Examine the following diagram, reporting Vaccine Adverse Events in Florida following the COVID-19 vaccine rollout in mid-December 2020

Below is a report of the Florida Department of Health published in February 2023, which demonstrates unequivocally that the Covid-19 vaccine launched in mid-December 2020 was conducive to a major shift in the number of Adverse Events reported in 2021, in comparison with all previous years.

Of significance, most governments Worldwide (and across the U.S. and Canada) have failed to inform people on the dangers of the Covid-19 vaccine.

In contrast, The Florida Department of Health acknowledges in this report the adverse events related to the COVID-19 vaccine including:

coagulation disorders, acute cardiac injuries, Bell's palsy, encephalitis. cardiac arrests, thromboembolic and thrombocytopenic events, cardiovascular disease, etc

Michel Chossudovsky, Global Research November 23, 2023

Overall reports submitted to VAERS, Florida 2006–2022

In Florida alone, there was a 1,700% increase in VAERS reports after the release of the COVID-19 vaccine, compared to an increase of 400% in overall vaccine administration for the same time period (*Figure 1*).

The reporting of life-threatening conditions increased over 4,400%. This is a novel increase and was not seen during the 2009 H1N1 vaccination campaign. There is a need for additional unbiased research to better understand the COVID-19 vaccines' short- and long-term effects.

The findings in Florida are consistent with various studies that continue to uncover such risks. To further evaluate this, the Surgeon General [wrote a letter](#) to the U.S. Food and Drug Administration (FDA) and the Centers for Disease Control and Prevention (CDC) illustrating the risk factors associated with the mRNA COVID-19 vaccines and emphasizing the need for additional transparency.

According to a study, [Fraiman J et al, Vaccine. 2022](#), mRNA COVID-19 vaccines were associated with an excess risk of serious adverse events, including coagulation disorders, acute cardiac injuries, Bell's palsy, and encephalitis. This risk was 1 in 550 individuals, which is much higher than other vaccines.

A second study, [Sun CLF et al, Sci Rep. 2022](#), found increased acute cardiac arrests and other acute cardiac events following mRNA COVID-19 vaccination.

Additionally, [Dag Berild J et al, JAMA Netw Open. 2022](#), assessed the risk of thromboembolic and thrombocytopenic events related to COVID-19 vaccines and found preliminary evidence of increased risk of both coronary disease and cardiovascular disease.

While the CDC has identified safety signals for stroke among individuals 65 and older following the bivalent booster administration, there is a need for additional assessments and research regarding safety of all mRNA COVID-19 vaccines.

To support transparency, the State of Florida reminds health care providers to accurately communicate the risks and benefits of all clinical interventions to their patients, including

those associated with the COVID-19 vaccine as additional risks continue to be identified and disclosed to the public.

The State of Florida remains dedicated to protecting communities from the risks of COVID-19 and other public health concerns, specifically by promoting the importance of treatment and promoting prevention through healthy habits. We encourage our health care partners and providers to do the same.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock

upon which to sustain our fight. –Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists.
—Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. –David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it’s too late. You will not find so much valuable information and analysis in one place. –Edward Curtin
