

Government's Own Data Proves COVID-19 Shots Are Causing Blood Clots, Heart Disease, and Death

By [Brian Shilhavy](#)

There are currently two different and opposing narratives in the public regarding the safety of the COVID-19 shots.

One view claims they are safe, and the other view claims they are not.

Both views cannot be true. One view is correct, and one view is wrong.

The view of the pharmaceutical companies producing the shots and earning great profit from them is that they are safe, and this view is backed up by the U.S. Government regulatory agencies and the officials who lead them.

Here is their official statement through the CDC, as of November 1, 2021.

What You Need to Know

- COVID-19 vaccines are **safe and effective**.
- Millions of people in the United States have received COVID-19 vaccines under the most intense safety monitoring in U.S. history.
- CDC recommends everyone 12 years and older get vaccinated as soon as possible to help protect against COVID-19 and the related, potentially severe complications that can occur.
- CDC, the U.S. Food and Drug Administration (FDA), and other federal agencies are monitoring the safety of COVID-19 vaccines.
- Adverse events described on this page have been reported to the [Vaccine Adverse Event Reporting System \(VAERS\)](#) .
- VAERS accepts reports of any adverse event following any vaccination.
- Reports of adverse events to VAERS following vaccination, including deaths, do not necessarily mean that a vaccine caused a health problem.

[Source.](#)

Please note that in order for the pharmaceutical companies and the government health agencies to make a claim that COVID-19 “vaccines” are “safe,” there must be a safety monitoring system in place in order to make such a claim. Otherwise, their claims would be without basis, because nobody would know whether those claims are true or not.

The CDC admits this in this statement on their website. And they go on to explain that this safety monitoring system is called VAERS, the *Vaccine Adverse Event Reporting System*.

Based on the VAERS reporting system, the [CDC goes on to state](#):

Serious adverse events after COVID-19 vaccination are rare but may occur.

For public awareness and in the interest of transparency, CDC is providing timely updates on the following serious adverse events of interest:

They then list four adverse events they have noticed from VAERS, and also make a statement regarding deaths.

Here are the four adverse events they admit are recorded in VAERS:

- Anaphylaxis after COVID-19 vaccination
- Thrombosis with thrombocytopenia syndrome (TTS) after Johnson & Johnson’s Janssen (J&J/Janssen) COVID-19 vaccination
- CDC and FDA are monitoring reports of [Guillain-Barré Syndrome](#) (GBS) in people who have received the J&J/Janssen COVID-19 Vaccine.
- Myocarditis and pericarditis after COVID-19 vaccination are rare.
- Reports of death after COVID-19 vaccination are rare.

Notice how they frequently use the word “rare” to describe these adverse events following COVID-19 vaccinations. But how many people even know about these “rare” side effects *prior* to receiving a COVID-19 shot?

Two of the side effects are only linked to one of the three FDA authorized COVID-19 “vaccines,” the J&J shot, which is the one least used.

The nice thing about the Government VAERS database is that it is open to the public, and anyone can search it. I use the MedAlerts front end to search the database, and [you can find that here](#).

So anyone around the world can do their own search of the data in the VAERS database and fact-check the CDC’s claims, which represent the view of the pharmaceutical industry and the government health agencies and their heads.

And that’s what I am going to do in the rest of this article.

Please note that I am not dealing with the issue of under-reporting in VAERS in this article. Everyone admits that the data in VAERS is vastly under-reported, which is why when the CDC states that an adverse reaction that they admit is seen in VAERS is “rare” based on how many doses of the vaccine have been distributed, we should not take their statement at face value, because *they actually do not know how rare it is*.

So I am only going to deal with the available data to fact-check their claims, the very same data that they are using.

What I am going to do is compare the data on adverse reactions to the COVID-19 shots to the data recorded for the past 30 years for all other vaccines, as this will be a truer “apples to apples” comparison, and it is also a simple one that anyone can search themselves.

At the end of this analysis of the available data, nobody in the pharmaceutical industry or in the government health agencies can say that the data is wrong, because it is their data. They also cannot claim ignorance, because the statements they make regarding the “safety” of these COVID-19 vaccines is based on this data in VAERS, according to their own published statements.

