*A concerned Physician Assistant, Deborah Conrad, convinced her hospital to carefully track the Covid-19 vaccination status of every patient admitted to her hospital. The result is shocking.*

As Ms. Conrad has detailed, her hospital serves a community in which less than 50% of the individuals were vaccinated for Covid-19 but yet, during the same time period, approximately 90% of the individuals admitted to her hospital were documented to have received this vaccine.

These patients were admitted for a variety of reasons, including but not limited to COVID-19 infections. Even more troubling is that there were many individuals who were young, many who presented with unusual or unexpected health events, and many who were admitted months after vaccination.

One would think that after an association was identified by a healthcare professional, our health authorities would at least review this finding, right? Sadly, when Ms. Conrad reached out to health authorities herself, she was ignored.

My firm then sent a letter to the CDC and FDA on July 19, 2021 on Ms. Conrad's behalf (see letter below), yet neither agency has responded. Even worse, when doctors came to Ms. Conrad for assistance with filing VAERS report for their patients, the hospital prohibited her from filing these reports.

That the CDC and FDA failed to respond is arguably not surprising – they have been cheerleading this vaccine for months. Admitting almost any harm now would be akin to asking them to turn a gun on themselves.

This again highlights the importance of never permitting government coercion and

mandates when it comes to medical procedures.

Full letter to the CDC and FDA:

*Re: Underreporting to VAERS & Violation of COVID-19 Vaccine EUAs*

Dear Mr. Becerra, Dr. Walensky, Dr. Woodcock, Dr. Marks, and Dr. Shimabukuro:

We write with urgency to provide a first-hand report from Ms. Deborah Conrad, a Physician Assistant at a regional New York hospital, of serious injuries from COVID-19 vaccines and her hospital system's failure to report to VAERS.

Ms. Conrad's hospital serves a community in which less than 50% of individuals have received the COVID-19 vaccine yet approximately 90% of individuals admitted to her hospital are documented to have received the COVID-19 vaccine. Even more troubling is the fact that many individuals being admitted are presenting with complication months after vaccination and the hospital has more admitted patients now on average than it had last year during the pandemic. Even worse is that Ms. Conrad attests that even injuries occurring directly after COVID-19 vaccination are *not* being reported to the CDC and FDA's Vaccine Adverse Events Reporting System ("VAERS").

In fact, after she began assisting doctors and nurses in her hospital with submission of VAERS reports, she was prohibited by the hospital from doing so for a majority of the reports. Ms. Conrad's first-hand experience reinforces the serious concerns previously raised that there is

Re: *Underreporting to VAERS and NYSDOH of post-COVID-19 vaccine adverse events at Rochester Regional Health*

Dear Doctors Mayo, Gellasch, and Janes, and Mr. Ireland:

We write on behalf of our client, Deborah Conrad, a Physician Assistant at United Memorial Medical Center, a hospital within the Rochester Regional Health system (the "Hospital"). Ms. Conrad is in constant communication with patients and other hospital staff and has knowledge of numerous serious post-COVID-19 vaccine adverse events, including breakthrough cases and deaths, that have not been reported to either the Vaccine Adverse Events Reporting System ("VAERS") or the New York State Department of Health ("NYSDOH"). For the past few months, on her own time, Ms. Conrad has been assisting doctors and other medical professionals at the hospital to report such events to VAERS. Instead of praising her efforts, numerous individuals at the Hospital, including Tara Gellasch and Peter Janes, ordered Ms. Conrad to stop reporting to VAERS altogether unless the patient she was reporting on was her patient. Since being given this order, Ms. Conrad has knowledge of dozens of patients whose conditions necessitate a VAERS report and whose treating nurses and doctors have not filed a VAERS report.

As you are likely aware, healthcare workers are mandated by federal law to report certain medical events arising after vaccination to VAERS. Pursuant to 42 U.S.C. § 300aa-25:

Each health care provider and vaccine manufacturer **shall report to the Secretary—**
