The U.S. Food and Drug Administration (FDA) has just granted \$1,977,031 to a physician-researcher in a five-year effort to investigate the incidence of myocarditis associated with COVID-19 mRNA vaccines. This research will use advanced cardiovascular imaging, including cardiac MRI (CMR) led by Supriya Jain, MD, a clinical associate professor of pediatrics and of radiology and clinical education liaison at New York Medical Hospital and Called a [Broad Agency Agreement \(BAA\)](#), Jain leads the study depending on a collaborative research network of clinical investigators across 30 academic trial site locations.

This latest important study is based on previous research led by Jain that started with 63 patients under the age of 21 and diagnosed with myocarditis post-COVID-19 vaccination, enrolled from across 16 hospitals in America.

Dr. Jain has since then helped organize a substantial investigator trial network involving cardiology and advanced cardiovascular imaging expertise across 30 trial site locations and over 300 patients.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