And what we will see when we look at the data as compared to all other data from non-COVID-19 vaccines, is that they are lying, and that the COVID-19 vaccines are most definitely causing blood clots, heart disease, and deaths.

If they are lying, then they are complicit with causing these crippling injuries and deaths, and they should all be arrested immediately for being complicit to mass murder.

CDC Claim: Deaths following COVID-19 Shots are “Rare”

Let’s begin with deaths, since this is obviously the most serious adverse event following COVID-19 vaccination.

Here is the CDC claim as of November 1, 2021:

Reports of death after COVID-19 vaccination are rare. More than 423 million doses of COVID-19 vaccines were administered in the United States from December 14, 2020, through November 1, 2021. During this time, VAERS received 9,367 reports of death (0.0022%) among people who received a COVID-19 vaccine. FDA requires healthcare providers to report any death after COVID-19 vaccination to VAERS, even if it’s unclear whether the vaccine was the cause. Reports of adverse events to VAERS following vaccination, including deaths, do not necessarily mean that a vaccine caused a health problem. A review of available clinical information, including death certificates, autopsy, and medical records, has not established a causal link to COVID-19 vaccines. However, recent reports indicate a plausible causal relationship between the [J&J/Janssen COVID-19 Vaccine and TTS](#), a rare and serious adverse event—blood clots with low platelets—[which has caused deaths pdf icon\[1.4 MB, 33 pages\]](#).

Notice that according to the CDC the only “plausible causal relationship” between a COVID-19 vaccine and death is with the J&J shot, which is linked to blood clots. And they claim that this is among 9,367 reports of death following COVID-19 shots for the past 10 months.

I am not even sure where they get this number of “9,367” from, because when we search the VAERS database for deaths following COVID-19 shots, it returns a value of 17,619. ([Source](#).) If we exclude all the foreign reports, we still get a different value than what they are stating, with 8,068 deaths. ([Source](#).)

So they are applying some other kind of filter to get this death count, it would seem.

For the purpose of this analysis in this article, I am going to use ALL the data in VAERS and not filter out anything, since we already know the data is vastly under-reported.

Now to determine if these reports of deaths are “rare,” let’s look at how many deaths there are from ALL vaccines that are NOT COVID-19 vaccines for the past 30+ years.

The easiest way to do this is to simply run a search for all deaths in the database, and then subtract the deaths from the COVID-19 vaccines, which as I stated above is 17,619.

[Here is the result](#): 26,680 deaths from ALL vaccines in the database as of October 22, 2021, which covers a period of over 30 years.

17,619 of those deaths are following COVID-19 vaccines for the past 10 months. That means that for all other vaccines over the past 30 years, there have only been 9,061 deaths recorded, about 300 deaths per year. But into October of 2021, there have been already been 17,619 deaths following COVID shots.

Does this sound “rare,” or is this a national catastrophe where heads should roll and people should be locked up in jail and prosecuted?

And remember, this is THEIR DATA! They know this.

And now they are targeting children 5 to 11 years old.

Fetal Deaths

Also, the CDC and the FDA are recommending the COVID-19 shots for pregnant women, claiming it is safe for them.

But is it? What does their own data in VAERS report about fetal deaths following COVID-19 injections of pregnant women?

Through October 22, 2021 they have recorded 2,369 cases where the mother lost her baby after receiving a COVID-19 shot. ([Source](#).)

How does that compare with fetal deaths in pregnant women following ALL vaccines that are NOT COVID-19 vaccines for the past 30+ years?

For the past 30+ years there have been 2,192 cases where the mom being given a vaccine lost her baby, about 73 a year. ([Source](#).)

But this year, 2,369 unborn babies have already died following a COVID-19 shot injected into the pregnant mother.

Does this sound “safe” to you? Would pregnant women continue getting COVID-19 shots if they knew these statistics in the government’s own database?

