ANNOUNCEMENT

PHILADELPHIA VACCINE MANDATE

Posted Aug 13, 2021

To the Temple community:

The dynamic environment brought about by the coronavirus pandemic requires us to be agile. Now we have another opportunity to demonstrate that agility.

This morning, Philadelphia's Board of Health announced new COVID-19 vaccination requirements for college campuses and healthcare organizations. Read more about [the new regulation](#), and [how students are expected to comply](#).

Under this emergency regulation

- [Temple University faculty, staff, students and contractors are required to be vaccinated by Friday, Oct. 15.](#)
- Temple Health employees are also required to receive the vaccine by this date.
- Documented medical and religious exemptions are permitted.

The new regulation aligns with Temple's position on COVID-19 vaccines. Since vaccines became available, we have urged every member of the Temple community who is able to do so to get vaccinated.

You can schedule an appointment to get your vaccine on campus or upload your vaccine information through Temple's [Patient Health Portal](#).

More cases of fatal Pancreatitis:

Dec. 4, 2024 – Taunton, UK – 23 year old Abi Elizabeth Munro, a new mother, died suddenly from acute pancreatitis.

Abi Munro embraced being a mum to three-month-old Lily with her partner Shane
© Family handout

A young mother described as “extremely selfless” died suddenly having suffered from **acute pancreatitis**. Abi Elizabeth Munro, who was just 23, passed away surrounded by family at Musgrove Park Hospital in Taunton on Monday (December 4).

She has since received glowing tributes from colleagues, friends and family on social media in recent days. Her sister Hannah Munro, [who set up a fundraiser to support her partner Shane and their three-month-old daughter Lily](#), will always remember the times they spent together, reports [SomersetLive](#).

Abi’s family have been left touched by the support and messages. She said: “You can really see from the amount of people who have reached out with support that Abi was truly loved not just by family but everyone in the community.”

Tributes paid to young mother who died suddenly

A fundraiser has been set up by her sister to help provide support to her partner and their three month old daughter

Nov. 4, 2023 – Matt Wetzel had acute pancreatitis which put him in a coma, on a ventilator and 24 hours dialysis for a month. "Several of my organs completely shut down", "it was highly questionable if I was going to live or not" "After two full months in the hospital I had dropped over 50 lbs."

Matt Wetzel

February 9 at 11:19 AM · 🌐

Alright some people know from friends or family, but 11/4 I was admitted to the hospital for abdominal pain. Which turned out to be a acute pancreatitis attack a couple days later. Which put me in a coma, on a ventilator, and 24 hour dialysis for almost a month. Several of my organs completely shut down and it was highly questionable if I was going to live or not. After two full months in the hospital I had dropped over 50lbs as my body cannabalized itself. Had to relearn how to walk, and am still on bedrest recovering.

I am very lucky to not need any transplants, and am off dialysis. Now I have this cool bag hooked into my body that sucks out delicious chocolate shake colored infection, and permanent nerve damage in my left hand from breaking the crazy people restraints while I was out of it.

But I'm alive and going to make a full recovery eventually, and am now 3 months sober. Just a reminder to make sure you take care of yourself. Just a couple photos of my progress. Stay healthy

Sep. 6, 2023 - Somerset County, NJ - 47 year old US Army Veteran Jaime Ayuso died after a battle with "end stage pancreatitis."

Army Veteran, Somerset County Dad Of 2 Jaime Ayuso Dies After Pancreatitis Battle, 47

Tributes are pouring in for the family of an army veteran and Somerset County father of two after his death from end-stage pancreatitis.

Jaime Ayuso

Photo Credit: GoFundMe (Campaign: Jaime Ayuso's Funeral Expenses)

"At the young age of 47, we lost a loving husband, father, brother, son, friend and retired veteran of the army," reads the campaign.

"We lost him from a long battle of end stage pancreatitis. We are heartbroken and devastated by this enormous loss."

Aug. 18, 2023 - Appleton, WI - 25 year old Cole Cavanaugh came down with severe case of necrotizing pancreatitis. He deteriorated rapidly, developed pneumonia, sepsis and eventually died on Sep. 11, 2023.

On August 18th 2023 Cole came down with a severe case of necrotizing pancreatitis. His case began to progress quickly at his stay in St. Elizabeth's Hospital in Appleton, WI. Just a few days later they had informed us that 25-30% of his pancreas had died and the intense care that he needed, St Elizabeth's could no longer provide. He was swiftly intubated and airlifted to Froedtert Hospital in Milwaukee. His condition continued to worsen over the course of his stay. The pancreatic enzymes infected his lungs causing him to develop ARDS. Which dramatically impacted his breathing and overall lung function. The lungs then became the focus of his care. Being on the ventilator he contracted pneumonia that ultimately turned septic. With Cole's condition this made the odds 1 in a million. We were hoping and praying that he would be that 1.

Unfortunately, we got the call that he passed away in the early hours on 9/11
He fought hard, enough battles for all of our life times. He is now at peace.

June 2023 - Seatac, WA - Jorge Alejandro went to hospital for stomach pain, where he was admitted to ICU and placed in a medically induced coma, on a ventilator. He had acute pancreatitis and his kidneys had started failing.

