On October 2nd, Oleg Manuilo, the spokesperson for Russia’s Ministry for Emergencies (MCHS) announced that a large scale “civil defense” drill will take part in the next few days.

Over 40 million personnel from Russia’s regional and municipal authorities, as well as emergency and evacuation services will be involved.

“The drill will take place from the 4th to the 7th October 2016. As a total, over 40 million people will be involved, with 200,000 specialists from various rescue services, and over 50,000 equipment units will be put to the test.” – Manuilo said.

All federal and local authorities will take part in the drill. The evacuation practice is intended to test the current emergency and evacuation management plans, for efficiency and speediness.

“We will test our communications systems as well as the systemic medical and rescue services” – says Manuilo.

“Moreover, all civil defense units will be readied. In coordination with regional and municipal authorities, all emergency notification systems will be trialed.” These systems are only utilized in the event of a sudden threat.

As part of the drill, standard medical facilities and rescue services will be checked for their readiness and ability to offer assistance.