CDC Claim: Blood Clots from COVID-19 Shots are “Rare”

The admission that the CDC makes for [COVID-19 vaccines causing blood clots](#) is:

Thrombosis with thrombocytopenia syndrome (TTS) after Johnson & Johnson’s Janssen (J&J/Janssen) COVID-19 vaccination is rare. As of October 27, 2021, more than 15.5

million doses of the J&J/Janssen COVID-19 Vaccine have been given in the United States. CDC and FDA identified 48 confirmed reports of people who got the J&J/Janssen COVID-19 Vaccine and later developed TTS. Women younger than 50 years old especially should be aware of the rare but increased risk of this adverse event. There are other COVID-19 vaccine options available for which this risk has not been seen. Learn more about J&J/Janssen COVID-19 Vaccine and TTS.

To date, two confirmed cases of TTS following mRNA COVID-19 vaccination (Moderna) have been reported to VAERS after more than 401 million doses of mRNA COVID-19 vaccines administered in the United States. Based on available data, there is not an increased risk for TTS after mRNA COVID-19 vaccination.

What the CDC is clearly doing here is only reporting one kind of blood clot, Thrombosis with thrombocytopenia syndrome (TTS). They claim that this is the only kind of blood clot they found, and it is only 48 cases with J&J, and 2 cases with Moderna.

But there are many kinds of blood clots, so we should not just limit our search for only TTS. If we just search for ALL cases involving any kind of “thrombosis” following COVID-19 shots, we get a value of 13,930 cases of blood clots. ([Source.](#))

When we search for each of the 3 FDA authorized COVID-19 vaccines where blood clots are recorded along with deaths, we get 626 total deaths when blood clots are present: [381 deaths for Pfizer](#), [118 deaths for Moderna](#), and [127 deaths for J&J](#).

So this horrible side effect is not related to only one manufacturer.

How does this compare with cases of “thrombosis” from ALL vaccines that are NOT COVID-19 vaccines for the past 30 years? With the available data we find only 489 cases of any kind of thrombosis for ALL vaccines for the past 30+ years, resulting in only 18 deaths. ([Source.](#))

This is not a “rare” event following COVID-19 shots. This is criminal.

And frontline doctors are confirming that they are seeing high rates of blood clots in patients who have been vaccinated for COVID-19.

Canadian doctors were the first ones to blow the whistle on this. This past July we published an interview with Dr. [Charles Hoffe](#), a doctor who has been practicing medicine for 28 years in the small, rural town of Lytton in British Columbia, Canada.

He was the first one to state publicly that these blood clots were not rare, as he tested vaccinated patients in his province in Canada and found that 62% of them had evidence of small blood clots.

The blood clots we hear about which the media claim are very rare are the big blood clots which are the ones that cause strokes and show up on CT scans, MRI, etc. The clots I’m talking about are microscopic and too small to find on any scan. They can thus only be detected using the D-dimer test. ([Source.](#))

Since then an emergency medicine doctor, Dr. Rochagné Kilian, has come forward to tell the public what she was seeing in fully vaccinated patients, and the high rate of blood clots. She

lost her job in order to bring this information to the public, so it is well worth listening to.

This is on our [Rumble](#) and [Bitchute](#) channel.

CDC Claim: Heart Disease from COVID-19 Shots is Rare

Here is what the CDC admits for heart disease following COVID-19 shots:

Myocarditis and pericarditis after COVID-19 vaccination are rare. As of October 27, 2021, VAERS has received 1,784 reports of myocarditis or pericarditis among people ages 30 and younger who received COVID-19 vaccine. Most cases have been reported after mRNA COVID-19 vaccination (Pfizer-BioNTech or Moderna), particularly in male adolescents and young adults. Through follow-up, including medical record reviews, CDC and FDA have confirmed 1,005 reports of myocarditis or pericarditis. CDC and its partners are investigating these reports to assess whether there is a relationship to COVID-19 vaccination. [Learn more about COVID-19 vaccines and myocarditis.](#)

Notice that they admit to 1,784 reports of myocarditis or pericarditis in people under age 30, and yet still choose to call these events “rare.”