Hi, my name is **Mayra Melissa** and I'm fundraising for my brother **Jorge Alejandro**. On June 2023 he was first admitted into the hospital after he when in for stomach pain, where they admitted him into ICU, and placed him in a medically induced coma, on a ventilator, He had acute pancreatitis and his kidneys had started failing. couldn't breathe on his own, his sugar levels were so high. They also had told us if he had waited any longer it's possible he could have died. he was on the ventilator for almost 3 weeks. was placed in dialysis for a little over a week, right now he can't walk, and working on psychical therapy. He was unable to leave the hospital bed for one month. Sadly He does not have any insurance, doesn't have a job at this time, and needs to buy his diabetes medications. we asking if you guys can help even with one dollar. Anything will help. **we are glad to still have him in our lives!**

Thank you all for your prayers they all mean so much to us and this will be a long hard battle part of hir story but he is strong! GOD BLESSED

Simi Valley, CA

Hello, my name is Nettie and I'm fundraising for my sister Penny Vitela's funeral. She was 34 years old and a mother of two children. She, unfortunately, died suddenly from pancreatitis. She was suffering on and off from pancreatitis but last week it turned severe. On Wednesday night she went to sleep and she simply never woke up. She died on 3/16/23. My family and I are asking for donations to contribute to the expenses of her funeral and help for her two children she left behind.

We never imagined she would leave us so soon and so quickly. We were not prepared nor did we ever imagine the financial hardship side of this.

My family and I truly thank you in advance from the bottom of our hearts.

Aug. 21, 2021 - Shara Berrio died suddenly after a "very short and unexpected illness with pancreatitis."

Literature (15 papers):

- [2021 Apr \(Parkash et al\)](#) - 96 yo female developed pancreatitis few days after 1st Pfizer dose
- [2021 Jun \(Cieslewicz et al\)](#) - 29 yo female doctor developed pancreatitis one day after 1st Pfizer dose
- [2021 Jun \(Walter et al\)](#) - 43 yo male was diagnosed with acute necrotising pancreatitis 10 hours after 2nd Pfizer dose.
- [2021 Oct \(Brittain et al\)](#) - 46 yo male developed pancreatitis 2 days after 1st Pfizer dose.
- [2021 Dec \(Kantar et al\)](#) - 17 yo male developed mild pancreatitis 12hr after 1st Pfizer
- [2022 \(Kalra et al\)](#) - 14 yo female developed pancreatitis shortly after 2nd Pfizer dose
- [2022 Jan \(Ozaka et al\)](#) - 71 yo female developed pancreatitis 2 days after 1st Pfizer dose
- [2022 Feb \(Mousa et al\)](#) - 22 yo female developed pancreatitis 1 week after 1st dose of Pfizer.
- [2022 Apr \(Fakhreddine et al\)](#) - 64 yo male developed acute pancreatitis few days after 3rd dose of Pfizer
- [2022 Jun \(Rodrigues et al\)](#) - 65 yo male developed autoimmune pancreatitis with IgG4 related disease 2 weeks after 1st dose of mRNA.
- [2022 Sep \(Patel et al\)](#) - 63 yo male developed IgG4 related autoimmune pancreatitis two months after 2nd mRNA dose.
- [2022 Sep \(Dey et al\)](#) - 24 year old pregnant female developed acute pancreatitis 1 week after 1st Pfizer dose.

- [2022 Oct \(Cacdac et al\)](#) – 82 yo male developed acute pancreatitis hours after 3rd Pfizer dose.
- [2023 Jan \(Boskabadi et al\)](#) – 28 yo developed pancreatitis 3 days after 2nd dose of Sinopharm
- [2023 Jun \(Stollberger et al\)](#) – 31 yo female developed pancreatitis 10 days after 2nd dose

[2022 Jan \(Ozaka et al\)](#) – 71 yo female developed pancreatitis 2 days after 1st Pfizer dose. This is what pancreatitis looks like on a CT scan.

(A) Computed tomography (CT) scan demonstrating diffuse enlargement of the pancreas and ill-defined parenchymal contours (arrow). (B) CT showed fat stranding extending to below the kidneys bilaterally (arrow).

Acute pancreatitis soon after COVID-19 vaccination
A case report

Ozaka, Sotaro MD^{a,*}; Koder, Takamoto MD^b; Ariki, Shimpei MD^a; Kobayashi, Takashi MD, PhD^c; Murakami, Kazunari MD, PhD^a

My Take...

How rare is pancreatitis after COVID-19 Vaccination?

Not as rare as I would have thought.

VigiAccess

World Health Organization

Pancreatitis (1 199)

Pancreatitis acute (1 096)

Some of the cases in the literature are identified as “autoimmune pancreatitis”.

The pancreas does accumulate a small amount of Lipid nanoparticles (with mRNA) and when spike protein is expressed locally, an abnormal inflammatory (autoimmune) process would be expected.

What concerns me is this: none of the published cases in 2021 and 2022 were fatal.

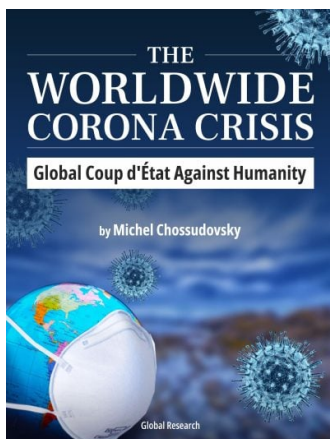

Will COVID-19 Vaccine Induced auto-immune diseases become fatal over time? I believe so.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight. -Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden "plandemic"; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that "there is no causal relationship between the virus and economic variables." In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. -David Skripac

A reading of Chossudovsky's book provides a comprehensive lesson in how there is a global coup d'état under way called "The Great Reset" that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
