The public is becoming increasingly disturbed with reports of death among the vaccinated. It is natural to ask "was the death caused by vaccination?" The most definitive way of answering that question is with autopsy. Schwab et al reported on deaths after vaccination with detailed autopsies in Heidelberg, Germany.[i]

Of 35 fatalities within 20 days of injection, 10 were ruled out as clearly not due to the vaccine (e.g. drug overdose). The remaining 25 (71%) had final diagnoses consistent with a vaccine injury syndrome including myocardial infarction, worsening heart failure, vascular aneurysm, pulmonary embolism, fatal stroke, and vaccine-induced thrombotic thrombocytopenia. Interestingly, 5 cases had acute myocarditis as the cause of death with the histopathology in the heart muscle showing patchy inflammation very similar to what was seen in the deltoid muscle where the mRNA vaccine was injected.

Autopsy-based histopathological characterization of myocarditis after anti-SARS-CoV-2-vaccination

Constantin Schwab¹ · Lisa Maria Domke^{1,2} · Laura Hartmann^{1,2} · Albrecht Stenzinger¹ · Thomas Longerich¹ · Peter Schirmacher¹

Cardiac Tissue

Fig. 2 A Inflammatory focus in the left ventricular wall of case 2. B The infiltrate is predominantly composed of CD68-positive macrophages and C CD3-positive T-lymphocytes with D co-expression of CD4

Deltoid Muscle

Fig. 3 A The jab site in the deltoid muscle reveals focal inflammation. The composition is similar to the phenotype of the myocardial infiltrates showing predominantly B CD3 and C CD31-coexpressing lymphocytes and D interspersed CD68-positive macrophages

So the report has told us:

1) 71% of deaths that occur within 20 days of taking vaccine appear to be due to conditions well known to occur with COVID-19 vaccination,

2) inflammation in the heart was coincident with the same pattern of inflammation in the arm. Thus we can conclude death within a few days of vaccination is most likely due to the genetic product and that inflammation in the arm may be a surrogate for a similar process in the heart. The very high yield of post-vaccination autopsy should spur families and physicians to push for post-mortem exams so we can learn more on how this medical procedure is leading to such a large loss of human life.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