Again, myocarditis and pericarditis are just two kinds of heart diseases, so let’s select all cases where a “carditis” is listed as an adverse event following COVID-19 shots. When we expand the search of the available data, we find 9,859 cases of carditis, resulting in 136 deaths and 327 permanent disabilities. ([Source.](#))

This is a lot more than what the CDC is telling us, because they only included 2 kinds of “carditis.”

How does this compare with reported cases of “carditis” following ALL vaccines for the past 30+ years that are NOT COVID-19 vaccines?

For the past 30+ years there have been only 913 cases of “carditis” following ALL vaccines, resulting in only 95 deaths, about 3 deaths per year. ([Source.](#))

Heart disease following COVID-19 shots is most certainly not rare! Young people, especially athletes, are having heart attacks in record numbers this year, as almost every day now we are seeing news reports of young, healthy athletes having heart attacks, like this [professional hockey player who was in the news yesterday](#). There’s a [list of athletes dying, mostly from cardiac arrest, here](#).

America is Run by Criminals and Mass Murderers

Your government is lying to you. They have this data, because it is *their data*. They know all of this.

But who will bring them to justice?

Sadly, these people in government who run the “health” agencies are simply pawns and puppets in these crimes against humanity.

The real decision makers who are guilty of mass murder are in corporate America. We have already shown how each of the pharmaceutical companies that currently have a COVID-19 “vaccine” authorized by the FDA also employ a former FDA Commissioner. See: [All 3 FDA-Authorized COVID-19 Vaccine Companies Employ Former FDA Commissioners](#)

Charles Hugh Smith [published an article today](#) highlighting just how corrupt and evil corporate America has become.

Some excerpts:

It’s becoming a routine story: a whistleblower emerges with copious documentation, revealing the ethical / managerial rot at the very top of Corporate America icons. Recently it was Facebook that was revealed as devoting far more resources to masking corporate guile than to actually improving longstanding ethical and quality issues.

Now it’s Pfizer’s fast and loose treatment of supposedly rigorous protocols that’s been heavily documented. The prestigious British Medical Journal (BMJ) stated that the whistleblower provided “*The BMJ with dozens of internal company documents, photos, audio recordings, and emails.*” [BMJ Investigation: Researcher blows the whistle on data integrity issues in Pfizer’s vaccine trial.](#)

The purpose of playing fast and loose is to maximize profits regardless of any other factors. And while corporations exist to maximize profits, the trend in Corporate America is to sacrifice everything to maximize profits and keep the putrid sewage hidden from regulators, the media and the public.

This isn’t about profit, it’s about hiding the rot that has seeped into every nook and cranny of Corporate America. The foundation of the stock market’s

extreme valuations is corporate profits, and the stock market bubble is now the precarious foundation of the entire U.S. economy: should the bubble pop, everyone knows the economy and the financial system will both crash.

The usual corporate strategy-defame the whistleblower and blow smoke to cover the rot-loses traction when the rot is documented by internal memos, recordings, etc. It's difficult for the lackeys of Corporate America to dismiss the British Medical Journal as just another tin-foil-hat outlet of "fake news," especially with all the documentation now made public.

Lost in the obsession to profiteer and hide the rot is the notion that corporations have responsibilities to the public and their customers/users, not just to greedy managers and shareholders. These responsibilities have been tossed into the muddy ditch.

Regulations only exist in name in America. Corporate America plays by its own rules. Corporate America is not longer regulated in any consequential fashion, as the list of Pfizer's actions reveal:

- Participants placed in a hallway after injection and not being monitored by clinical staff
- Lack of timely follow-up of patients who experienced adverse events
- Protocol deviations not being reported
- Vaccines not being stored at proper temperatures
- Mislabeled laboratory specimens, and
- Targeting of Ventavia staff for reporting these types of problems.

The last item appears in virtually every whistleblower case: the corporation doesn't rush to fix its glaring ethical and quality issues, it rushes to silence the whistleblower and "manage the narrative" to protect its precious profits. Never mind that the public pays the price for corporations saying one thing and doing another, for hiding what they dare not let regulators, users, customers and patients learn about their practices and behind-closed-doors goals.

