeks on, one week off. More medication for additional therapy, bone strengthening infusions, blood counts and continuing the process until it doesn't work anymore.

Noah first developed cold symptoms that wouldn't go away. He had a relenting stuffy nose, to the point that he was not able to breathe through his nose. He was treated several times with antibiotics and steroids, but the treatments never resolved the issue.

Just after Thanksgiving of 2022, a lump became visible on Noah's neck. He was referred to an ENT who ordered a series of tests. Surgery was scheduled to collect samples from the mass in his nasal cavity and the oversized lymph node in his neck. The results came back, nasopharyngeal carcinoma.

Nov 8, 2022, Valley Cottage, NY – Nicole Smit is a teacher. In Dec.2021, Nicole's mother was diagnosed with breast cancer. In June 2022, Nicole was diagnosed with the same type of breast cancer as her mother and was also diagnosed with a secondary breast cancer. ([Click here](#))

Help a young East Ramapo Teacher Fight Cancer!

Nicole Smit has had a challenging start to her teaching career. She began teaching at Summit Park Elementary School in East Ramapo in January 2020, just before the worldwide pandemic. During her second year, her mother had a serious car accident which was tough on her family. In December 2021, the beginning of her third year, Nicole's mother was diagnosed with breast cancer. She spent much of the remainder of that school year helping her mother through treatment and juggling the daily craziness of running an elementary classroom.

In June 2022, the unimaginable happened. Nicole found a lump in her own breast. Not only was she diagnosed with the same exact type of cancer as her mother, but she was also diagnosed with a secondary breast cancer.

Nicole quickly sprung into action and began treatment. She spent the summer going through chemotherapy. She is currently being treated for Stage 2 Triple Negative Breast Cancer AND Stage 1 HER2+ Breast Cancer. She receives chemotherapy and targeted therapy at Holy Name Hospital in Teaneck, NJ. Following treatment, Nicole will undergo surgery for a double mastectomy with radiation to follow. She will also continue targeted therapy through September 2023.

Nicole is in survival mode. She cannot work, and since she is only a third year teacher, she has limited sick days. Unfortunately, these sick days will soon run out, and Nicole will most

June 24, 2022, Waverly, AL - Husband and wife battle cancer together. Chris was diagnosed with lung & bone cancer while his wife Tina Wright was diagnosed with breast cancer. ([Click here](#))

Chris & Tina's Fight Against Cancer Together

Team fundraiser

Ashley Landreth and Tia Hobbs are organizing this fundraiser on behalf of Tina Wright.

Hi Friends & Family,

For those that know our brother and sister-in-law, you know what a strong couple and hard workers they are. Christopher was recently diagnosed with lung & bone cancer. While processing his results, his wife, Tina, was diagnosed with breast cancer. Cancer in any family is difficult, but it is even more devastating for a husband and wife to fight this battle simultaneously. Each of them wants to be there for the other.

My Take...

Genetics may be a factor in some of these cases, for example involving mother and daughter battling the same type of breast cancer, etc.

But there are also many couples coming down with aggressive late stage cancers at the same time.

Turbo Cancers can develop following COVID-19 vaccination and often present at Stage 4. They are often described by oncologists as “rare” or “aggressive”.

The most common and most aggressive turbo cancers we are seeing now are leukemias, lymphomas, brain cancers (glioblastomas) and breast cancers.

When multiple family members come down with cancer and a COVID-19 vaccine induced turbo cancer is suspected, always look for the presence of at least one of these: leukemia, lymphoma, brain cancer, breast cancer.

Presumably, if multiple family members went to get their COVID-19 vaccine at the same time, they may have received a “bad batch” or “hot lot”, a toxic pharmaceutical product

with poor quality control that may have had too much mRNA or may have been contaminated with DNA plasmids containing the carcinogenic SV40 promoter (discovered in Pfizer COVID-19 mRNA vaccine), for example. Or that vaccine vial may have contained something much worse than mRNA.

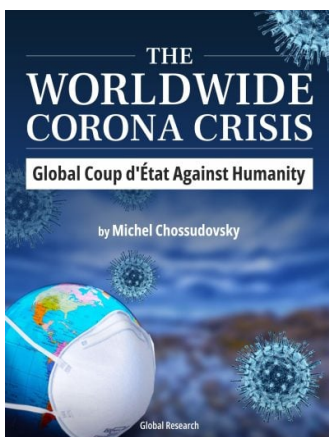

The immune system damage and organ damage that those family members could then experience from a “bad vaccine batch” or a “hot lot”, may be similar and may give rise to turbo cancers in multiple family members.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