The *Prime Directive* of Corporate America is to hide the rot that's permeated the entire corporation, starting at the top.

We shouldn't be too surprised that Corporate America is rotten to the core-the entire status quo is rotten to the core. Ethics and regulations are annoyances to be skirted, and if some random regulator catches insiders in the act, the corporation pays an inconsequential fine and then returns to BAU-business as usual, rotten to the core.

Any citizen who desires to be well-informed would be well-served to read this report closely: [BMJ Investigation: Researcher blows the whistle on data integrity issues in Pfizer's vaccine trial.](#)

He goes on to write about an amazing database someone has put together which documents all the “Corporate fines and Settlements” over criminal cases since the 1990s. Pfizer, for example, has paid out over \$8 BILLION in fines for criminal activities over the years.

As further documentation, I am honored to share a remarkable data base of [Corporate Fines and Settlements](#) from the early 1990s to the present compiled by Jon Morse. Here is Jon’s description of his project to assemble a comprehensive list of all corporate fines and settlements that can be verified by media reports:

“This spreadsheet is all the corporate fines/settlements I’ve been able to find sourced articles about, mostly in the period from the 1990s up to today (with a few 80s and 70s). This is by far the most comprehensive list of such things online. At least that I could find, because the lack of any decent list is what made me start compiling this list in the first place.”

What’s noteworthy is the sheer number of corporate violations of laws and regulations—thousands upon thousands, the vast majority of which occurred since corporate profits began their incredible ascent in the early 2000s—and the list of those paying hundreds of millions of dollars in fines and settlements, **which reads like a who’s who of Corporate America and Top 100 Global Corporations.**

I encourage you to open one of the three alphabetical tabs at the bottom of [the spreadsheet on Google Docs](#) and scroll down to find your favorite super-profitable corporation.

Many have a long list of fines and settlements, and many of the fines are in excess of \$100 million. Many are for blatant cartel price-fixing, not disclosing the dangers of the company’s heavily promoted medications, destroying documents to thwart an investigation of wrong-doing, etc.

In other words, these were not wrist-slaps for minor oversights of complex regulations— these are blatant violations of core laws of the land.

Jon offered this commentary on Corporate America’s slide to the bottom of the moral cesspool:

“With the increases in concentration of wealth there has been a culture of idolizing wealth, one example is how prosecutors no longer find it appropriate to put bankers and CEOs in jail. I think one side-effect of the culture changing has been an increased willingness to break the law to increase profits.

The settlements with the banks along with the ongoing investigations have shown that virtually every market is being manipulated; the stocks, metals markets, LIBOR, FOREX, everything. The companies would only break so many laws if they felt they would have a reasonable chance of getting away with it; they would also need a reason to do it, which is provided by the infinite growth model our economy is based on.”

Thank you, Jon, for compiling a tremendously important and valuable database, and for connecting this staggering list of violations to the cultural

worship of maximizing private gains at any cost. I am reminded of socio-economist Immanuel Wallerstein's description of the current system of central-state/private-corporation collusion as *"a particular historical configuration of markets and state structures where private economic gain by almost any means is the paramount goal and measure of success."*

Read the [full article here](#).

It is time to STOP the killer COVID-19 vaccine campaigns, and way past time to round up all of these murderers and lock them up.

These talking heads on TV use what is called an "appeal to authority" to try and convince the public to get these shots. The data and the science is NOT on their side, and they are not nearly as intelligent as they want you to believe they are.

I know there is great risk right now in refusing the COVID-19 shots for some people, as your livelihood and means to earn income could be at stake.

But this is NOT a sustainable path we are on, and at some point those who refused the shots are going to be needed again, and chances are you will, at some point, be able to earn income again.

Just remember one indisputable FACT:

If you risk getting a COVID-19 shot, you could die or become crippled with very serious injuries. Deaths and injuries are happening at a record pace, and they are not "rare" as is being claimed, based on the data.

If you do not take a COVID-19 shot, you cannot die from that shot.

It really is that simple.

Parents who subject their children to these shots are guilty of child abuse, and attempted murder. Keep your children home, and safe, no matter what the cost, if you truly love them.
